PRO-NOX™

Because Comfort Matters

Pro-Nox™ Nitrous Oxide Delivery System offers a safe, fixed mixture of 50% Nitrous Oxide and 50% Oxygen to help relieve patient pain and anxiety during in-office procedures.

The innovative Pro-Nox™ pneumatically delivers the fixed gas mixture through a demand valve for infection and full patient control. Relief takes effect in just a few breaths and is expelled from the lungs within minutes after discontinuation, allowing a quick recovery. ¹

The entire system, including E-cylinders, fit on a cart for convenient mobility between procedure rooms. Safety features include audio and visual alarms to warn when either gas is running low and will shut off when pressure is too low to deliver the 50/50 mixture. Patients' breathe for the duration of any procedure through a disposable mouthpiece or mask that come in a variety of sizes for even more comfort.

The 50/50 mix of Nitrous Oxide and Oxygen has been used around the world for decades. Studies have shown that the use of Nitrous Oxide/Oxygen can significantly reduce pain, is non-addictive, and delays or decreases the need for other pain medication. ²

Pro-Nox™ is a great alternative for pain management in: Aesthetics, Dermatology, Plastic Surgery, Vascular, OBGYN,

Orthopedics, Pain Management, Regenerative Medicine, Urology, Birthing Centers, Hospitals, Surgery Centers and more.

^{1,2} Brotzman et al. (2018). "Use of Nitrous Oxide in Dermatology: A Systematic Review." *Dermatol Surg* 2018;44:661-669

Tanks not included

The Pro-Nox™ Difference:

- Effective and safe, fixed 50/50 N₂O and O₂ delivery
- Demand valve for patient self-administering
- Improves patient satisfaction
- Audio and visual safety alarms
- Safety shut off when gas pressure too low
- Quick onset and clears within minutes
- Filters for superior infection control
- Single-use patient circuit with one-way valve
- Low cost to use
- Scavenger system available

The analgesic that has been used for decades, finally, has a gas delivery system designed for safety and mobility with features developed with you and your patients in mind.

PRO-NOXTM

BE VISIONARY. REIMAGINE PAIN MANAGEMENT.

- Fixed 50/50 N₂O and O₂ gas delivery
- Effective and safe relief of pain and anxiety
- Internal demand valve for patient self-administration
- Improves patient satisfaction
- Audio and visual safety alarms
- Quick onset and clears within minutes
- Low cost to use
- Single-patient use circuit with one-way valve and bacterial/viral filter
- Low pressure safety shut off
- Rolling stand or wall mounting options
- Scavenger system integration available

Patient Breathing Circuits
(Mask & Mouthpiece options)

Bacterial/Viral Filters &
Accessories Available

Wall Mount

Additional Circuit Tubing

Pro-Vac Portable Scavenger

Active Scavenger System

Connect today for a demo or quote to become a Pro-NoxTM Comfort Zone.

Pro-NoxTM is ideal for in-office procedures for the following facilities and specialties:

- Aesthetic
- Plastic
- Dermatology
- Orthopedic
- Pain Management
- Hospitals
- Birthing Centers
- Urology
- Dentistry
- and more...

PRO-NOX™ N₂O AND O₂ GAS DELIVERY SYSTEM

Non-opioid relief of procedure pain and anxiety with premium features, including:

Pro-Nox™ Mixer Head Unit with Gas Regulators & Hoses

Patient Breathing Circuits (Mask & Mouthpiece options)

