## ABOUT Kinder MODERN

Kinder MODERN is a design gallery and studio situated in New York. It was founded by design entrepreneur Lora Appleton in 2013. It is the only gallery worldwide specializing in vintage child design of the 20th century and inventive, contemporary design objects, furniture and accessories.

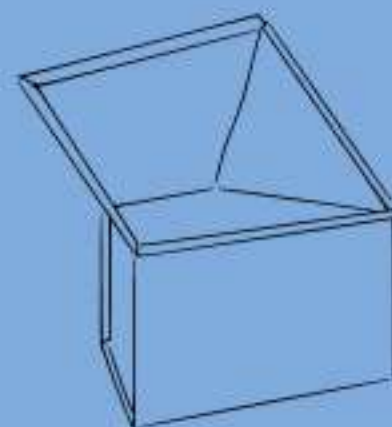

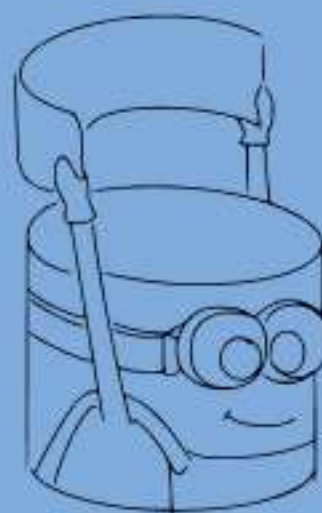

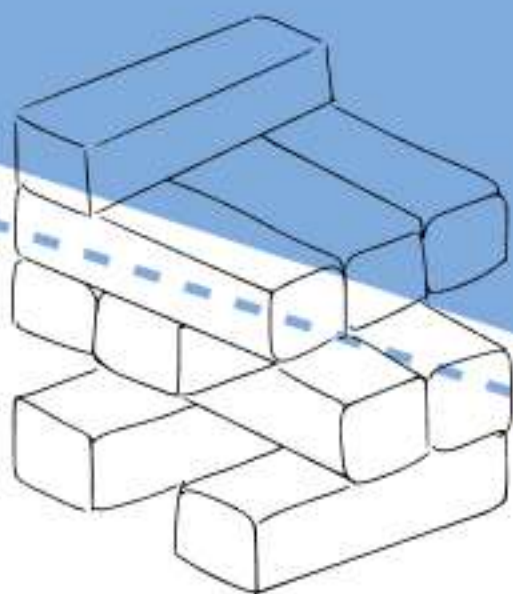

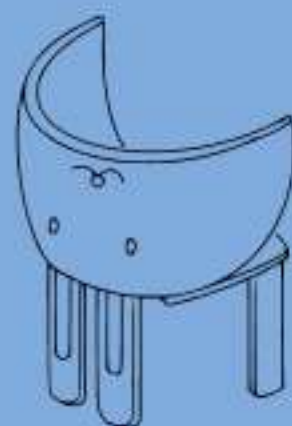

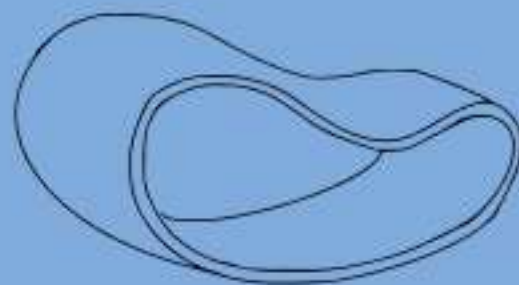

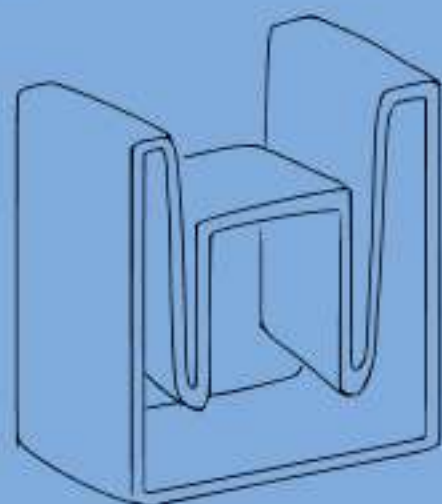

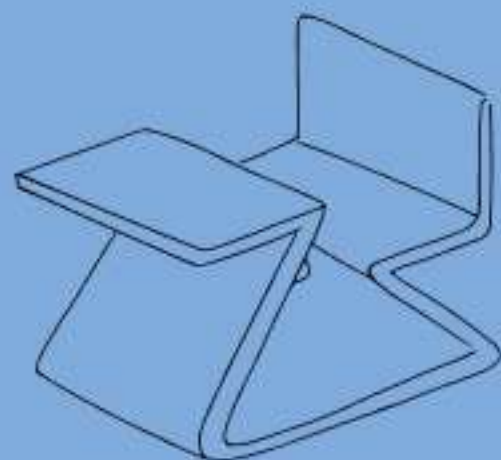

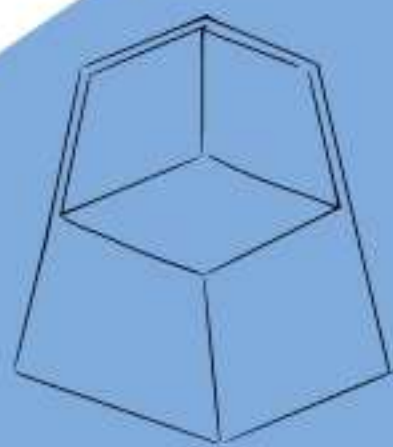

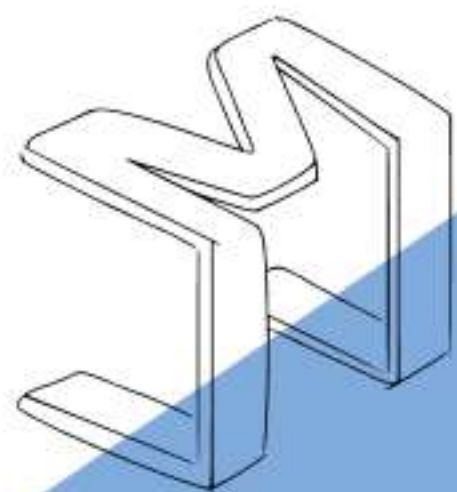

It focuses on contemporary and vintage designs. It is the leading luxury children's furniture and rugs design company. The brand designs and produces beautiful furniture, objects and rugs and public space for children.

Kinder MODERN investigates the development of a child's mind and transforms their growing needs into luxury furniture. It is known for bringing a fresh and sophistication to brands, interior projects, hospitality projects and more.

Lora also came up with the idea of spreading trends and communication about child design through new publication of Kinder JOURNAL, an online monthly publication dedicated to past, present and future child design.
