ENSPIRE
A BOMA Initiative

In today's rapidly evolving industry, continuous learning and professional development are crucial to stay competitive.

BOMA Enspire offers a variety of learning opportunities to enhance the skills of:

• **Building operators**

• **Service Providers**

• **Energy Enthusiasts**

Introducing EPICS. A virtual augmented reality learning environment to bring you to the next level.

Delivered through the BOMA Enspire program, EPICS is a cutting-edge learning program that uses 3D/VR/Digital Twin technology to replicate real-world operational/retrofit scenarios.

In this facilitated, interactive space, participants learn about **best practices, technology, troubleshooting**, and **optimizing building retrofits** through 2-3-hour immersive training sessions. EPICS provides practical micro-training that bridges the gap between theoretical knowledge and real-world application.

Program Candidates: Mid-career building operators, retrofit project talent pools and job-seekers interested in cleantech.

Topics Covered: Decarbonization, Building Operations, Retrofit Planning, Electrification, Adaptation, Market Transformation.

Canada's cleantech sector is growing and jobs are changing. Be future-ready with EPICS.

Contact the EPICS team to find out more: epics@greenefficiency.org

Pilot Launch: Winter 2025. Toronto, ON

Upskill and future-proof your career
