Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Level: Advanced

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

FRENCH SILK**Crust**

- 3/4 cup walnuts, toasted
 1 cup pecans, toasted
 1/2 cup firmly packed brown sugar
 4 ounces (8 tablespoons) unsalted butter, melted

- 3/4 cup granulated sugar
 6 large eggs (use pasteurized eggs if you are concerned about eating uncooked eggs)
 1/4 cup heavy whipping cream
 1/2 teaspoon vanilla extract

Filling

- 11/4 pounds bittersweet chocolate, chopped
 6 ounces (12 tablespoons) unsalted butter, at room temperature

Topping

- 1 cup heavy whipping cream
 2 tablespoons granulated sugar

1. To make the crust: In a food processor, combine the walnuts, pecans, brown sugar, and cinnamon and pulse until the nuts are coarsely chopped. Pour the nuts into a bowl, add the butter, and stir until the nuts are evenly moistened. Press the nut mixture evenly onto the bottom of a 9-inch round springform pan. Refrigerate for 30 minutes.
2. To make the filling: Melt the chocolate in a double boiler. While the chocolate is melting, combine the butter and sugar in the bowl of a stand mixer fitted with the paddle attachment and add the eggs two at a time, mixing well after each addition. Scrape down the sides of the bowl, increase the speed to medium-high, and whip until well blended, about 2 minutes. The mixture will look curdled.
3. Remove the melted chocolate from the heat and stir until smooth and warm but not hot. With the mixer on low speed, add the chocolate to the egg mixture. Scrape the sides and along the bottom of the bowl and then continue to mix on low speed until the chocolate is fully incorporated. Add the cream and vanilla and mix until blended. Spread the filling over the crust. Refrigerate until firm, about 3 hours.
4. To make the topping: In a bowl, whisk together the cream and sugar until soft peaks form. Cover and refrigerate until serving.
5. Using a spatula, spread the topping over the top of the cake. Run a hot, dry knife around the inside edge of the pan to loosen the cake, then remove the pan sides and set the cake on a serving platter. Slice the cake with a hot, dry knife and serve chilled.

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

ANSWER:

CHAPTER 36

We picked George up in my car. When I parked, I tried to have the headlights turned toward the big tree and the wells, so we could see as much as possible. But when we got to the wells, they were gone. Now how could six big holes in the ground have been covered up? But sure enough, no wells. We just couldn't believe this. We had all played in those wells for years. George looked around and said, what are we going to do now? Of course, I knew there was another way, but neither my brother nor George did. They both turned to me for an answer. I have another idea, I said. Follow me. So back to the car we went and headed for the creek. When I pulled over by the bridge, I'm sure they thought I was crazy, but when I got out and started walking, they followed right behind me. When we got to the small opening in the creek bank, I guess they figured it out for themselves. Now how long have you known about this; George asks me? Since I was about 10 years old, I said. My brother pipes in. Where does

this cave go, he asks? I have only been to the cave once this way, I said, but with the wells closed, we will have to try. As soon as I crawled in the opening, I knew something was wrong. It had caved in only a few feet inside. The other two were still outside when I crawled back out. Its closed too, I told them. Now what, George and my brother said at almost the exact same time. Well, I got one more idea. If, I can remember where it is. There was a huge door that I went through one time. Let me think on this a minute. Then I said let's get back to my car. The only time I had ever been to this door, Larry's dad had taken us. We went through some woods. Now to find those woods. It was getting late, and George was getting a little tired I think, because he started asking more and more questions about where we were going and what would we do when we get there anyway. I was even beginning to think the same thing. What would we do if we do get there? It didn't take long, and I could tell that I would not find the right woods. I slowly turned the car around and headed back toward George's. Then my brother points and

yells that there is a helicopter flying low over there. What do we have to lose, we all said? So off toward the helicopter we go. That helicopter was going way too fast for us to stay up with, but it gave us a direction to go anyway. There was only one road that went the way the helicopter did, so I turned down that road. I can't say that anything looked familiar. It was a long time ago when I was headed to this door. But sure enough as we hit the dead end, I recognized the path that lead to the door. I pointed the head lights down the path. We could all see that it was a path, and all jumped out at the same time. Down the path we go, flashlights in hand. But then nothing was familiar, nothing. Not one big rock, at least big enough to cover a door. I was beginning to think I was wrong again when a helicopter flew right over us and the mountain. Then I was sure that this must be it. But where was I going to find the door? Where was a rock that big? Not here.
