

Triple Layer Care Powered by Skin Microbiome Technology

Caring for all three skin layers to create a healthy foundation

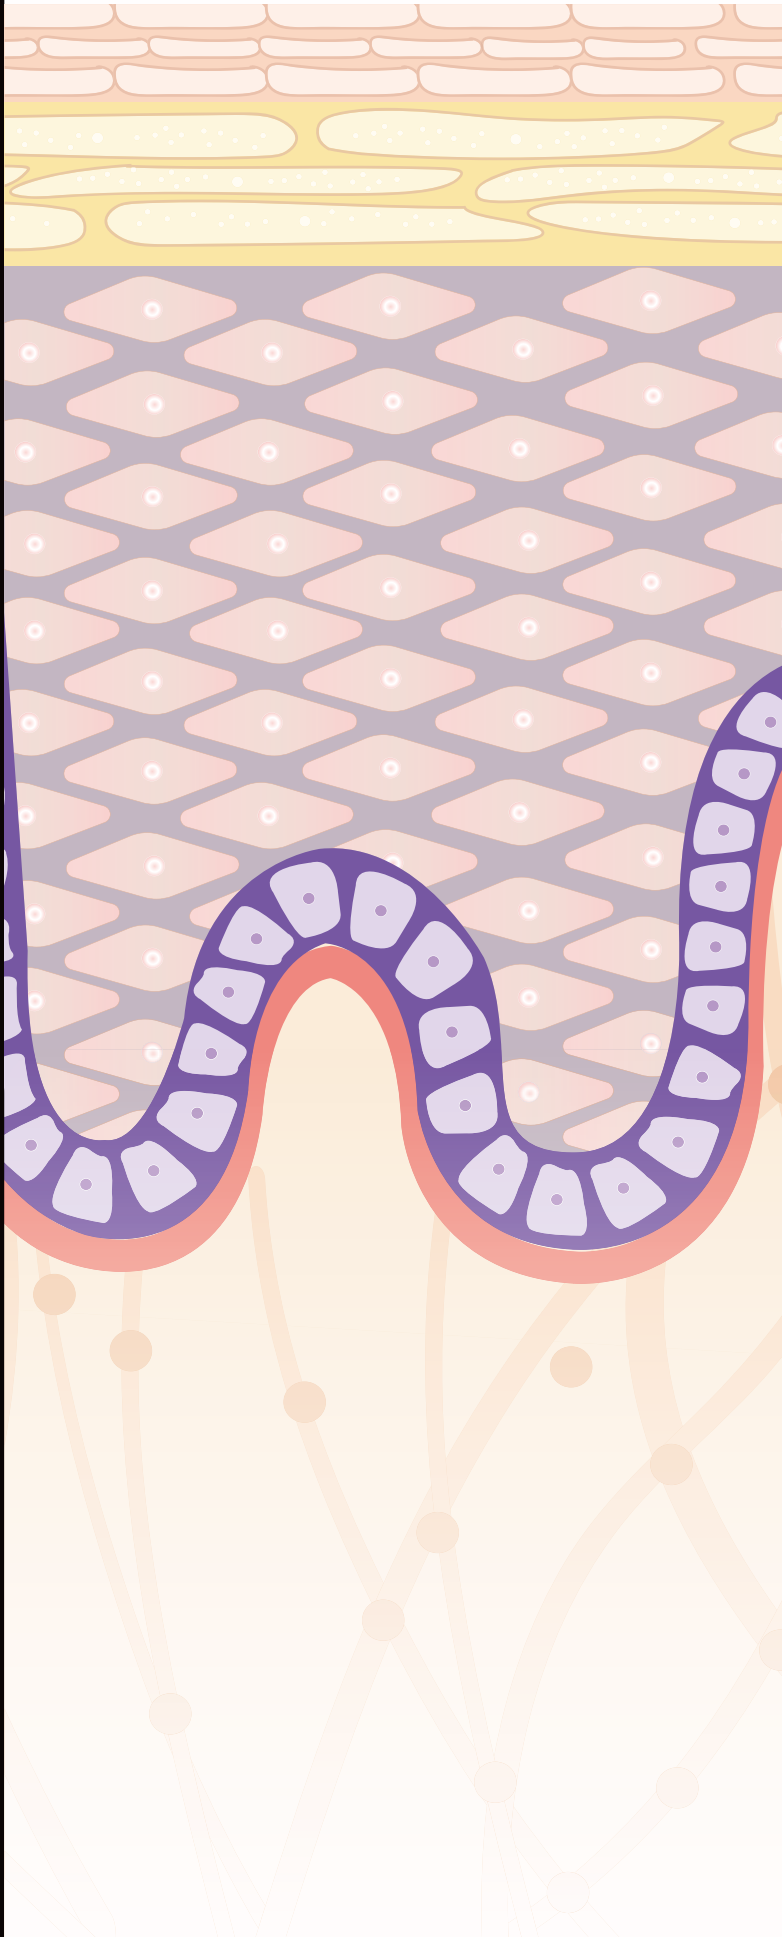

CELLTERMI NX Plus

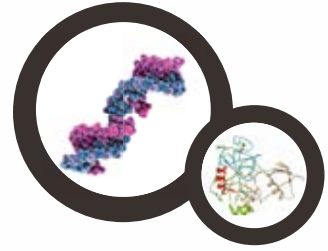

Discover a New Era beyond Exosomes

Nidogen + Exosome + Human UMSC-CM

Mechanism of Triple Layer Care

Epidermis

PDRN

Growth factors

CHA-Zeromelatide

Glutathione

Visible Effect

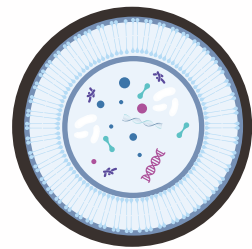

Basement Membrane

CHA-Nidogen-1

Strength of Core Structure

Dermis

**3 types of Probiotic
-Derived EV**

Human UMSC-CM

Fundamental Improvement

Human UMSC-CM

Human Umbilical Mesenchymal Stem Cell Conditioned Media

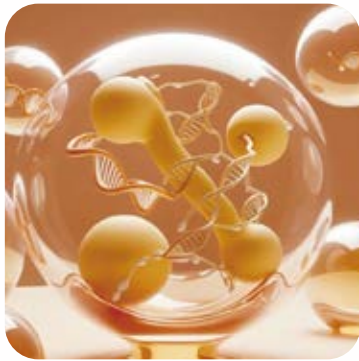

Stem Cell Conditioned Medium powered by
CHA Bio Group's proprietary stem cell
transdifferentiation technology

Patent : 10-1830062
10-2178778

What Sets CHA's Human UMSC-CM Apart

- Presence of antioxidant-associated components
