AIRLOCK REPAIR

Next time you're faced with a Rotary Airlock related issue, turn to SC Machine, where our expertise will help put your project back in gear.

SC MACHINE offers several service options, tear down, inspection, written estimates and fast turnarounds.

It has become clear that the market needs Airlocks to be rebuilt quickly and efficiently.

SC MACHINE quickly learned that reverse engineering as well as remanufacturing was the future. All in order to ensure that they were quality products that beat OEM specs.

We have the knowledge and technology to completely repair and even manufacture complex components in a quick turnaround time.

We offer disassembly, cleaning, inspection, evaluation and recommendations.

Including modifications and reverse engineering.

Our expertise covers a wide range of Rotary Airlock repair, right down to reinstallation and inspection.

If you are interested in a complete rebuild, we are ready to answer your call. It doesn't matter if your Airlock has been in service for 5 years or 25 years - we can rebuild it

TESTIMONIALS

I contacted SC MACHINE with a few details on our Airlocks, They sent over a quote and began working right away. They repaired it for a fraction of the quote from OEM.

I am very pleased with their service.

Melania Ann
Plant Supervisor

SC Machine has been repairing our Rotary Airlocks. We have tried in the past to find what SC MACHINE has been offering all this time! You can't beat the price and great service.

They are truly a one stop shop

Johnny Locke
Maint. Supervisor

We were trying to find a good reliable company for our equipment repairs, we came across SC MACHINE. They evaluated the problems and gave a free quote. They now have been rebuilding our equipment for quite sometime now.

Geoff Goldstein
Public Works Director
