...ARE YOU CRAZY ENOUGH?

# Crazy Coolers

Crazy Coolers are so unique in the marketplace that they demand attention. They are the combination of fun and practicality (it is actually a cooler), and maybe a little crazy. With quality inspired construction, you get a product that will exceed all of your wildest expectations. Everyone goes crazy watching but when they ride one its all over.

## Origin Story

I was first exposed to these Coolers years ago when entertaining customers. So I purchased two coolers and raced them with a dozen customers to create an event and memories. We raced on stairs, sidewalks, trails, roads with only minor injuries as it was full contact racing, naturally. Upon returning home I began a Dealership. Over the past five years it grew, and now I am the manufacture and owner of this business. The Crazy Coolers are affordable, small, portable, and provide such a great experience that everyone is amazed.