Bacterial/Viral Filters & Accessories Available

Wall Mount

Additional Circuit Tubing

Pro-Vac Portable Scavenger

Active Scavenger System

PEAK FLOW RATE (MINIMUM)	120 LPM
INHALATION RESISTANCE (WITH 6' CIRCUIT)	0 to -7.5 cm H ₂ O @ 60 LPM
INITIATION PRESSURE	-2.5 cm H ₂ O
INPUT PRESSURE	50 to 70 PSI (3.5 to 5 Bar)
OPERATING TEMPERATURE	41° to 104°F
STORAGE TEMPERATURE	-40° to 140°F
PRO-NOX™ MIXER DIMENSIONS	9" L x 6.5" W x 3.5" H
UTILITY ROLLING STAND:	47" with Mixer Unit attached to Rolling Stand
OVERALL HEIGHT STAND	42.5" H (Rolling Stand only)
STAND WIDTH AT BASE	18" W
WEIGHT	30 lbs (complete hospital system)
COMPATIBLE TANKS	E-cylinder size; separate N ₂ O & O ₂ tanks only
OXYGEN INLET	DISS 1/2" OD Green Hose
NITROUS INLET	DISS 3/8" OD Blue Hose
ACTIVE SCAVENGER VACUUM INLET	1/4" vacuum hose on 1/4" hose barb
SCAVENGER HOSE	20' long
VACUUM FLOW (dependent on source)	35 - 50 LPM Maximum (Ball lever full on position)

Portable Utility Rolling Stand

CAREfilter™

Protection is important now more than ever. Ensure patient and staff confidence with CAREfilter™, a bundled kit including a small Hygroscopic Condenser Humidifier (HCH) combo filter, manageable mouthpiece and comfortable noseclip.

- Single-patient use bundle
- Pharma Systems bacterial/viral HCH filter is FDA cleared with efficiencies up to 99.99%
 - Tested via Nelson Labs in the USA
- Comfortable noseclip to focus patient breathing through the mouthpiece
- Easy access to patient by adjusting filter airflow direction during procedures
- Minimal distortion when treating the face
- Helps to manage safety, anxiety and discomfort for you, your staff and patients
- From the company bringing you Pro-Nox™ Nitrous Oxide Gas Delivery System

CARE-filter-20 Filter, mouthpiece, noseclip bundle in quantity of 20

CARE-filter-100 Filter, mouthpiece, noseclip bundle in quantity of 100

Introducing CAREPRP

Unleash the Potential of PRP | [CAREprp.us](https://careprp.us)

PLATELET-RICH PLASMA (PRP) concentrates platelets, growth factors and more to harness the body's natural repairing mechanisms. Our FDA-cleared **CAREprp™** system encompasses a breakthrough design to deliver high quality and versatile autologous PRP.

CAREprp™ employs an elongated, hourglass-shape to take advantage of the natural separation of the blood that occurs with centrifugation for in-office PRP processing. CAREprp™ utilizes a provider-directed locking feature to seal off contaminants and securely access the golden plasma solution. The unique tube shape and strategic openings allow for flexible collection options for personalized care.

Breaking new ground in PRP, schedule a CAREprp™ demo today.

Be Visionary.

VeinViewer[®] VISION2

***VeinViewer is
clinically proven to:***

- ✓ Improve first stick success by up to 100%
- ✓ Reduce time to IV access
- ✓ Reduce central lines placed due to difficult venous access by 30%
- ✓ Reduce procedure escalations
- ✓ Increase patient satisfaction by up to 100%

MaxReach

VeinViewer[®]

VISION2

MaxReach provides head-to-toe coverage.

We worked with clinicians to design a device that facilitates easy use in nearly every environment. Only VeinViewer[®] Vision2 offers a 53" reach for convenient hands-free operation. Quickly and easily assess several potential stick sites without having to reposition the device.

Every patient. Every time.

- ✓ Locate veins up to 10mm deep
- ✓ Locate valves and bifurcations
- ✓ Assess refill rate
- ✓ Make the best choice for your patient

TrueView™

VeinViewer ensures accuracy and ease of use with the markets only in-focus indicator. When the projected image border is clear you can trust the vessel width shown to assist in catheter gauge selection.

See things differently.

Greater First Stick Success - Fewer PICC Lines - Increased Patient Satisfaction

CHRISTIE+

Creating Beauty with Confidence.

VeinViewer®

VeinViewer® by Christie, the world's only high definition vein visualization technology, helps improve targeting for cosmetic procedures.

Using near-infrared (NIR) light to detect superficial veins, VeinViewer projects the vein pattern directly on the skin. Easily identify and avoid vessels for cosmetic injections, helping to circumvent potential complications and reduce costs. Improve the patient experience, and set your practice ahead of the rest with the cutting edge technology of VeinViewer.

