Design Solution

The goal of this design is to create a carefree, yet bold atmosphere that highlights the classic mid-century elements of warmth, texture, and organic shapes. The space is bright from the moment you step in, embracing you in comfort. I have endeavored to combine the bold utilitarianism of sleek brutalism with mid-century contemporary warmth.

This design encompasses a well-appointed mix of contemporary and historic styles to provide balance and comfort. The design that culminates is the cultivation of worldliness from art, travels, music, and an appreciation of history at its finest, incorporating my clients' favorite elements into one cohesive environment. The space is well-curated to maximize their entertainment possibilities, and I hope their creativity will be inspired by it.
