

JC Family Lawn Care

Insect Control Programs

Mosquito Control	Flea & Tick Control
<p>Our mosquito program consists of 8 applications yearly that are applied about 3 weeks apart. The applications kill them on contact and keeps them away up until the next one. Target areas are around the foundation of your home, which include mulching beds and shrubbery, as well as the perimeter of your property which includes trees up to 10 feet, and fence lines. We target adults as well as the larva for complete control. Although this program is primarily for mosquito control, these applications are also effective against other insects such as spotted lantern fly.</p>	<p>Our flea and tick program consists of 6 applications. The applications work in a similar manner as the mosquito treatments as it kills on contact, repels and disrupts the reproduction of fleas and ticks, allowing for more complete control of the insects. These applications are applied to your lawn and will effectively target other pests found on your lawn such as ants, cicada killers, earwig, sod webworm, etc.</p>

- Get one **free** flea & tick treatment when bundled with our Plus, Grand or Premium lawn care programs.
- Get one **free** flea & tick treatment when bundled with the mosquito program.
