Natural Stone

Our Natural Stone curbing is in a league of its own. Our artistic design and attention to detail allow us to replicate the perfectly imperfect look and feel of stone. No wonder it is our top selling edging.

Belgium Block

Our Belgium Block curbing is created by using a combination of blocks with 4 inch and 8 inch lengths. By varying the lengths of blocks used, the final design has the proper combination of regularity and irregularity to look consistent and exciting. The blocks are 6 inches deep and 4 inches tall.

The final colouring can be adjusted for your personal style.

Stamped Edging

The slant profile is industry-standard. Being one of the most popular designs for the last 50 years, the ability to use over 18 stamps or none at all, it can be tailored to suit your specific style and vision. As the entry-level offering to increase your curb appeal, this profile will not disappoint.

WE CARE ABOUT THE DETAILS

We pay special attention to the details of every project to ensure the complete satisfaction of each client. Our goal is to enhance the exterior of your home, raise your property value and beautify your whole neighborhood.

Concrete Edging Styles

At Simply Turf Landscaping, we work with you to pick out the perfect style of edging for your project. The variations are endless. From brownstone to clean black slant, we can create the art that will tie your landscape project together.

- Natural Stone (Our most popular)
- Belgium Block
- Stamped Edging with a slant profile

DESIGNS & PRICING

The two main factors in determining the cost of decorative concrete curbing is style and the number of feet.

Although we provide a detail costing of each job via a home visit, we provide a rough estimate before we come out so that you can decide if we fit your budget.

The quantity lists are based on 100ft of curbing.

Slant Profile - \$15 per foot (starting)

Belgium Profile- \$20 per foot (starting)

Natural Stone Profile- \$25 per foot (starting)

Depending on the length (for example, over 500ft), the final costs can end up at half of the 100ft cost.

Due to the time required to setup on-site, the minimum charge for any job is \$749.

OUR PROCESS

ROUGH ESTIMATE

We are able to give you a rough estimate over the phone or via email. We will require approximately how many feet you need and what styles interest you. Based on the number of feet and style, we can give you a rough estimate of costs to ensure we fit your budget.

DETAILED ESTIMATE

Next, we stop by your yard and measure out the exact distance and finalize the style. We can offer suggestions on design, colour and more based on our extensive experience. Shortly after our visit, we will provide you with a formal quote.

PREP WORK

Once our crew arrives and the design is laid out, this will be the time that any alterations and changes are made. For new landscaping, we install a crusher dust that is mechanically compacted to create a stable foundation.

LAYING THE CURBING

The concrete is prepared on-site with a custom mix of the highest quality additives, colouring and water. The concrete is then extruded with our curb machine to give it its final look. The curbing is then finished using the style of your choice via stamp or other techniques.

After the curbing is stamped and formed, we will ensure that your yard is free of any excess concrete, sod and edging, leaving a tidy area.

We then apply an acrylic product to seal the concrete within 7 days.

FINISHING WORK

Within a few hours, the curbing will be hard to the touch.

INSTALLATION

Once you decide to move forward with increasing your Curb Appeal, we will work with you to ensure that we are matching your style and budget. We go above and beyond the competition in providing a top-quality product crafted with care and attention.

Maintenance

In the years after installation a small amount of maintenance is needed to keep your curbing looking new. We will walk you through the steps to ensure that your investment is always looking its very best or you can leave it us!