- Contains basement membrane-associated proteins
- Naturally occurring bioactive constituents

Patented Probiotic-Derived Exosomes

CHA-MD Probiotic EV

Patent : 10-2022-0185054

Skin barrier improvement
Skin tone evenness

CHA-Centella CA6 Probiotic EV

Patent : 10-2024-0040421

Skin calming
Antioxidant

CHA-Tremella TF1 Probiotic EV

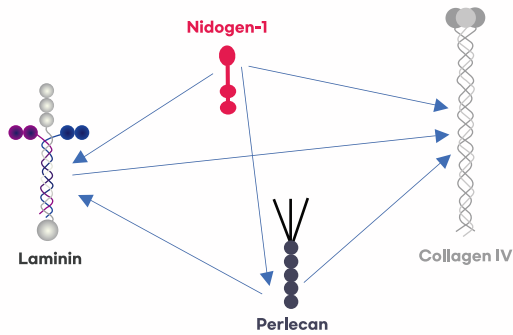

Patent : 10-2024-0040422

Skin firmness
Hydration enhancement

CHA-Nidogen-1

What is CHA-Nidogen-1?

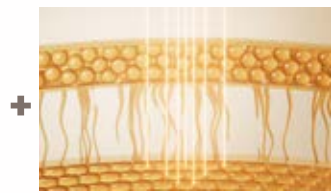

- A key protein of the basement membrane
- Contributes to structural stability
- Supports a balanced cellular environment
- Helps maintain a healthy-looking skin barrier

Skin Benefits of CHA-Nidogen-1

Supports collagen anchoring

Maintains well-organized collagen bundles

Contributes to collagen-supportive conditions

Healthy, Resilient Skin

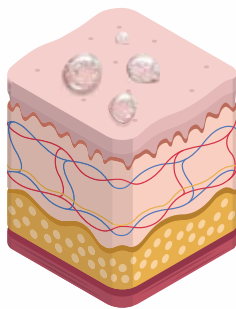

PDRN

What is PDRN?

