ThermaZone Device 003-99

Every device ships with:

- Medical grade power supply
- Blue tubing
- Distilled water
- Training guide

ThermaZone® is the iceless, thermal therapy, pain management device by Innovative Medical Equipment. Leveraging thermoelectric technology, ThermaZone circulates two ounces of distilled water through a closed-loop system, delivering and maintaining precise temperatures. ThermaZone's Motion Advantage™ pads are engineered to conform to specific anatomical pain points by combining soft, stretchable neoprene with flexible, welded microchannels. Safe, convenient and easy to operate, ThermaZone thermal therapy offers 20 selectable, consistent comfort levels ranging from 34°F to 125°F, plus five preset timer modes - three of which include automatic shutoff.

No Ice Needed

2 oz. of Distilled Water
