

BELA MD - The Foundation of All Treatment Plans

- Medical Grade Resurfacing and Exfoliation -
Using a fine, medium or coarse diamond microdermabrasion tip for medical-grade exfoliation.
- Antioxidant Boost -
Converts tap water into hydrogen-rich water; to neutralize free radicals, reduce inflammation and boost hydration.
- Deep Cleanse and Extraction -
The ultrasonic skin scrubber removes dead skin cells and clears the pores.
Serum is infused (through the aqua tip) while simultaneously removing waste with rotation and suction.
- Stimulation and Rejuvenation -
Stimulate muscle contraction and tone skin with a combination of massage and electrical pulse.
- Serum Infusion Intelligently Delivered -
Advanced formulations introduced with electrical assistance enhance the penetration of active ingredients.
Four multi-functional serum options target common skin concerns. Economical, Thoughtful and Uncomplicated
- A nice introduction to medical aesthetics for new clients, add to existing treatments and/or use to prep for other procedures.
- Supports every treatment modality.
- More Predictable Outcomes
- Create healthier skin that responds better to everything.
- Unlimited In-Person Training by Me for Life