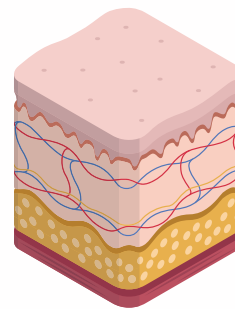

- Low-molecular DNA fragments
- Human DNA-like structure

Skin Benefits of PDRN

Epidermis

Improves skin hydration and comfortable feeling

Dermis

Supports skin's natural collagen production and renewal process

CELLTERMI NX Plus

Vial 1 : Lyophilized Nidosome Ampoule

270 mg / vial

3 types of Exosomes

MD, Tremella, Centella Probiotic-Derived

Skin tone balance & barrier care

CHA-Nidogen-1

Core basement membrane protein

Supporting structural protein connectivity

Human UMSC-CM

Human Umbilical Mesenchymal Stem Cell Conditioned Media

Anti-aging, Antioxidant

Growth Factors

EGF & bFGF

Skin renewal & visible vitality improvement

Vial 2 : Activating Solution Ampoule

5 ml / vial

PDRN

Human DNA-like low molecular weight fragment

Skin clarity

CHA-Zeromelatide

CHA's patented small molecule conjugated peptide

Even skin tone

Glutathione

Potent antioxidant

Overall skin radiance improvement

HA

Low molecular weight HA

Skin hydration & smoothness

NX Plus Protocol

Interval

| Once every 2 weeks, Total 5 times

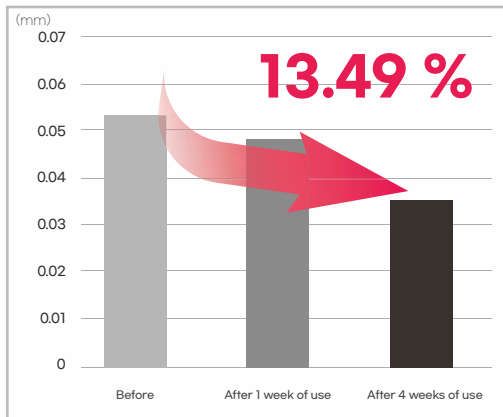

Dosage

| 1 set per 1 session (2 months / 1 box - 5 vials)

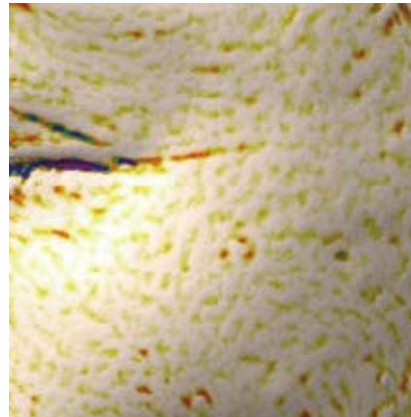

[Vial 1 : 270mg + Vial 2 : 5ml] X 5 sets = 1 Box (A total of 5 Sessions)

Clinically Proven Under Dermatologist Supervision

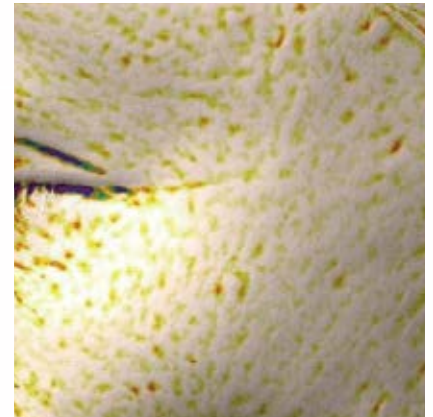

■ Crow's feet

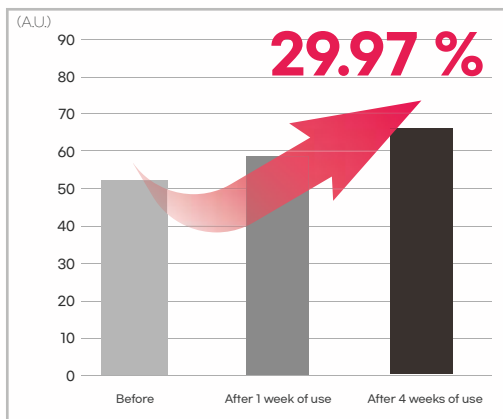

[Before]

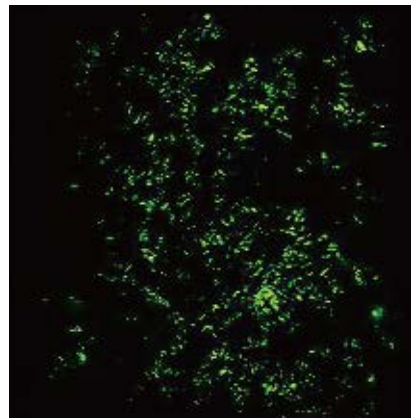

[After 4 weeks of use]

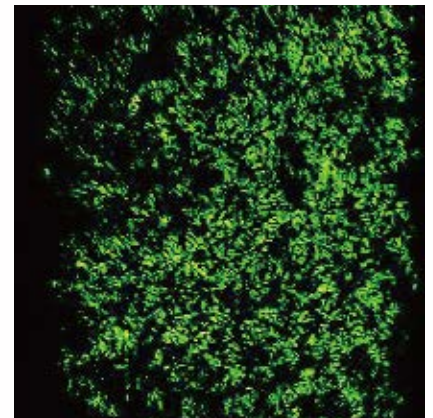

■ Hydration

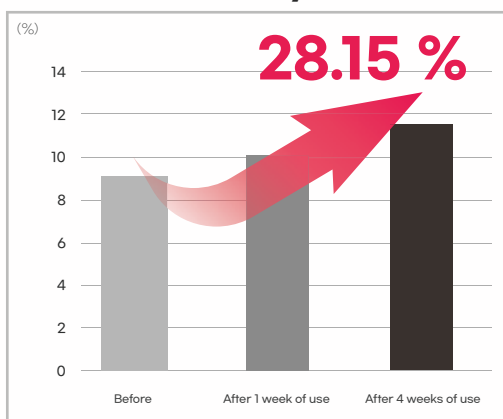

[Before]

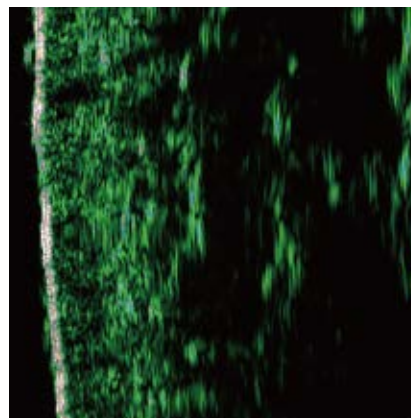

[After 4 weeks of use]

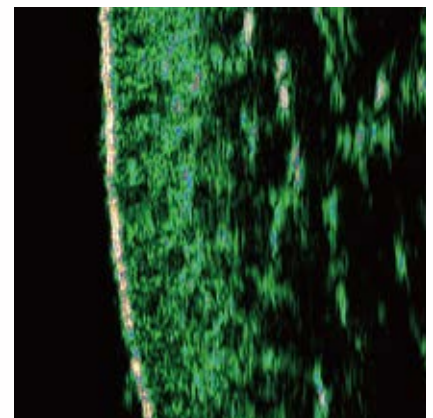

■ Dermal density

[Before]

[After 4 weeks of use]

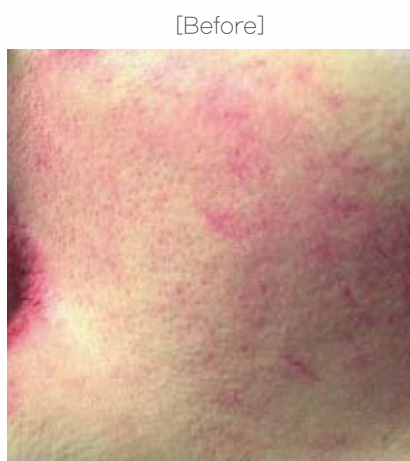

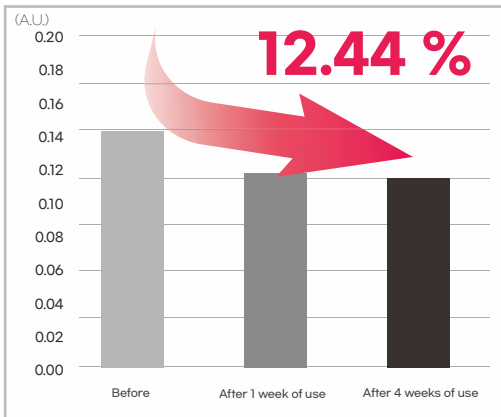

Title: A clinical study for 'CELLTERMI NX Plus' to evaluate anti-aging, skin renewal and skin improvement on human skin

