## WASTE MANAGEMENT PLAN

### Per 33 CFR 151.57.

Name of Vessel: \_\_\_\_\_

Person in Charge: \_\_\_\_\_

#### SOLID WASTE MANAGEMENT PROCEDURES:

##### When vessel is more than 12 miles from shore:

All garbage except food materials and biodegradable paper products is to be placed in designated refuse containers for disposal at shore facilities on return to port. Food materials and other biodegradable items will be collected in designated containers and processed for disposal overboard by an assigned crewmember or passenger.

##### If vessel is within 12 miles of shore and returning to port:

ALL refuse materials are put in designated containers and kept on board to be disposed of at shore facilities by an assigned crew member or passenger.

##### Crew and passenger training:

At the beginning of each trip crew and passengers are briefed on the refuse handling regulations and shown the MARPOL V placard posted in the galley service area. Crew and passengers are told that it is firm policy on this vessel that all garbage materials are retained on board and disposal is made only in accordance with the regulations. The captain orients all new crew and passengers on the rules and makes the assignments for garbage and trash disposal. Designated containers for various types of material are reviewed and their locations noted to all personnel.
