TRIATHLON SEAT PADS

Each and every Santini seat pad is designed and engineered by our expert team and are the result of extensive studies and testing with our pro athletes to guarantee unrivaled fit and maximum protection over short, medium and long distances.

Find out more on our Seat-pads on www.santinicycling.com/seatpads

IMG is a triathlon specific chamois ideal for long distance races. IMG weights only 52 grams and features the new innovative patented Tower Gel core by Nicolini which is 40% lighter, doesn't absorb water and is 60% more flexible than the gel core of our cycling bib-shorts. The structure of this gel is made of small "towers" which are bigger in the ischiatic area and diminish in size towards the edges of the seat pad, offering a high level of shock absorption for up to 7 hours in the saddle. The "tower structure" also enhances the breathability of the padding by 45%, and, thanks to its flexibility it adapts perfectly to the body throughout the swim and the run.

RIDE DURATION

1h 2h 3h 4h 5h 6h 7h 8h

SECTION VIEW

STG is a triathlon specific chamois ideal for short distance races. STG weights only 31 grams and features the new innovative Tower gel core by Nicolini which is 40% lighter, doesn't absorb water and is 60% more flexible than the gel core of our cycling bib-shorts. The structure of this gel is made of small "towers" which are bigger in the ischiatic area and diminish in size towards the edges of the seat pad, offering a high level of shock absorption for up to 3 hours in the saddle. The "tower structure" also enhances the breathability of the padding by 45%, and, thanks to its flexibility it adapts perfectly to the body throughout the swim and the run.

RIDE DURATION

1h 2h 3h 4h 5h 6h 7h 8h

SECTION VIEW

GTR is the Santini chamois designed to cope with the unique demands of triathlons, wear wet clothing is worn for cycling. Made of a thin layer of silicone gel with strong anti-shock properties, it weighs less than 42g and doesn't absorb water - so it doesn't grow in dimension or weight during the swim. Placed in contact with the skin is an antibacterial and anti-irritation microfibre layer that ensures maximum comfort on the saddle.

RIDE DURATION

1h 2h 3h 4h 5h 6h 7h 8h
