

PATCH CARE – QUICK GUIDE

Stitching is always recommended.

🔥 IRONING

- Do not 'Iron-on' to waxed garments
- Low heat only on fleece, cotton, denim, canvas
- Use a cloth – no steam
- Ironing is temporary. Stitching is permanent.

✂️ STITCHING

- Hand stitch around the edge
- Whip stitch or neat straight stitch
- Strong polyester or cotton thread

💧 WATERPROOF & WAXED

- **Stitch only**
- Waterproof garments: seal inside stitches
- Waxed garments: re-wax after fitting

💎 CARE

- Wash inside out where applicable
- Avoid high heat drying (tumble drying)
- Waxed garments: sponge clean only

All Patch the Catch patches are supplied with an iron-on backing. *(unless otherwise stated)*

Stitching is recommended across all garments and is **required** for waxed and waterproof fabrics.

Don't worry you don't have to iron on an iron on patch!

The heat-activated adhesive is stable in normal wear and sunlight.

Stitching is recommended for longevity and for garments that should not be ironed.

Thank you for your purchase.

Follow these care guidelines and you won't shed a tier !
