

# CAREstream America

**Pro-Nox** is a safe and effective **nitrous-oxide system** for decreasing anxiety and pain during procedures.

Consider **Stem Cell Therapy** for restoring function and long-term pain reduction. Fat has up to 65x greater concentration and volume of viable stem cells than bone marrow which we harvest using **Water-Assisted Liposuction**.

**The Body-Jet** is a closed system that uses water to gently wash away the fat with minimal trauma yielding better cells for regenerative purposes. Fat is exposed to less mechanical stress and local anesthetic.

Our revolutionary Bone Marrow Needle, harvests laterally to minimize bleeding eliminating the need for centrifugation.

**Liberty MTX** is a completely sterile and closed system that converts PRP to PRFM; for extended release.

**Alpha-2-Macroglobulin** inhibits cartilage breakdown with the body's own defense mechanisms halting further joint deterioration.

Sterile-Filtered **Amniotic Fluid** from Merakris Therapeutics  
MSC-Derived **Exosomes** from Kimera Labs

**The VeinViewer** Vascular Illumination

**The RADIALSPEC Shock Wave Therapy System** -

Stimulate metabolic activity and enhance blood flow around the pain site to accelerate healing.
