## ▶ ABOUT US:

BAZ Lubricants is ISO 9001 and ISO 14001 certified plant for production of high quality lubricants – Automotive and Industrial – to suit the customer requirements and expectations. BAZ lubricants is set to lead the way with excellence and innovation through research and development in our products.

Operating from UAE and having sound production capacity, BAZ lubricants is one of the best choices for lube buyers globally. BAZ lubricants also has the expertise to produce a range of specialties and niche market products using own and customer specified formulations. BAZ lubricants is also set to offer a competitive service to major brands and independent marketing companies worldwide.

BAZ lubricant products are packed in all sizes ranging from small retail packs, drums, flexi tanks to full container size flexi bags, either in BAZ brand or customer' private labels.

The strength of BAZ lubricants is its dedicated team, financial stability, product inventory, latest machineries. BAZ lubricants takes pride in blending and delivering products in scheduled time without compromising the quality.

LUBRICANTS

A B O U T U S

## ▶ GASOLINE/ ENGINE OIL

Monograde : SAE:30, SAE 40, SAE:50, SAE 70.

Multigrade : 5W30, 5W40, 10W30, 10W40, 15W40, 20W40, 20W50

API : SN/CF, SM/CF, SJ/CF, /SG/CF, SF/CD, SL/CF.

BAZ LUBRICANTS monograde and multi grade gasoline/ petrol engine oils are produced from high quality virgin base oil with European additives and it meets API standard. It is specially produced for all kind of passenger cars, van, light trucks, heavy trucks of gasoline and diesel engine. It assures excellent engine protection in severe weather conditions, longer drain interval, Low oil consumption and oxidation stability and it protects engine completely against wear, rust corrosion, heat stress and engine deposits.

## ▶ DIESEL ENGINE OIL

Monograde : SAE:30, SAE 40, SAE:50, SAE 70.

Multigrade : 5W30, 5W40, 10W30, 10W40, 15W40, 20W40, 20W50

API : CC/SF,CD/SF,CH-4/SL,CF/SF, CG-4/SL ,CJ-4/SL CI-4/SL /CK-4/SL

BAZ LUBRICANTS Heavy-Duty Diesel Engine Oils (DEO) and Commercial Vehicle Lubricants represent the group of lubricants designed especially for trucks, commercial vehicles including buses and agricultural machineries and heavy- industry machinery, such as that Used in mining. Diesel Engine Oils are formulated to meet and exceed the performance requirements of many of today's an highway and off-highway engines. It provides superior smooth handling and acid neutralization capabilities, making it suitable for modern diesel engines. Lubricating the interior of a heavy-duty engine properly requires more than just the creation of a protective oil film, as this is very important to reduce operating and maintenance costs. Heavy-duty diesel engine oils deliver fuel savings, offer protection for longer equipment life, improved efficiency through synthetic oil technology, and extended ODI ( Oil Drain Intervals.). Lubricants protect driveline components against wear, acids and deposits. The range of Heavy-Duty Engine Oils Offered by Baz DEO lets you choose the oil that is best suited for your engine, reducing maintenance costs and engine wear and prolonging service life.

## ▶ AUTOMOTIVE GEAR OILS

SAE 90, 140 , 75W90, 75W140, 80W90, 85W140  
API : GL-1, GL-2, GL-3, GL-4, GL-5

BAZ LUBRICANTS Gear oils are used specifically for automotive manual transmissions for cars, trucks and different types of machinery. It has high viscosity for better performance and protection of gears. The high viscosity ensures the transfer of lubricant through the gear train, which is essential since devices needing this heavy oil do not have pumps for transferring the oil with only a part of the lowermost gears bathed in an oil sump. Differentials and hypoid gear oils contain extreme pressure (EP) additives and anti-wear additives to cope with the sliding action of hypoid gear bevel gears. Fully synthetic gear oils are also used in many vehicles, and have a greater resistance to shear breakdown when compared to mineral oils. Synthetic gear lubricants reduce energy consumption due to a low friction coefficient.

## ▶ AUTOMATIC TRANSMISSION FLUID (ATF)

TYPE A, DEXRON II ,DEXRON III, DEXRON IV

BAZ LUBRICANTS superior quality automatic transmissions fluid (ATF) are formulated with high viscosity index base oil and selective additive package to obtain anti-wear, anti oxidant, anti-foam properties and low temperature fluidity. It provides excellent protection against wear and its frictional properties gives consistent and smooth shift under a wide range of driving condition. It is specially engineered for passenger cars, light trucks and commercial vehicles automatic transmission and off high way equipments and industrial application.

