

A New Online Resource *for parents of children with a* **Congenital Hand Difference (CHD)**

Congenital hand differences occur when a child is born with arms and or hands that look a little different than expected. Children with a CHD will do all of the things they want to do and need to do. This website is here to help!

Visit:

shrinerschildrens.org/handdifferences

Topics featured include:

- Parent Experience
- Child Experience
- Personal Experiences
- School Resources
- Additional Resources
- Pediatric Hand Team

Working in partnership with Michelle James, M.D., chief of orthopaedics, Sarah Tuberty developed the new web page as a capstone project for her Doctorate of Occupational Therapy. Born with Congenital Hand Difference (CHD), Sarah was referred to Shriners Hospital for care at a very young age and is a former patient of Dr. James who helped her develop this website.
