

Manufacturer's Representative for leading suppliers of Sensors & Instrumentation. Providing professional Sales Engineering Service in the Mid-Atlantic since 1993.

Technical Representatives, Inc.
1608 Stowe Rd. Reston, VA 20194
703-904-1860 www.trirep.com

Crystal Instruments designs, produces, sells, and services hardware and software for machine vibration monitoring, dynamic measurement and environmental testing.

Dataforth is a worldwide innovator of signal conditioning, data acquisition, and data communication products. 5B, 7B, 8B and 9B modules and backplanes.

Endevco is the leading designer and manufacturer of dynamic instrumentation for vibration, shock and pressure measurements.

High Performance DAQ Systems specializing in transient recorders, data acquisition systems and high resolution Digital Oscilloscope products for a variety of applications and markets.

IMI, a division of PCB Piezotronics, is a global designer and manufacturer of industrial vibration monitoring instrumentation such as accelerometers, vibration transmitters and switches.

IRISS focuses on what we do best by continuously improving infrared (IR) window, online monitoring devices and Ultrasound test equipment technology.

Solutions engineered for measurement and safe isolation of DC voltages upwards of 4800 V, and other transducers that offer precise conversion of AC voltage inputs to standard DC outputs.

Larson Davis core competencies include sound level meters, human vibration meters, dosimeters, calibrators, audiometric calibration systems, microphones and acoustic test systems.

High resolution, high performance non-contact displacement, distance, position, oscillation and vibration sensors for a wide variety of applications.

Leading LiDAR 1550nm LiDAR solutions enabling both detection and classification of objects out to 250 meters. Taking the guesswork out of autonomy!

Measurement Specialists of National Scale Technology, Inc. (MSNST) were established in 1982 and is located in Huntsville, Alabama. We are a woman owned manufacturer and supplier of COTS and custom load cells and tension links.

Moog Protokraft, a business unit of Moog Inc., leads the industry in developing innovative optoelectronic components and communication subsystems for harsh environments.

Vibration testing systems with air-cooled power amplifiers, slip tables with long-stroke options and 3-axis testing systems. Environmental chambers with temperature, humidity, and combined temperature, humidity and vibration.

The most comprehensive standard offering of DC Power Supplies from 750W to 15kW with parallel capability up to 60kW. Outputs up to 1500V are available with PC interface options as well Remote Analog Program/Monitor/Control capability.

Pressure sensors including standard duty pressure transmitters, high accuracy, differential, submersible, process transmitters, sanitary transducers, and special duty pressure sensors.
