

**Welcome to RescueDogLodge**  
**Thank you so much for staying with us**

In order to make your stay the best possible here is some information about the Studio

Wifi Access: Available upon arrival and located in the printed guest manual

Property manager contact between the operating hours 8AM - 5PM  
[guest@RescueDogLodge.com](mailto:guest@RescueDogLodge.com)  
Text: (307) 439-5490

**Keys:** The keys will be in the entrance door lock and please leave them in the door lock upon departure. The keys have an Airtag with them if you happen to misplace them.

**Parking:** Parking for the Studio is to the right side of the driveway and garage entrance. It is a parking spot marked by a “*Private Property Do Not Park*” sign and shown below.

AirBnB Parking Spot Show below with vehicle parked on it

**Staircase:** If you are bringing your fur-baby they may not be familiar or comfortable with grated Big Sky metal steps. Short of carrying them, which is what my husband does, there is a dedicated **alternate groomed pathway** next to the staircase and marked by orange snow rods and shown below.

The alternate groomed walkway is groomed after each snow fall and the available sled is both for sledding and for use of an optional luggage tow dolly.

A view of the groomed walkway entrance onto the studio patio as well as a dog stand for your convenience.

The patio landing has snow melt mats for your convenience and a gazebo with bench should you decide to sit out and enjoy the quiet property

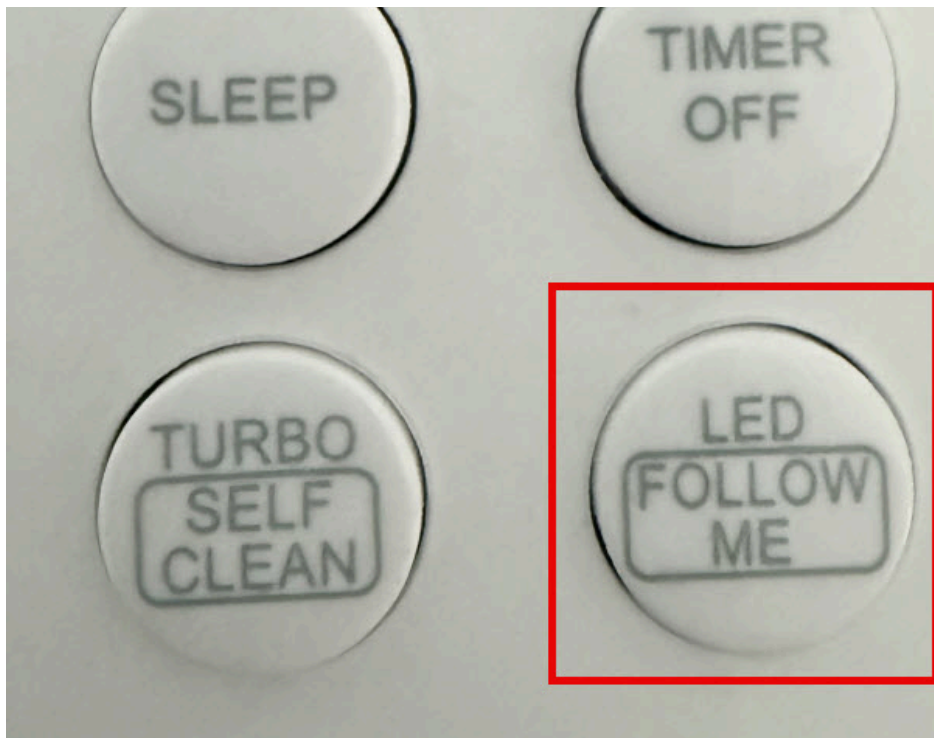

**Heating:** There are two heating options available.

1. The Split AC/Heating unit can be controlled by the remote control located on the wall over the high top table.
2. There is also an individual space heater in the Bathroom. Feel welcome to set them as needed upon arrival or send us a text message in advance to set the room temperature to your liking.

**Cooling:** The Split AC unit will provide you with cooling for those few days a year Big Sky needs it. The remote is on the wall above the high top table and chairs.

**Important:** If you desire to turn the bright temperature lights off on the Split Unit unit just press the LED Button as shown below:

**TV:** The Samsung remote is on one of the bedside night tables. Amazon Prime is logged into for you to watch movies or TV series of your liking. Also, if you log into a different Streaming service please log out before departure. If you forget, which is normally us, please text or call us and we will log you out.

**Blinds:** Feel welcome to adjust as needed. The window blind has a cord to adjust as needed. The door blind pulls up or down manually and has a latch at the bottom to secure it.
