2026 LARSON ANGUS BULL SHEET

The sale will be Saturday, March 28, 2026, at 1pm. We used a variety of sires this year between our herd and our partners. The minimum bid for bulls will be \$3500. The bulls have a freeze brand, magnet, foot rot shots, pre-breeding shots, and all passed their semen checks on 3/16/26. Ribeye scans were also completed (coming soon).

- We will continue to board the bulls until June 1st. Payment is due upon delivery of the bulls. Delivery is free within 150 miles.
- We will guarantee that they can breed your cows for one breeding season (90 days from 1st turn out) if you have provided proper management. A Credit will be given for future sale minus salvage value if there are issues. You must contact us immediately if you have issues. We will ask that a vet examine them as well.
- We will guarantee soundness upon delivery and pay any vet bills should an injury occur prior to the animal being delivered to you.
- We will transition the bulls to good grass hay following the sale. This will help to get the bulls into a good breeding condition that should work with your herd. It is important that you provide your bull with proper nutrition so that he performs well and continues to grow.
- Please note that putting your yearling bull in with other bulls could lead to fighting and injury. We aren't responsible for damages caused by your other animals or issues on your property.

What is considered to be a good bull: A bull that will add value to calves sired because he fits your breeding objective, production system and marketing plans. At our sale we provide registration and EPD's for all bulls from Jim's herd and Hinners. Hermstad's have their bulls registered with AAA #'s or BIR #'s if the dams couldn't be papered.

- Genetic values pay when you purchase bulls capable of improving genetic potential for the specific traits that will translate to added value at your intended marketing end point.

(Angus Beef Bulletin EXTRA, Vol. 18, No. 1-A

What is a good bull worth? A general rule of thumb is a good bull is worth the value of five calves he sires. Think about what your end goal is and look at your bull as an asset that will bring value to your herd.

Minimum Genetic Requirements

	Value
Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (DGI)	+55.0

Certified Angus Beef Criteria is measured with EPD for Marbling (0.65+) and Dollar Grid Carcass Index (\$G) +55. We have several bulls that meet this standard. They should add value to your herd.

\$Value Index (\$Value)

- A \$Value is an economic selection index allowing for directional change in multiple traits at once pertaining to a specific breeding objective.
- The \$Value is a collection of EPDs weighted by their economic value such that traits with greater impacts on the production goals have a larger economic weight associated with them. \$Values are used in practice, like an EPD, for comparison of future progeny performance across herds within a given breed

We used ultrasound to measure Ribeye, IMF (intramuscular fat), and backfat.

- IMF- For marbling, a good range is 3.5% to 6.0% at yearling age.
- Rib Fat Thickness (backfat): 0.2-0.4 inches is considered optimal for showing growth and composition. 0.3-0.35 inches is often targeted for finishing groups.
- Ribeye size: Cow Calf producers should strive to be between 12 and 16 inches for Ribeye size.

We have established a sale order for the bulls. Hopefully this will allow you to prepare what you would like to bid upon and have a backup bull if it goes out of your range. Please stop and get a bidder # sale day.

LARSON ANGUS (LAF) had 3 main sires: **True North, Woodhill Comstock,** and **LAF105(Accomplishment)**. All have strong maternal traits and should be cow making bulls. We believe that good cows will make you great calves. We did not use creep with the calves on cows as we wanted to see the performance of the actual cows themselves.

HINNERS (MH bulls) family used Baldrige Gibson and LAF209(Justified) who are also good maternal bulls.

HERMSTAD's (HB bulls with blue tags) used their good herd bulls that were obtained via our prior sales. Most of these bulls were high selling bulls those years. MH 31(Justified), MH 32(Justified), LAF 115(MH84-Black Granite), LAF937(LAF756-K205), and LAF 241 (LAF120-Cedar Ridge) were the sires who were all deemed calving ease and have good cows behind them. Genomic testing and updated EPD's reflect that some will be Heifer with Discretion bulls. Two bulls for sale can't be registered due to the cows not being registerable. All bulls have been entered into the American Angus Association and at least have BIR#s. **NOTE: Their weaning weights for the Hermstad's bulls were taken a month after the animals were actually weaned and when the bulls were joined together.**

Lot 1.

HB31*

BIR#

628407169

He is a

MH31

(Justified) son out of a 11-year-old cow sold to the Hermstad's by Jim. He can't be a registered as a purebred unfortunately, but is a darn good bull. This bull has been a standout since birth. 1st wt was a month after weaning and he registered 844lbs at 222 days. HB31 is in the top 1% of genomic tested bulls for SC and measured 43 cm. Semen test was 90/90. **Ribeye 13.8 and IMF 5.57.** Rib/Rump fat .36/.48. He is in top 10% or better for WW, YW, FS Angle, Milk, and Tend. He is in top 37% for CED. **He is a HEIFER BULL.**

of **Baldridge Gibson** out Drew's 10-year-old Conneally Capitalist Donor #61. He has an actual birthweight of 81 lbs. on Feb 1st and a yearling weight of 1250 lbs. on Feb 14th. This bull does the things that we at Hinnners Angus look for in our bulls. Calving ease, growth, disposition and will make offspring better than the bull itself. The #61 dam of this bull has never raised a calf that wasn't at the top of each calf crop. This spring we will be breeding two full sisters to this bull that were born in the spring of 2025. We also have a bull and heifer calf from this mating born in the spring of 2026. **14.1 inch Ribeye and 2.85 IMF.** .36/.34 Rib/Rump fat. 38 Scrotal and 90/90 semen test. DOC +21 & CED is +9. **HEIFER BULL.**

Here is our **Gibson** bull that hits all the boxes that are important for the times the cattle industry is in. This Feb 5th born calf started at 83 lbs. and had a yearling weight of 1250 lbs. on Feb. 14th. He is the 2nd calf out of a soon to be great Steller cow that is a granddaughter of the famous LAF 619 cow that worked 16 years for both LAF and HAF. CED is +0. We feel he will be a **HEIFER BULL WITH DISCRETION.**

15.1 inch Ribeye and 3.18 IMF. .24/.37 Rib/Rump fat. Scrotal 39 cm and 90/90 test. Since his mother has had 3 top calves from 3 different sires to start her production, she will be flushed here in 2026. This may be the best calf we have ever offered since we started working with the Larson and Hermstad Families.

