TYPES OF PAIN REPORTED**

** Some patients reported multiple types of pain.

* 784 of the 1,759 patients indicated they were taking opioids.

It's so much better than a heating pad or an ice pack as you can dial up or down the heat or cold as needed when you are using it and it's so easy to use. I have chronic pain and this device has been a life changing addition to my arsenal of therapy tools. The more I can manage my pain at home the better quality of life I have.

~April Pierce, USAF

ThermaZone Products

ThermaZone® Motion Advantage™ pads are engineered to conform to specific pain points by combining soft, stretchable neoprene with flexible, welded microchannels. Leveraging thermoelectric technology, the ThermaZone device heats or cools a small amount of distilled water to the desired temperature and continuously circulates it through the microchannels, maintaining that temperature until the device is powered off.