LUBRICANTS

## ▶ BRAKE FLUID

DOT3 , DOT 4

BAZ LUBRICANTS brake fluids are blended from glycol -ether (DOT 3, 4 ). Brake fluids are hygroscopic (water absorbing), which means they absorb moisture from the atmosphere under normal humidity levels. It is formulated to contain oxidation and corrosion inhibitors to enhance its chemical stability and recommended to use in automotive drum and disc brake fluid system. It provides safety against brake fade where abnormal high system temperatures are generated by heavy duty vehicle operation.

## ▶ HYDRAULIC OILS

ISO 22,32,46,68,100,150

BAZ LUBRICANTS Hydraulic oils consist of large group of mineral oil, water or water-based fluids used as the medium in hydraulic parts of machine equipment. These hydraulic fluids have a wide range of applications in hydraulic machinery, power steering, braking and transmission systems for dumper trucks, excavators and industrial shredders etc. They have to operate under thousands of tons of pressure while ensuring high performance. Biodegradable Hydraulic Oils- Hydraulic fluid based on biodegradable synthetic esters are also available.

## ▶ OUTBOARD ENGINE OIL

TC -W3, SAE 30, 20W50, 10W40

BAZ LUBRICANTS outboard engine oil is ashless lubricating oil formulated to meet the critical requirements of high performance, water cooled, two strokes Outboard engines. It is formulated to minimize deposit formulation , prevent rusting and control wear.

## ▶ MARINE ENGINE OIL

20W50, 10W40, 15W40, SAE 50, SAE 40

BAZ LUBRICANTS marine engine oils are formulated with high quality base oils in conjunction with the latest additives technology to deliver a high load carrying capacity, excellent oxidation and high level of alkalinity retention. It assures a high level of detergency, dispersancy and alkalinity due to high its high TBN and sulphate ash content. It is highly recommended for marine and industrial diesel engines including Turbo charged models operating in all type of condition.

LUBRICANTS

# ▶ PRODUCT RANGE

## PETROL ENGINE OIL

- **MONO GRADE**
  - SAE- 10W, 30, 40, 50, 60
  - API-SC, SE, SF, SG, SJ
- **MULTI GRADES**
  - SAE- 10W/30, 10W/40, 20W/50, 25W/60
  - API- SF,SG,SJ,SM,SN
- **SYNTHETIC GRADES**
  - SAE- 0W/30, 0W/40, 5W/30, 5W/40, 10W/30, 10W/40, 15W/40, 20W/50, 25W/60
  - API- SM, SN

## HYDRAULIC OIL

- **HYDRAULIC**
  - AW 15, 22, 32, 46, 68, 100, 150
- **INDUSTRIAL**
  - VG/ISO- 220, 320, 460
- **COMPRESSOR OIL**
  - 15, 22, 32, 46, 68, 100, 150
- **CIRCULATION OIL**
  - 15, 22, 32, 46, 68, 100, 150

## GREASES

- LITHIUM BASE GREASE- MP2, MP3
- LITHIUM BASE GREASE- EP2 AND EP3
- LITHIUM COMPLEX GREASE
- SODIUM GREASE (WHEEL BEARING GREASE)
- CALCIUM GREASE - MP2 AND MI
- MOLY GREASE
- BENTONITE GREASE
- GRAPHITE GREASE
- LONG LIFE GREASE

## DIESEL ENGINE OIL (DEO)

- **MONOGRADE**
  - SAE- 10W, 30, 40, 50, 60
  - API- CC, CE, CF
- **MULTIGRADE**
  - SAE- 15W/40, 20W/50
  - API- CF4/SG, CH4/SJ, C14/SL

## TRANSMISSION FLUID

- ATF TYPE "A"
- DEX- II
- DEX- II D
- DEX- III
- DEX- III D
- DEX- IV

## INDUSTRIAL LUBRICANTS

- **HYDRAULIC**
  - 100, 150, 220, 320, 460
- **GEAR**
  - 100, 150, 220, 320, 460
- SLIDEWAY
- SHUTTERING
- ROLLING

## RADIATOR COOLANT

- ANTI FREEZE
- 20%
- 30%
- 40%
- 60%
- 100%

## GEAR OIL

- API- GL- 1/3, GL-4, GL-5
- SAE 90, 140, 85w/90, 85w/140
- VG/ISO - 320, 480
- LSD- 80w/90

## MARINE OIL

- SYSTEM OIL
- SAE- 30, 40
- CROSS HEAD
- SAE-30, 40, 50
- CYLINDER OIL
- SAE- 50
- ROPE COAT

## BRAKE OIL

- DOT- 3
- DOT- 4

## BIO-DEGRADABLE

- HYDRAULIC
- REGRIGATION COMPRESSOR
- AIR CIRCULATION
- SYSTEM OIL

## SPECIALITY OIL

- RUBBER PROCESSING
- QUINCHING OIL
- ROCK DRILL
- SPRAY OIL
- CUTTING OIL (WATER SOLUBLE)
- NEAT CUT F
- NEAT CUT NF
