

TURBIDITY, CLEARER WATER CAN BE YOURS

GREENWAY

SANDMAX

As water makes its way to your home, especially from a borewell and municipality, it can pick up contaminants along the way, including sediment and dirt that can affect the look and taste of your water. If your water is cloudy or has visible particles floating in it, the SandMAX water treatment system is your answer. This specialized and proven system effectively reduces or removes troublesome sediment, dirt or sand that can compromise your water quality.

SANDMAX

NATURAL FILTRATION. NATURALLY CLEAR WATER.

It starts with the environmentally safe Sandmax.

Clarify Naturally

Better water quality begins with the Sandmax unique natural sand. With its angular shape and rough surface, dirt, silt and organic matter are naturally filtered without chemicals, resulting in a safe, environmentally friendly way to clear up your water.

Higher Flow Rates. Higher Capacity. More Savings.

Higher flow rate capabilities mean less room needed for equipment and a more efficient filtration process. And with higher filtration capacity, you have longer filter runs. It all adds up to savings in equipment costs, installation space, backwash water maintenance and time out of service.

Go Sandmax and Do Away With Replacing Filters

Sandmax bed filtration means the utmost in superior water quality. The unique naturally removes matter turbidity in a way that sandmax filters, simplifying and streamlining the water treatment process.

User Friendly

Simple, automatic backwash operation keeps the sand bed filter media clean, making the Sandmax system always ready to remove contaminants for a virtually maintenance-free system.

System Features

Manufactured with durable, commercial-grade, corrosion-resistant components, the Sandmax includes a strong product warranty.

The media is third-party certified to NSF ensuring the product complies with strict manufacturing standards. The components are also certified to NSF.

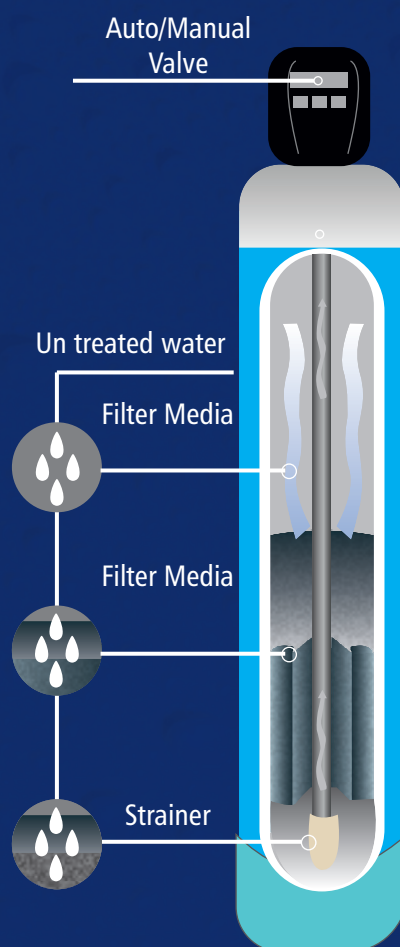

System Specification

Model*	FLOW m ³ / hr	Model*	FLOW m ³ / hr
SANDMAX01	1.0	SANDMAX05	5
SANDMAX02	1.5	SANDMAX06	6
SANDMAX03	2.0	SANDMAX07	7.5
SANDMAX04	3.5	SANDMAX10	10

pH	5.0 – 10.0
Temperature	Min. 40°F - Max. 110°F

HOW IT WORK

- 1 Untreated water Carrying dirt, sediment and silt flows into the tank and through the Sandmax filter media.
- 2 With its rough surface and micro porous void spaces, the media captures dirt sediment and organic matter down up to 10 micron in size
- 3 Clean, clear water enter your home - providing better water quality for you and your family
- 4 SandMAX automatically or manual backwashes filter media to remove sediment, dirt and organic material and send it down the drain. The system is then ready to continue removing contaminants again and again .
