

Beyond Exosomes

Optimal Formula for Specific Goal

Celltermi NX Plus - promotes communication with all 3 skin layers

Celltermi HS - optimal environment for hair vitality

Contains:

- Exosomes - from 4 probiotic strains
- Human-Derived (umbilical) Mesenchymal Stem Cells -
the most skin-specific human-derived exosome available
- PDRN
- Growth Factors
- Nidogen-1 - optimize cellular communication/appearance
- specific Peptides
- Glutathione (NX Plus)
- Hyaluronic Acid (NX Plus)
- Biotin Caffeine (HS)

Ideal Application for Skin - every other week x5

Ideal Application for Hair - weekly x4

What Makes CHA Exosomes Unique?:

1. CHA has developed a recombinant protein called Nidogen to restore the basement membrane; enabling specific cell signaling between all of the layers of skin.
2. CHA Exosomes treat every level of skin simultaneously with multiple plant and bacterial exosomes to stimulate healing from a variety of pathways.
3. The CHA human-derived exosomes come from MSCs that are differentiated in an epidermal cell bath to carry the secretome profile of epidermal cells; versus a random assortment.
