AND INDUSTRIAL SOLUTIONS

## CUSTOM DESIGNED SEWAGE TREATMENT PLANTS

New building PCB regulations have placed greater importance than ever before on the need to install correctly sized and properly designed s sewage treatment plant.

Choosing the right sewage treatment plant design And disposal method for your project is essential to ensure value for money, effective long term performance, protection of public health and the environment and compliance with relevant legislation. Most builders realise that building a sewage treatment plant is often time consuming and involves multiple agencies including consultants, vendors, architects and regulatory agency. You are confused about which technology to chose and what equipment to use.
