

# PATCH THE CATCH

## PATCH THE CATCH - TIER SYSTEM COLOUR CODE

This Carp example shows how the Patch the Catch tier colours work.

Each species follows a similar colour progression, keeping the system consistent across the whole collection. As you advance through the tiers, the *inner circle* colour changes first. When you reach the next tier level, the *border* colour changes too (as highlighted in red in the example).

Can you jump from tier to tier?

Of course you can.

Collect them all if you like – patches, stickers, certificates – though it may take a lifetime.

When you reach a new tier, you Patch it. Sticker it. Certificate it.

Then it goes into the *original* Ledger.

Everything you need is on the website.
