

RESCUE PROJECTS

SCARCE's commitment to sustainability includes collection projects that divert items from landfills.

We collect several items, including books and school and office supplies, and provide them free of charge to teachers and not-for-profit organizations.

Visit www.scarce.org for a complete list of accepted items.

Volunteers are needed to help with our rescue projects, so contact us today to find out how you can get involved!

ENVIRONMENTAL EDUCATION

School and Community Assistance for Recycling and Composting Education

***Inspiring people
to care for the
Earth***

The award winning SCARCE team provides innovative programs and works with schools, organizations, and municipalities to create sustainable communities.

Customized Programs for Your Organization

Reduce Waste · Save Energy · Conserve Water · Compost · Manage Stormwater · Prevent Pollution · Create Healthy Places

Programs can be on-site or at SCARCE.
Please contact SCARCE for details.

Businesses

We will help your organization adopt earth-friendly practices while reducing costs and engaging employees. SCARCE provides workshops, lunch and learns, and building audits to get you started.

Not-for-profit Organizations

SCARCE will assist your staff in protecting the environment as you achieve your organization's mission. We provide training and give presentations that will inspire your employees to go green!

Community Groups

We have lots of hands-on activities for kids, teens, scouts, and adults, including energy bike, trash-to-treasure, 3Rs, recycled papermaking, water pollution and composting programs.

Schools

SCARCE will lead elementary students in playing a recycling game or analyzing their lunchroom waste. Middle school students will solve recycling, composting, and stormwater problems, while high school students will design sustainable buildings. In addition, we provide on-site staff training and building audits.

Municipalities

SCARCE will assist your city, village, or township in becoming more sustainable. We will help you manage waste-hauling contracts, organize recycling drives, and plan green infrastructure projects.
