## Notes:

<sup>&</sup>lt;sup>1</sup> The sum of acidic and neutral values does not equal total potential content of a compound. To account for incomplete conversion of acidic to neutral compounds, the acidic value is reduced by a standard formula i.e., (THC-acid x 0.88) + delta9-THC = Total Potential THC

<sup>\*</sup> None Reported (NR) because the compound exists at or below the limit of quantitation but above the limit of detection.

<sup>\*</sup> None Detected (ND) because the compound exists at or below the limit of detection.

<sup>\*</sup> Potency (SOP 020)

<sup>\*</sup> Sample Condition deemed acceptable upon receipt by PhytaTech. Sampling done by outside party.

<sup>\*</sup> Units of % are (mass/mass) and reflect numbers as a fraction of 100.

Report Date: 11/01/2019

## MICROBIAL CONTAMINATION \*

STEC Salmonella

Total Yeast & Molds 5200 cfu/g

ND

ND

## Notes:

\* None Detected (ND) because the compound was not detected.

- \* Microbial Contamination (SOPs 029, 030, 039)
- \* Sample Condition deemed acceptable upon receipt by PhytaTech. Sampling done by outside party.
- \* E. coli & Salmonella measured using qPCR. Total Yeast & Mold (TYMC) is a plating technique. The regulatory limit for TYMC is 10,000 cfu/g or 10<sup>4</sup>. CFU/g = colony forming unit per gram.

## Notes:

 $<sup>^{\</sup>ast}$  None Reported (NR) because the compound exists at or below the detection limit of the method.

<sup>\*</sup> None Detected (ND) because the compound was not detected.