Aesthetics and Technology

- ✓ Harmless NIR and LED light makes VeinViewer perfect for cosmetic injections.
- ✓ Potentially avoid complications.
- ✓ Potentially reduce down time for patients.
- ✓ Increase patient satisfaction and word of mouth referrals.

CHRISTIE+

What can VeinViewer® do for you?

VeinViewer®

VeinViewer provides:

- ✓ The most accurate image of any vein visualization device on the market.
- ✓ A high definition image that shows veins up to 10 mm deep and blood patterns up to 15 mm.
- ✓ Multiple imaging modes, making it ideal for every patient type.
- ✓ Hospital grade durability.
- ✓ Multi-year standard warranty.
- ✓ Accessories for convenience and portability.
- ✓ Ongoing training & service available.

Make it the standard in your practice.

CAREROVER™ + ADAPTER ARM

HD vein imaging meets convenience with the CAREover Rolling Stand & Adapter Arm bundle

The near-infrared (NIR) technology of VeinViewer® Flex is now more portable than ever by adding the CAREover and Adapter Arm bundle. The CAREover utility cart was designed specifically to integrate with the VeinViewer® Flex system. The Adapter Arm flex stud easily connects to the existing VeinViewer® Flex Arm Mount to maintain motility when repositioning the vascular access device. Accuracy, stability and mobility combine for the ideal vein imaging package.

CAREover HEIGHT	43.5" (with Adapter Arm)
ADAPTER ARM REACH	Approx. 32" (with Adapter Arm & VeinViewer® Flex System)
INCLUDED TOOLS	3/16" Allen Key & 1/2" Socket Wrench
ACCESSORIES	Transport handle & storage basket

VeinViewer® Flex System with Arm Mount *(not included)*

Adapter Arm with flex stud to reposition VeinViewer® Flex

Adjustable height handle for comfort & easy maneuverability

Storage basket for additional supplies & resources

39" steel stability pole

18" diameter, 5-caster star base with locking wheels for smooth mobility

Combine Pro-Nox and VeinViewer® Flex Systems by adding an Adapter Arm to your existing rolling stand.

ACOUSTIC WAVE THERAPY

Amplify Aesthetic Procedures with Radial Waves

SLIMSPEC™ professional system for cellulite and body firming treatments using Acoustic Radial Wave Therapy (ARWT).

SLIMSPEC™ is an easy to operate, compact and user friendly system for reliable and efficient clinical results for greater satisfaction to your patients. SLIMSPEC™ offers two handpieces and is quieter than the competition. Treatments can be performed on cellulite affected areas such as the abdomen, hips, thighs or buttocks.

What is Acoustic Wave Technology?

Acoustic radial waves are unfocused low pressure acoustic waves created by an electromagnetic ballistic mechanism. The wave is transferred into the tissue affecting a large treatment area and generates an instant butterfly-like effect.

The body responds to the acoustic radial wave by increasing metabolic activity around the site of the treated area. The acoustic radial waves reduce the tissue oedema which is one of the initial phenomena of the cellulite. Reduction of oedema causes less puffiness of the skin. The tissue becomes more permeable so the fluids and the toxins retained within the fat cells are being released and drained by the lymphatic system. By reducing the toxins, through reduction of oedema, there is less damage to the collagen fibers, thus, less degeneration and tighter holding of the skin.

Connect with us to learn more today.

MAIN UNIT TECHNICAL SPECIFICATIONS

TECHNOLOGY	Ballistic radial wave source with footswitch
FREQUENCY	2 - 22 Hz
ENERGY	4 options from 60 - 180 mJ
CONTROLS	All main operating elements integrated into the graphic user interface
WEIGHT	10 lbs
DIMENSIONS	5.8 in H x 14.3 in W x 13 in D
HANDHELD	36 mm diameter with 2 handpieces

SLIMSPEC™ benefits include:

- Increased firmness & lifting of the skin with gradual smoothening of the skin surface
- Long-lasting treatment effect (up to 6 months post treatment)
- Two (2) handpieces included
- Quieter than the competition
- Painless & non-invasive treatment with no reported side effects
- No downtime after treatment
- Complies with FDA & CE standards

body-jet® eco

Efficient Micronized Fat Harvesting

The innovative body-jet® eco uses water-jet assisted technology that is specifically designed for in-office precise and gentle removal of small adipose tissue volumes.

