

We can help you maximize the value of every tax dollar across multiple budget periods. When you need an effective way to fund necessary technology investments and squeeze more purchasing power from your current appropriations capacity, consider our Municipal Lease Program. Most government entities – municipal/county/state governments, school districts, police and fire departments, water districts, housing authorities, certain hospitals, and more – can harness short-term and long-term structured financing benefits.

Advantages of Financing

- **Start with the convenience** of a fast, flexible credit approval process and well-accepted municipal lease contracts already used by hundreds of State and Local Government customers.
- **Ensure flexibility** for easy equipment upgrade or expansion – including Master Lease Lines of Credit for multiple acquisitions over time – because we fund and manage all our transactions for the duration of the lease.
- **Minimize costs with competitive lease rates** on acquisitions from \$1,000 to \$1 million and more, with tax advantages over commercial leases, and by avoiding substantial legal fees, underwriting costs, and associated expenses of general obligation bonds.
- **Maximize purchasing power and cash flow** without large, up-front cash payments. Flexible payment options can range from monthly to annually, or be tailored to unique budgetary situations.
- **Build equity toward full ownership** at lease end, with every lease payment you make.
