

## RightPath Testimonials

“During a screening a 7 1/2 cm aortic aneurysm was found. The surgeon credited the detection and subsequent surgery with saving my life. Get checked. Don't be caught by surprise by afflictions that can rob you of the quality of life you take for granted.”

**Bob C. Glendale, AZ**

Winter 2019 in Tucson, I had the ultrasound package done. The ABI index examination indicated an abnormal result in my left leg. A full ultrasound of that leg by a vascular nurse indicated a full blockage of the artery from my groin to my left knee. In May of 2020, deployment of three stents was done with complete success to open the artery and restore full function. Thank you for the program!

**Bobby, Tucson, AZ**

“When the RightPath technologist scanned my left kidney, it was found to be full of stones and infection. (I had been having strange sensations up and down my left side and after several visits to the doctor, the problem had not been found.) I was immediately scheduled for surgery to remove my left kidney. I am fully recovered now and blessed to be alive.”

**Connie, Arizona**

“RightPath called my attention to the fact that one of my kidneys was smaller than the other one. The cardiologist took a look at it and discovered that I had an artery feeding into that kidney that was pretty well blocked, so he did angioplasty and put a stent in that artery. It was something that wasn't bothering me, but I didn't want to lose a kidney.

They also found gallstones, so I altered my diet and that eliminated the pain I'd been having in my chest and shoulder. The pain that I was interpreting as heart pain turned out to be gallbladder irritation. I am a lot more comfortable now.”

Screening services at RightPath Health Screenings. On My abdominal ultrasound screening it was found that my left kidney was filled with stones and dead. It was a miracle because I was having strange sensations up and down my left side and after visits to the doctor that did not find this problem. I was immediately scheduled for surgery to remove my left kidney. It has been a year and I'm fully recovered and blessed to be alive.

I'm rescheduling an abdominal ultrasound screening to check on the health of my right kidney. I truly recommend having this screening to better your health.

***Connie, Colorado***

I made an appointment with RightPath Health Screenings "just in case." I didn't think I had anything to worry about, but wanted assurance from the "pros" that I'm in good shape.

My screening uncovered several "negatives", the worst of which was a very large aneurysm in the abdominal aorta. A very professional technician impressed me with the importance of taking immediate action. We immediately went to the hospital and surgery was scheduled, performed successfully and I was home in a few days. I will be forever grateful.

***Jim S., Arizona***

I had an appointment for my annual physical and brought a schedule of various screenings being offered by RightPath Health Screenings. My doctor advised me on which screenings would be appropriate for me.

My liver scan showed a mass. I could hardly believe it and my doctor had a liver biopsy performed revealing cancerous nodules at that site stemming from the colon. Treatment was performed and needless to say, I am grateful that this malignancy was discovered before it was too late. I am certainly in debt to my doctors and RightPath health screenings. This very positive experience may very well have been a lifesaver!