The cutting-edge body-jet® eco has been designed for the **precise and gentle removal of small fat tissue volumes** that may be used for subsequent autologous fat transfer. A pulsating water-jet combined with a tissue-sparing, defined vacuum allows **harvesting intact and highly viable fat cells** from the subcutaneous fat tissue in a gentle way.

- **No more tumescence technique**
- **No more change of cannulas for spray or aspiration**
- **No more centrifugation required**

The patented body-jet® eco helps **save valuable time** by harvesting highly viable fat and **micronizes it down from 850 to 650 micrometers** through the FillerCollector®. The result is finely dispersed injectable-ready adipose clusters.

Juliane Meyer, et al, Isolation and Differentiation Potential of Human Mesenchymal Stem Cells From Adipose Tissue Harvested by Water Jet-Assisted Liposuction, Aesthetic Surgery Journal, Volume 35, Issue 8, November/December 2015, Pages 1030–1039, <https://doi.org/10.1093/asj/sjv075>

body-jet® Harvesting Technology:

Phase 1 | The fan-shaped spray gently loosens fat for in-office harvesting through a closed loop system.

Phase 2 | Simultaneously separate and suction with the two-in-one cannula technology for more efficient aspirating.

body-jet® eco SIMPLE & FAST TECHNOLOGY

Low volume fat grafting without centrifugation or tumescence.

Manufactured in Germany, the **light weight**, **modern design** is portable and features a **user-friendly interface** for convenient setting adjustments. Learn more about the efficient, versatile and intuitive body-jet® eco device.

Reach out today for more information or to connect with a local representative.

body-jet® eco	
DIMENSIONS	32 cm (B) x 35 cm (T) x 30 cm (H)

body-jet® evo

Fast, Versatile and Intuitive Body Contouring

body-jet® evo offers premium water-jet assisted liposuction for fat transfer and body contouring in-office and clinic. With the help of a fan-shaped, pulsating water spray, fat is gently separated and aspirated simultaneously in a closed system.

The innovative body-jet® technology is designed for **the fastest, most gentle and effective removal of small or large fat volumes** using the water-jet assisted liposuction (WAL) method. A fan-shaped, pulsating water-jet combines with a tissue-sparing, defined vacuum allowing for the **harvest of intact and highly viable fat cells** in a closed system.

- **No more tumescence technique**
- **No more change of cannulas for spray or aspiration**
- **No more centrifugation required**

Using the gentle force of water-jet, the adipose tissue is detached resulting in better preserved fat cells and surrounding tissue. This results in **higher patient safety, faster recovery and less pain**. Learn more today about the efficient, versatile and intuitive body-jet® evo.

Kwiatkowska K, Krapohl BD, Tanzella U, Ueberreiter K. Long-term clinical results and quality of life in patients undergoing autologous fat transplantation for breast augmentation using the BEAULI™ protocol. body-jet® Harvesting Technology:

Phase 1 | The fan-shaped spray gently loosens fat for in-office harvesting through a closed loop system.

Phase 2 | Simultaneously separate and suction with the two-in-one cannula technology for more efficient aspirating.

body-jet® evo CUTTING-EDGE TECHNOLOGY

Precision high volume adipose tissue harvesting and body contouring.

Thanks to a novel technology for the body-jet® evo, the **intensity and effectiveness** of the water-jet can be adjusted to the users needs, **ensuring a virtually pain-free treatment**. The **surrounding connective tissue, nerves and vascular structures remain undamaged** resulting in higher patient safety and faster healing with less pain and bruising.

The results of water-jet assisted lipofilling using the body-jet® technology are **predictable**, as proven by a multitude of published clinical studies, and feature a user-friendly interface for simple setting adjustments.

ADINIZER

Simple Adipose Micronizer

A simple system for physicians using Water-Jet Assisted Liposuction/Lipoharvest (WAL) to manually micronize adipose further down to 400 microns for those specific cases when a very narrow needle gauge is preferred.

- Single-use, laser-etched disc cartridges
- Rapid and efficient 2-step process
- Homogeneous aliquot yield
- Patent pending smart kit

How does it work with WAL method?
