
DATA IN HARMONY

Shaping Future-Ready Data
Professionals in an AI-Driven World

ABOUT US

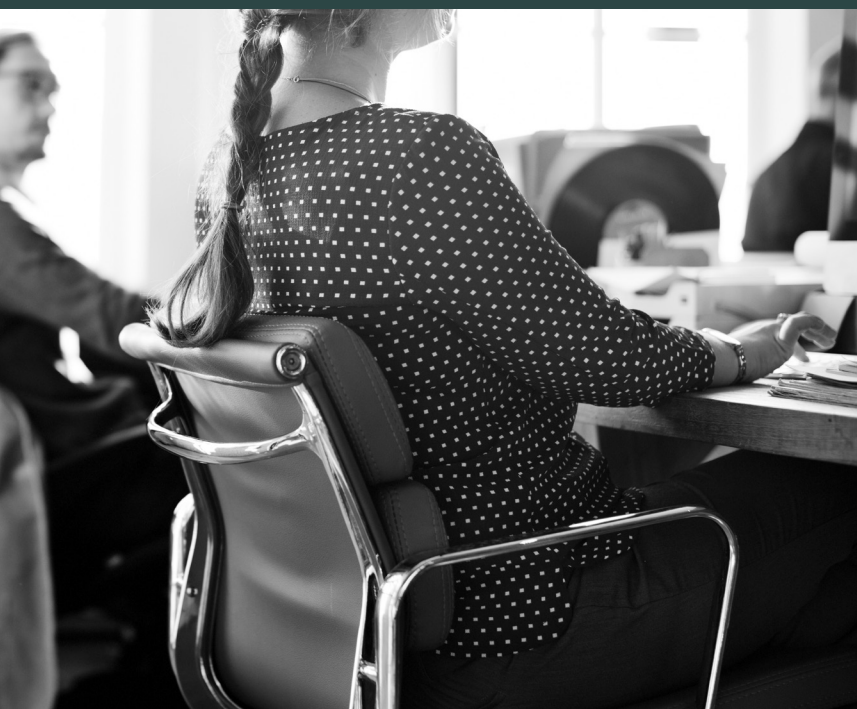

At **Data Chord**, we believe data is more than numbers, it is the language of the future. Our mission is to empower individuals and organizations to thrive in the age of Artificial Intelligence by building **future-ready data professionals**.

Founded by Dr. Daniel Koh, an experienced data leader and academic, Data Chord blends **industry expertise, research-driven methods, and human-centered learning**.

We provide cutting-edge training and certification programs that prepare learners to meet the growing demand for skilled data professionals across the globe.

OUR PROGRAMS

APPRENTICESHIP PROGRAM

A structured program designed to take learners from foundational knowledge to real-world applications. Through mentorship, projects, and practical exposure, participants graduate with both technical mastery and career confidence.

PROFESSIONAL CERTIFICATION IN DATA SCIENCE (PCIDS™)

Accredited by the Association of Data Scientists (ADaSci), this globally recognized credential validates expertise in data science, AI, and machine learning. Learners not only gain knowledge but also a credible pathway to global opportunities.

SOCIAL IMPACT TRAINING PROGRAM

A program designed to equip individuals and organizations with practical skills to address today's pressing social challenges. From digital literacy and information awareness to community engagement and ethical leadership, participants gain tools to create positive, lasting change in their communities and beyond.

WHY CHOOSE DATAHORD?

Accredited & Trusted

Backed by ADaSci and led by global data experts.

Future-Oriented

Programs designed to meet tomorrow's industry demands.

Practical & Applied

Hands-on projects, mentorship, and real-world case studies.

Global Perspective

Partnerships with overseas institutions and markets.

Human-Centered

Training that balances technology with empathy and collaboration.
