POST-OPERATIVE INSTRUCTIONS FOR THE PATIENT

Patient compliance with the following instructions is imperative to successful postoperative care.

- Upon arrival home, lie down and ELEVATE THE FOOT that was operated on higher then the level of your heart. (This is very important)
- Keep bandages dry and clean.
- 3. Do not be alarmed if there is some slight bleeding onto the bandage.
- Apply ice to the ankle of the foot that was operated on 10 minutes every hour for 72 hours.
- 5. Use medications as directed by the doctor.
- 6. Remain off your feet as much as possible for the first 72 hours.
- Call the doctor by telephone if there is pain or the bleeding onto the bandage does not stop.
