ThermaZone Products

ThermaZone® Motion Advantage™ pads are engineered to conform to specific pain points by combining soft, stretchable neoprene with flexible, welded microchannels. Leveraging thermoelectric technology, the ThermaZone device heats or cools a small amount of distilled water to the desired temperature and continuously circulates it through the microchannels, maintaining that temperature until the device is powered off.

Neoprene (Reusable) Pads

003-15
Sm. Shoulder Pad
003-20
Lg. Shoulder Pad
