**\*MICROCURRENT IS A NANO ION TECHNOLOGY THAT SENDS LOW-LEVEL ELECTRICAL CURRENTS INTO YOUR SKIN TO STIMULATE CELLULAR REPAIR.**

## TESTIMONIALS

"I am a physician board certified in pain management. I bought one for myself on October 2, due to a torn lateral meniscus. It has been very helpful and has allowed me to avoid surgery to have the meniscus "cut out because I can't repair it" per my orthopedist after he saw my MRI. I have recommended this to many of my pain patients."

*Dr. Robert MD, November 2016*

"I have suffered with Fibromyalgia, bad disc in my neck and arthritis. This unit has helped reduce my pain as well as helped me wean off some of the medications I was taking. I use it almost once a day for whatever is bothering me. There are many days I do not need it which for me is huge. I have postponed disc replacement surgery since I can manage pain effectively with this. It helps my migraine headaches too. Showed it to my Mother-in-law and she bought herself one since she loves it too."

*Paulette, February 2019*

"My whole family uses it. All of my middle school/high school athletes, and their sore and tired parents. Great product. Sales person I dealt with was excellent. Couldn't be happier with the product."

*Jacob, February 2019*

"I was skeptical at first, I've heard of other devices in the past but what really sold me on this was the diversity of having up to 6 users, using 6 different settings at once. Registration was simple. The VIP program also gives me reassurance if anything should happen with my unit. The entire family is glad I got this!!!"

*Paul, March 2019*

**PAIN-FREE MUSCLES AND NERVES**

**STRONG NECK**

**STIFF NECK**  
**SORE MUSCLES**  
**BACK PAIN**  
**IMPROVED CIRCULATION**  
**STRESS RELIEF**  
**PASSIVE EXERCISE**

## HOW DOES IT WORK?

**Soothing pulses intercept pain signals before they reach the brain.**

**They stimulate the production of endorphins, your body's natural pain killers.**

**That relaxes muscles and increases blood flow to wash away inflammatory toxins.**

FDA cleared as a Class II medical devices.

TENS Therapy has been proven effective by the American Physical Therapy Association.

EMS therapy has been clinically proven to help with muscle performance.

MicroCurrent is a nano ion technology that sends low-level electrical currents into your skin to stimulate cellular repair.

## UNIQUE BENEFITS

### **Fast Acting**

Although the rate and degree of response vary by individual, many users report experiencing positive results after just 10-20 minutes of use.

### **No Side Effects**

Since there are no drugs or chemicals involved. HiDow muscle stimulators are deemed safe for long term use and can be utilized while taking medications.

### **Portable & Convenient**

About the size of a smartphone, our pocket-sized devices enable you to conveniently receive treatment anywhere, at any time!

### **Cost Effective**

These devices will save you time and money, as well as improve your function and quality of life.

### **Simple To Use**

Employing the most advanced medical technology on the market, these devices are highly innovative yet simple to use.

### **Empowering**

With the HiDow muscle stimulators, you can take control of your health and well-being in a safe, effective manner. Or, you can just as easily give the gift of health! Nearly everyone suffers from muscle tension in some form, whether chronic or acute; and our devices make the perfect gifts.
