

Espin Medical – Credentialing & Compliance Standards

At Espin Medical, safety, compliance, and professionalism are built into every project. Whether supporting an OEM upgrade or working directly with a hospital, our credentialed teams ensure projects stay on schedule and patient care environments remain protected.

Experience & Communication

- Technicians must have prior experience on multiple successful de-installations before leading independent work.
- Each project is led by a team leader fluent in English to coordinate clearly with hospital staff, safety officers, and OEM project managers.

Subcontractor Model & Oversight

- Espin Medical operates through a vetted network of specialized subcontractors to deliver nationwide coverage and rapid response across all imaging modalities.
- All subcontractors meet Espin's credentialing standards, including insurance coverage, safety alignment, and compliance with hospital protocols.
- Each project is coordinated and overseen by Espin project management, providing hospitals and OEM partners with a dedicated single point of accountability.

Technical Expertise & Safety

- Teams coordinate with hospital safety officers to ensure proper shutdown and lockout/tagout (LOTO) procedures.
- Crews have proven experience with CT, MRI, X-ray, and other imaging system removals.
- All rigging and heavy lifts requiring specialized equipment are performed by specialized rigging partners engaged by Espin Medical.
- Crews follow site-specific hospital safety requirements, with continuous focus on minimizing risk and disruption.

Insurance & Documentation

- All subcontractors must carry liability insurance with minimum coverage of \$1M per occurrence / \$2M aggregate.
- Certificates of Insurance (COI) are issued for each project, with the facility listed as additional insured when required.
- Certificates of Equipment Destruction can be provided upon request.

HIPAA & Data Security

- Facilities typically manage removal of patient data under their own compliance programs.
- When requested, Espin coordinates secure removal or destruction of media through qualified teams or vendors.
- Certificates of Destruction are available upon request to support HIPAA-compliant handling.
