

**These visual clues can help you identify distracted drivers, allowing you to increase your own awareness and safety on the road:**

1. ***Race Car Driver***: Arguably the most dangerous in my opinion as he/she just comes out of seemingly nowhere.
2. ***Animated***: Wild hand gestures like a band leader.
3. ***Lane Wandering***: Drifting in and out of lanes without signaling, or crossing lane markings.
4. ***Erratic Speed***: Inconsistent speed, such as sudden acceleration or deceleration without apparent reason.
5. ***Delayed Reactions***: Slow responses to traffic signals, stop signs, or other changing traffic conditions.
6. ***Frequent Braking***: Unnecessary or unpredictable braking, indicating inconsistent attention.
7. ***Vehicle Weaving***: Swaying within the lane or swerving between lanes, suggesting lack of control.
8. ***Ignoring Traffic Signals***: Failing to notice or react to red lights, stop signs, or pedestrian crossings.
9. ***Tailgating***: Following too closely because the driver is not maintaining proper attention on the road ahead.
10. ***Inconsistent Signaling***: Not using turn signals, or using them incorrectly (e.g., signaling left when turning right).
11. ***Not Keeping Up with Traffic Flow***: Driving significantly slower or faster than the flow of traffic.
12. ***Wide Turns***: Making unusually wide or sharp turns that require oversteering to correct.
13. ***Sudden Lane Changes***: Changing lanes unexpectedly or without signaling.
14. ***Straddling Two Lanes***: Driving in the middle of two lanes, without committing to one lane.
15. ***Running Off the Road***: Occasionally driving on the shoulder or outside the road boundaries.
16. ***Failure to Yield***: Not yielding when required, such as at yield signs or when merging onto highways.
