**PUMP
REPAIR**

Next time you're faced with a Pump related issue, turn to SC Machine, where our expertise will help put your project back in gear.

SC MACHINE offers several service options, tear down, inspection, written estimates and fast turnarounds.

It has become clear that the market needs pumps to be rebuilt quickly and efficiently.

SC MACHINE quickly learned that reverse engineering as well as remanufacturing was the future.

All in order to ensure that they were quality products that beat OEM specs.

We have the knowledge and technology to completely repair and even manufacture complex components in a quick turnaround time.

Other Services
Remanufacturing & Repair,
Preventative Maintenance,
Spare Part Sales, Reverse
Engineering & Manufacturing
Rebuild with Warranty

We offer disassembly, cleaning, inspection, measurement, and engineering evaluation and recommendations.

Including modifications and reverse engineering.

Our expertise covers a wide range of pump repair, right down to reinstallation and inspection.

If you are interested in a complete rebuild, we are ready to answer your call. It doesn't matter if your pump has been in service for 5 years or 25 years - we can rebuild it

TESTIMONIALS

I was contacted by one of the reps at SC MACHINE the day after our lift station Flygt pump decided to not wanna work that day! They repaired it and charged us much less than manufacture.

We are very pleased with their service.

Bernadette Hudson
WWTP Supervisor

SC Machine has been repairing our Rotary Airlocks and Pumps for quite some time now. You can't beat the price and great service fast turn around.

Jorge Bridges
Plant Supervisor

trying and find a good company for our pump repairs & maintenance , we finally found SC MACHINE. They evaluate the problem and always give a free quote. They have been rebuilding our equipment for years now.

Juan Verco
Director Of Operations
