

Introducing the Pro-Nox Nitrous Oxide Minimal Sedation System - an important and seamless solution to address pain and anxiety (with close to 100% patient satisfaction) to keep your patients comfortable during their visits with you.

The Pro-Nox is a very calming, cost-effective and non-addictive patient-controlled on-demand analgesia system that delivers a mixture of 50% nitrous oxide and 50% oxygen. With its easy-to-use design and rapid onset, it allows patients to experience quick relief without the need for higher levels of sedation. The Pro-Nox is ideal for a wide range of procedures and provides a safe way to manage pain and anxiety for your patients; and, consequently, helps to improve patient retention and practice growth.

Procedures Where the Pro-Nox Can is Often Used:

- IUD Insertions/Removals
- Colposcopy and Cervical Biopsies
- Endometrial Biopsies
- Pelvic Exams
- Laparoscopic Procedures
- Labor and Delivery
- Rejuvenation Procedures

The effects of nitrous are similar to conventional IV and opioid analgesia, but without the side effects.

Painful/uncomfortable procedures become much more tolerable often leading to a better result.

The Pro-Nox remains an effective way to manage pain and anxiety with an awake, responsive and cooperative patient leading to a more positive experience for both patient and practitioner.
Make a significant different with the Pro-Nox Nitrous Oxide System.
