Canadian – International Composites Conference
Advancing Composites in Addressing Global
Challenges of the 21st Challenge

Welcome to CANCOM 2024

We are preparing an exciting and educational agenda of academic and industry papers, presentations, activities and events for CANCOM 2024.

Southern Ontario is the industrial and manufacturing centre for Canada. The area is a global leader in innovation and technology, manufacturing and automation with more automobiles manufactured than any other area in North America. CANCOM 2024 will be hosted at the University of Waterloo, in Waterloo, Ontario, about one and a half hours West of Toronto. For information on getting to Waterloo as well things to do in the area, please go to our Website (www.cancom2024.ca/about). The area is rich in natural beauty and activities both indoor and outdoor.

We highly recommend to all our conference participants to attend Industry day at the Fraunhofer Innovation Platform for Composites (FIPC) in London, Ontario, which are planned to bring interactive discussions among participants from industry and academia! A bus will take attendees from Waterloo to London on the 6th of August. More information will be posted on <http://www.cancom2024.ca> and the CANCOM2024 Linked In page. We recommend you follow us on Linked In.

The Fraunhofer Innovation Platform for Composites, London Ontario

The conference will then move to the University of Waterloo, where we will host 3 days of papers and activities as well as a trade show, exhibit area. The agenda can be found on the www.cancom2024.ca website and will be updated as papers flow in and details are finalized.

The three day conference will be filled with academic and industry papers and presentations as well as a pitch corner. There will be a number of evening events including the Welcome Reception and Banquet to get to know your colleagues in the field.

Why you should exhibit at CANCOM

CANCOM 2024 will be focused on getting a high degree of student involvement to increase the interest of future generations in the composites field. We will also increase the international presence at Canada's leading composite conference. Canada is a country rich in material and human resources that we intend to showcase. Visitors from outside and within the region will be encouraged to enjoy many of the areas strengths. This is an opportunity to meet key players in the Canadian industry.

We have space for several booth spots to present your products, meet potential customers and composite peers. We hope you will join us with an exhibition table.

Sponsorship Options	Welcome Reception	Banquet Sponsor	Bronze Supporter	Silver	Gold	Platinum
Booth in Trade Show area (3 days @ U Waterloo)				✓	✓	✓
Logo on banners recognizing the sponsorship level	✓	✓	✓	✓	✓	✓