Subject: 22 Female subjects (aged 35 to 59)

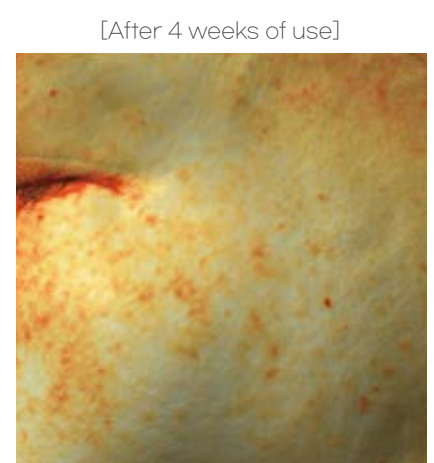

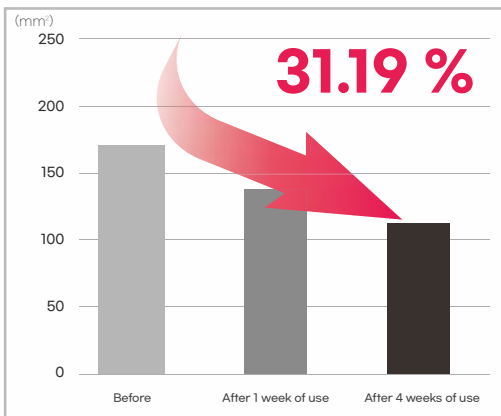

Study Center: COREDERM Inc. Skin Research Center (2025.10-12)

Clinically Proven Under Dermatologist Supervision

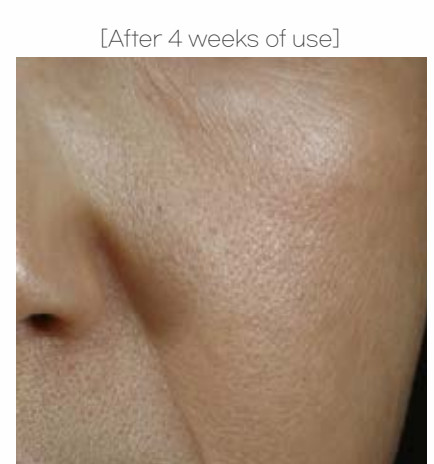

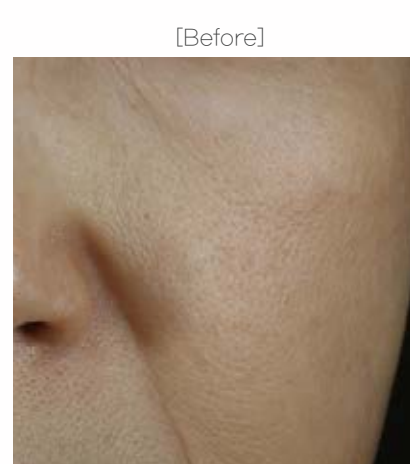

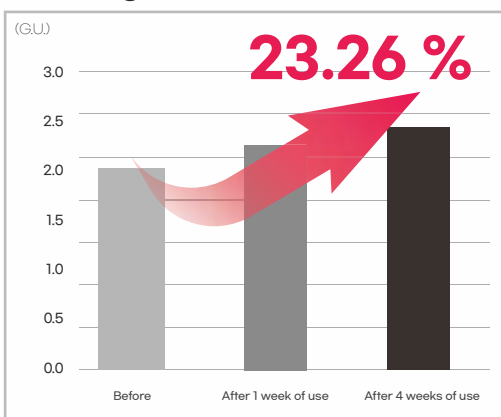

■ Skin redness evenness

■ Pigmentation area

■ Skin gloss

Product Information

Product name CELLTERMI NX Plus

Product contents Vial 1 : Lyophilized Nidosome Ampoule (270 mg) + Vial 2 : Activating Solution Ampoule (5 ml)

How to use Mix vial 1 and vial 2 thoroughly. Apply an appropriate amount of the mixture on the skin and let it absorb.

Number of uses For optimal results, 5 sessions is recommended.

Protocol An interval of 2 weeks on average is recommended.

Shelf life 24 months from the manufacturing date

Storage conditions Store at room temperature. Once opened or mixed, use immediately.
