

WEBSITE MANAGEMENT & DESIGN PORTFOLIO

Full Website Design, Development & Ongoing Management

The following projects showcase a comprehensive selection of websites that I have personally designed, developed, and continue to manage on an ongoing basis. Each site is custom-built to fulfill the unique requirements and objectives of the client, ensuring that both desktop and mobile experiences meet the highest standards for design and usability. My ongoing management services encompass regular updates, technical maintenance, and consistent performance monitoring to maintain seamless operation. Additionally, I provide search visibility maintenance and optimization, ensuring that each site remains discoverable and competitive in search engines.

Partial Design / Collaborative Build / Ongoing Maintenances

These projects highlight a collaborative approach to website creation, where my role involved providing partial design elements and sharing the build and ongoing management responsibilities with the client or other stakeholders. The result is a website that effectively blends professional design expertise with collaborative input. I remain involved in the Website ongoing maintenance and management of the site, supporting its continued growth and functionality.

Website Redesign / Maintenance / Management

I significantly redesigned the following websites to update both their visual appearance and functionality. My involvement extends beyond the redesign phase, as I continue to provide ongoing maintenance and management services. This ensures each site stays up-to-date, secure, and fully functional.
