Vine Customer Review of Free Product ([What's New?](#))

Time will tell how this works. It is freezing in WI now. We have old windows since we are working slowly to replace all of them instead of doing it all at one time. I used this across one window and I feel that it made a big difference at the bottom of the window where the one slides across. there was an even gust coming though here and it's nowhere near as bad since i installed this. Basically nothing to do with this. You cut it to length, pull the strip off the back and stick it on. I did take it slow and kind of "clicked" the stripping under the window panel to really help it stick into place. for now, it's

working well. I haven't needed to open the window so not sure if it gets in the way, but for now it's holding up nicely.

Vine Customer Review of Free Product ([What's this?](#))

I wasn't sure what size to order for this weather strip but it fit as I'd hoped for my sliding patio doors to help with heat loss/air exchange. Replacing the card slot pile strip would have a good improvement as well but I'll have to wait to remove the doors next year. This adhesive version is easy to apply but make sure you stick it to a freshly cleaned and dry surface. Any moisture build-up from cold outdoor weather and warmer indoor temps will impact the adhesiveness.

Observations:
