InsideOut[®] Underdeck Protection

What is Inside Out?

A specially designed and pre-engineered ceiling system that transforms the unsightliness of the underside of your deck into a desirable outdoor living space.

Finish: Dark Mahogany

Before

Add Living Space

Besides creating additional living space, Inside Out® can make the inside of your home feel and look better—engineered for performance, designed to wow the neighbors!

Finish: Medium Teak

Before/ After

"Inside Out® brightened the rooms inside our home while covering the exposed nails, dirty rafters, and outright dreariness of the underside of our deck". —Annette Sejat

Finish: White

Before

Is it just for Homes?

Inside Out® can be used to create an outdoor living area residentially, in multifamily settings, and commercially—engineered for performance, designed to wow your guests, no matter who they are.

Finish: Light Cherry

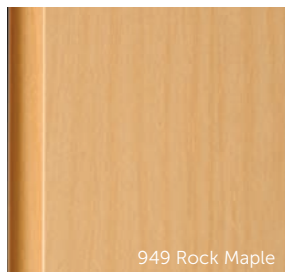

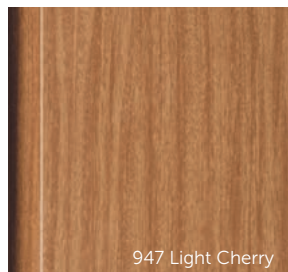

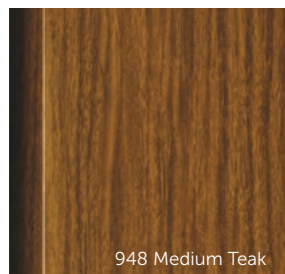

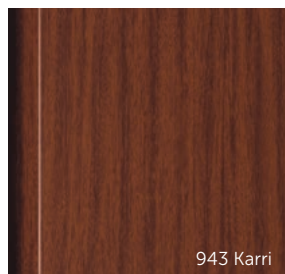

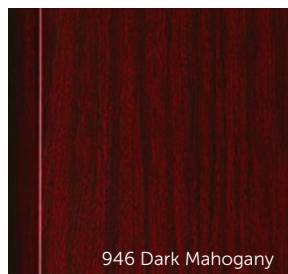

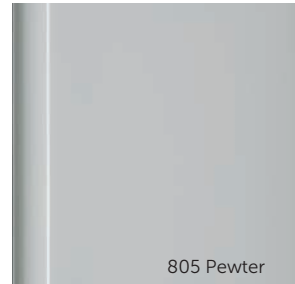

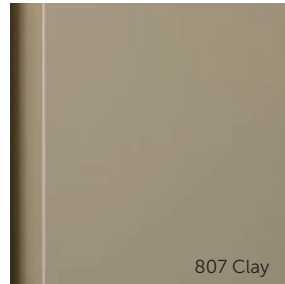

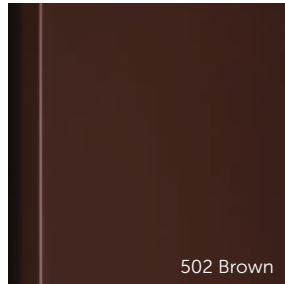

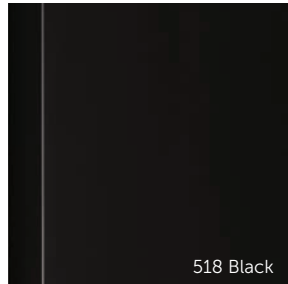

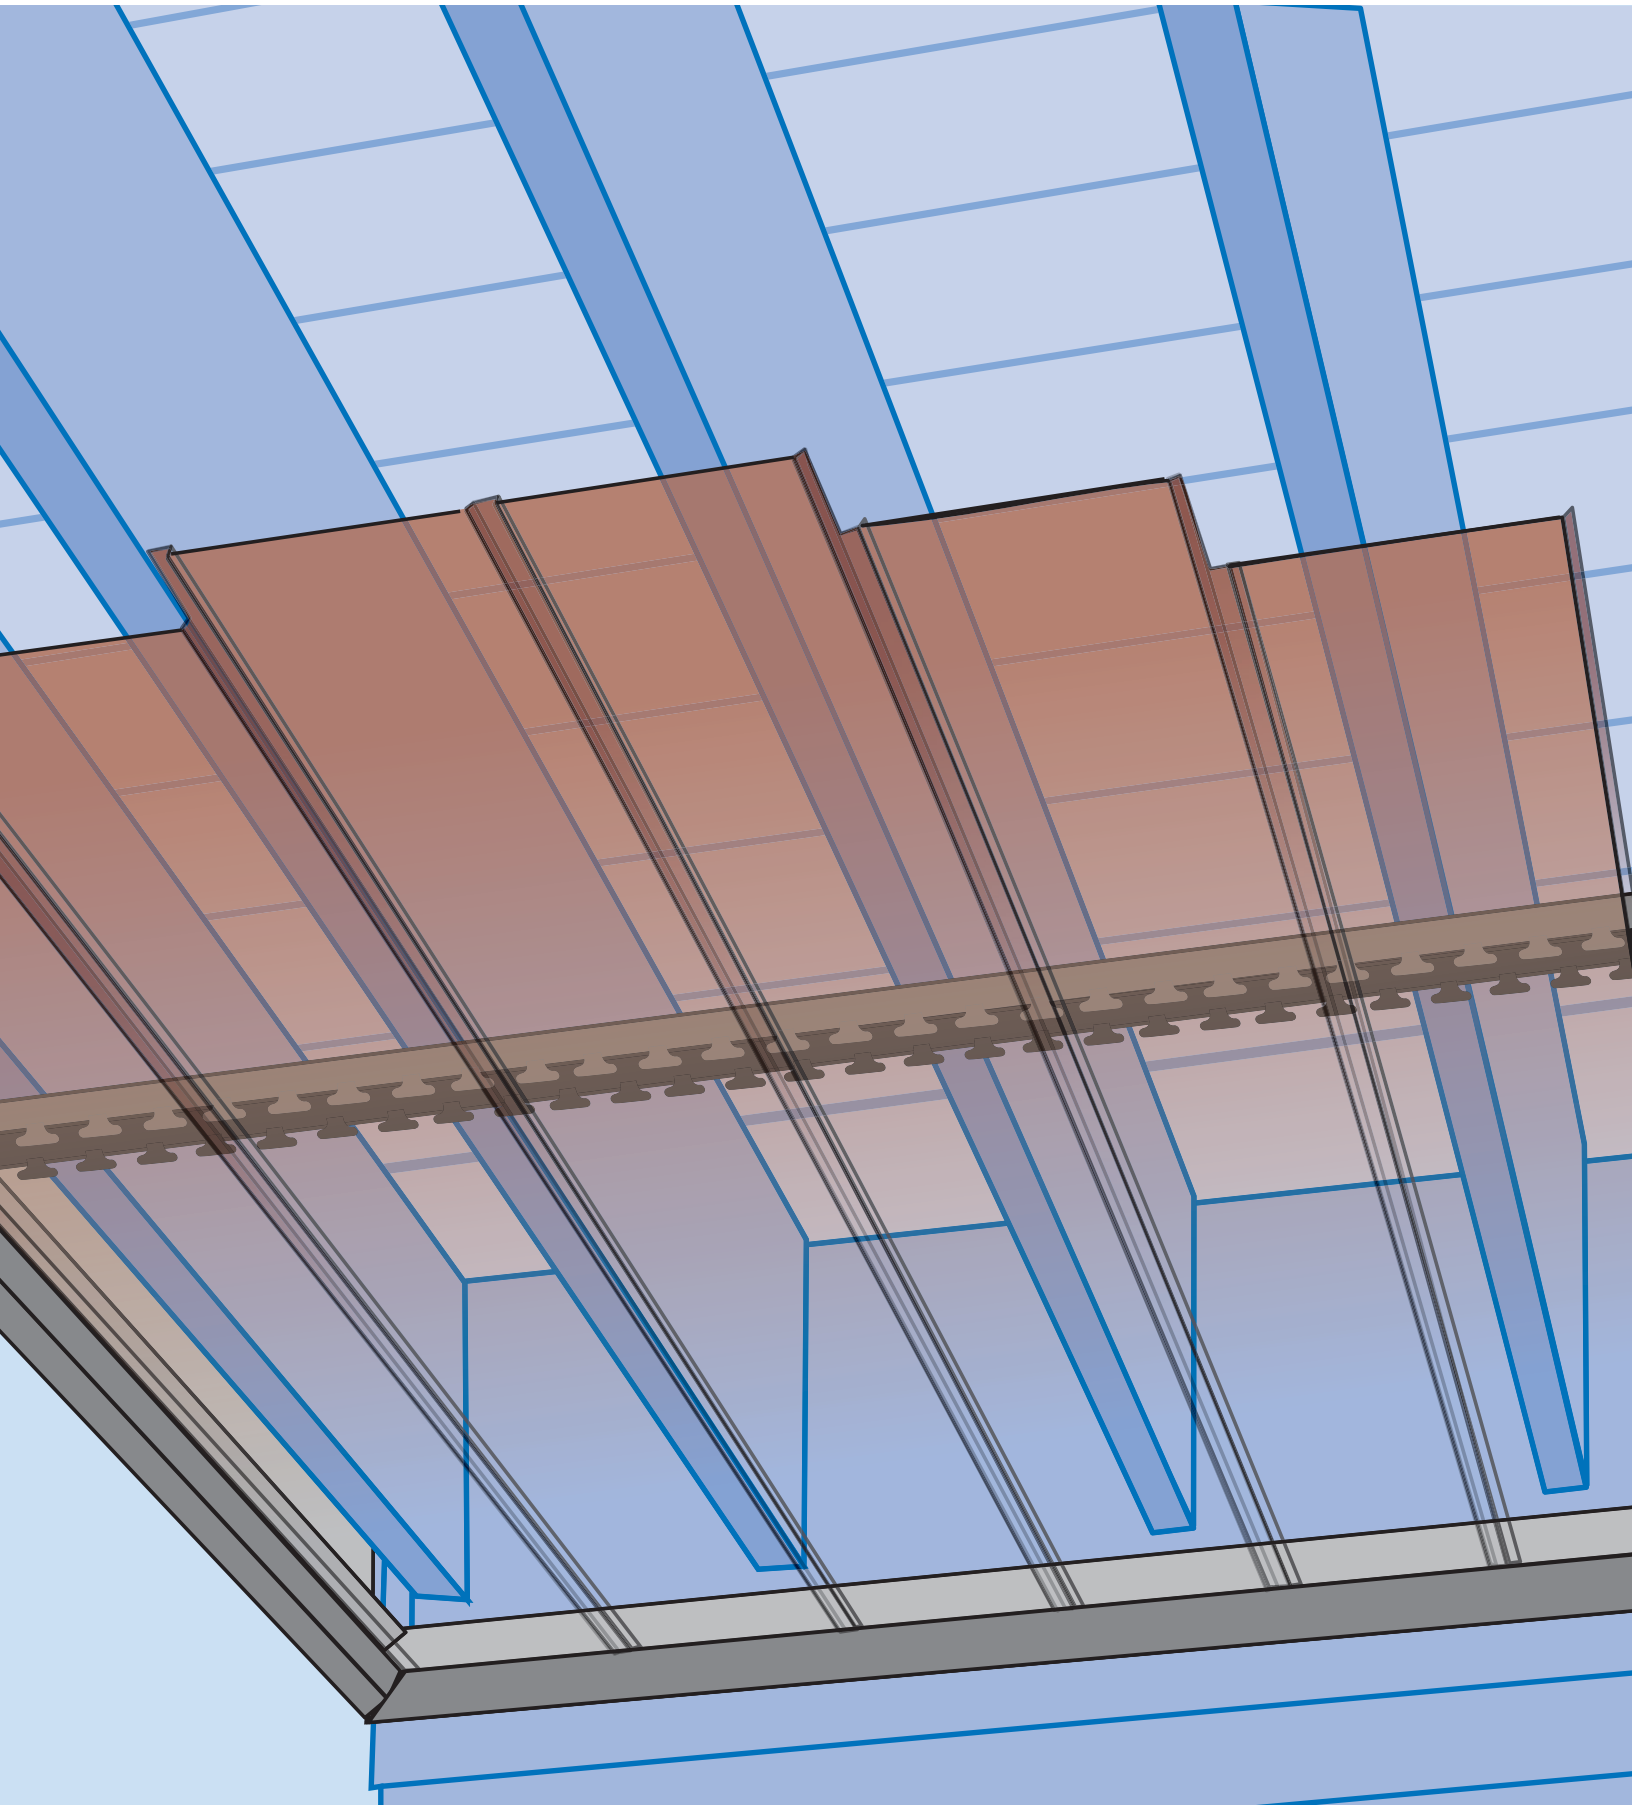

Color

With woodgrain and solid color finishes, you'll be able to create an outdoor living space that reflects and expresses your personality.

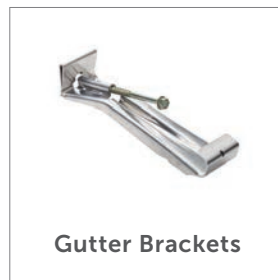

Our color palette includes five distinctive painted wood finishes chosen for their unique species, grain and color; and seven rich matte finishes chosen for their visual temperatures and rich hues.

Components

It's a simple system! Water carrying panels are hung from a specially designed bracket that holds the panels in place even in the harshest climates.