A **Comstock** bull out of a great Black Granite dam (856). This bull should make you some good productive cows. He weighed 79 lbs at birth and 663 at weaning and 1170 at a year. He has traits that qualify him for Certified Angus Beef producer. **15.7 inch Ribeye and 6.49 IMF.** Rib/Rump fat .24/.23. Scrotal size is 40 cm and 90/90 semen test. DOC is +25 and CED +9. This bull will bring you some strong maternal traits and shouldn't break the bank on feed. He is in the top 1% for Milk in Genomic testing, 2% Functional Longevity, and better than top 10% for teats/udders and DMI. We think he will offer you a lot of value to your herd just like his EPD's show. **He is a HEIFER BULL.**

LOT 5
LAF509
AAA
21297855

This bull is a True North son out of a Stellar cow (110).

This bull is solid with a really good young cow behind him. She has produced two heifers previously who were keepers and showing their worth. Her daughter has the LAF505 bull on the sale who is also a solid bull. Docility is a trait that we aim for with our herd. LAF509 has a docility score of +26. He will also give you some good cows with good teats and udders as he ranks in the top 6 % for teats and 10% udders for the Angus breed. well as good feet. LAF509 weaned at 616lbs and continues to have a consistent gain. **14.3 Ribeye and 4.04 IMF**. Rib/Rump .22/.31. Scrotal 39.5 cm and semen test 90/90. His CED is +8 and ranks in the top 29% for the breed in CED. We are calling him a **Heifer Bull**.

Fortunately, he has grown out of that. He is very laid back and his DOC score is +27. LAF502 has genetic traits that qualify him as a Certified Angus Beef rating. **15.2 inch Ribeye and 4.9 IMF.** Rib/Rump fat .32/.56. **SC is 39cm and 90/75 semen test.** His adjusted Weaning ratio was 723 with a WW Ratio of 120. He weighs 1210 as a yearling. He has a calving ease direct score of +14 so you should be able to sleep at night with his calves. **He is a HEIFER BULL.**

True North son out of a Patriarch first calf Heifer 303. Her dam is our Stellar 020 cow and she has made pathfinder for the past 2 years. She has raised some amazing heifers including the 203 heifer who produced last year's top bull (LAF401). If you want a bull that has some good cows behind him, this is one to look at. LAF501 had a **17.6 inch Ribeye and 6.18 IMF.** His Rib/Rump fat was .3/.34. These beat out our LAF401 bull last year (17.4 & 4.3). **SC 38 cm. 90/75 semen test.** He weighs 1150 as a yearling. He has a calving ease direct of +12. **He is a HEIFER BULL.**

LAF507

AAA

21314146

True North bull

out of a nice Stellar cow (015) who was easy to work with.

She has very good teats and udders and we haven't had to assist her calves as she gets them up and going. There is a good pathfinder dam in this bull's background that continues to be a producer of good calves for the Hermstad Brothers as a 12 year old. This bull has shown good growth and has a very masculine look about him. LAF507 weighed 572 at weaning and 1145 on March 16th. **Ribeye 14.9 and IMF 4.09**. Rib/Rump fat .27/.43. Scrotal 40cm and semen test 90/90. He has a CED score of +13 which should allow you to sleep at night. **He is a HEIFER BULL.**

Granite) and a Diverse cow (LAF840). This dam is out of the LAF302 cow owned by Hermstad's. LAF302 was 12 years old last year and continues to produce for them. She has produced some very good cows with a lot of longevity. In genomic testing HB840 scored in the top 15% for functional longevity as well as mature height. Other top scores were WW, YW, YH, Doc, Milk, CW and Tend. Scrotal 36 and 90/75 test. **12.2 inch Ribeye and 3.39 IMF.** Rib/Rump .15/.15. He has a CED +6 but in bottom 10% for CED. Would say he is a **HEIFER BULL WITH a lot of DISCRETION.**

(LAF756-K205) and a Cedar Ridge dam (LAF 302). LAF302 is 13 years old and a productive pathfinder cow that Jim sold to the Hermstad Brothers. She is tied to several of Jim's top cows. HB302 bull scored in the top 2% for Functional Longevity in the Neogen testing. He has high docility rankings as well as better than top 25% for Claw, PAP, hair shed, and Heifer pregnancy. There are several good dams behind this one. He had a 38 cm Scrotal measurement and 90/90 semen test. **Ribeye 12.2 inches and IMF 2.22.** Rib/Rump fat .21/.21. **We would call him a HEIFER BULL WITH SOME DISCRETION.**

2026 LARSON ANGUS BULL SHEET

We want to Thank you all for coming to our sale or showing interest in our cattle. You are a big reason that we keep going. We value the relationships that we have built and believe that the only good deal is one where everyone comes out ahead. Please call if you have questions following the sale or would like to arrange to view the bulls prior to sale day. We welcome any feedback as to what would help make your experience better.

Jim or Marcia (712)260-6144(6145), Susan (402)980-5089, Marc Hinners (712)299-7911, Greg Hermstad (712)334-0175 or David Hermstad at (712)334-0217.

Any Bull not sold today will go up in price from the minimum bid.

An extra thank you to some of our Friends of the Industry who we have used this year:
