Canada-Wide Declarations of Emergency

Empower Yourself – Business Owners and All Canadians
Understanding how the Declarations of Emergency have never existed
ALL CANADIAN PROVINCES & TERRITORIES

The following article is for general information only, and should not be construed as legal advice.

CRITICAL Information for Business Owners and All Canadians

Did you know that in order to make a Declaration of Emergency in any province or territory in Canada, that certain “conditions” must be met first? This would make sense, otherwise you could have mass pandemonium for nothing. Conditions are like the “safety” feature on a firearm. 100% necessary or else you could kill someone by accident.

However, this did not happen when each province and territory in Canada made their Declarations of Emergency.

What we are about to expose to you is this. None of the Canadian provinces and territories met any of the “conditions” to make a Declaration of Emergency. Further, they based their declarations on a “**predictive**” model from the UK that was outrageously over predicting the number of deaths in Canada.

In mid March 2020, each Canadian province and territory declared their respective Declarations of Emergency one right after another. Beginning on March 14 until March 27, 2020. Within 14 days, the entire country was locked down. Never before seen in our history.

On March 17, 2020 when the province of Ontario, for example, made its declaration of emergency, there was only 1 COVID-19 “related” death in Ontario, and 2 in all of Canada. In fact, the first COVID-19 “related” death was reported in British Columbia on March 9, 2020, a man in his 80’s with reported underlying [health conditions](#) (CBC). Ontario’s first COVID-19 “related” death occurred on March 11, 2020, a [77 year old man](#) (Global News).

With Canada’s population of nearly 38,000,000 and only 2 COVID-19 “related” deaths at that time, all provincial and territorial declarations were excessive, unreasonable, and unjustified.

With further and continual extensions to the Declarations of Emergency by all provinces and territories, it is now proven to be a sheer abuse of authority. The states of emergencies do not exist, and never existed.

Remember - All COVID Measures STARTED as a result of these Declarations of Emergency. Therefore, all COVID measures will END once these Emergency orders are terminated!

Why are we doing this?

Because we love our families and our country. Because all Canadians and all business owners will be subject to the NEXT second wave of unreasonable and unjustified lockdown measures. *Many small business owners simply will not survive.* Arm yourselves with this critical information so you can stand up and take your power back.

We will demonstrate to you, by using Ontario as a detailed example, how the Declaration of Emergency did not meet the “emergency” definition including specific criteria required to make this declaration. And that NO such emergency ever existed - then or now. We then follow up with information for all other provinces and territories in Canada, so that you can see for yourselves that the very same thing occurred.

ONTARIO

March 17, 2020 – Premier Ford made a “Declaration of Emergency” under section 7.0.1 of the Emergency Management and Civil Protection Act ([EMCPA](#)). In order to make this “declaration” though, the following 2 criteria needed to have been met under sub-section (3).

Sub-section (3) – there are 2 criteria for making a Declaration of Emergency:

Criteria 1:

There is an emergency that requires immediate action to prevent, reduce or mitigate a “**danger of major proportions**” that could result in serious harm to persons or substantial damage to property (this is the actual definition of “emergency”)

Our analysis:

- on March 17, 2020, there was only 1 COVID-19 “related” death in Ontario when the Premier declared this emergency
- with Ontario’s population of just over 14,745,000 – this criteria of “**danger of major proportions**” was not met
- **1 death does not constitute any “danger of major proportions”**
- **therefore, the Premier’s declaration was made in VIOLATION to the very definition of “emergency” under the EMCPA**

DEFINITION under the EMCPA:

“[emergency](#)” means a situation or an impending situation that constitutes a “**danger of major proportions**” that could result in serious harm to persons or substantial damage to property and that is caused by the forces of nature, a disease or other health risk, an accident or an act whether intentional or otherwise; (“situation d’urgence”)

Criteria 2:

ONE of the following 3 (iii) circumstances must exist in order to make this Declaration of Emergency:

Criteria 2 – circumstance (i):

The “resources” normally available to a ministry of the Government of Ontario or an agency, board or commission or other branch of the government, including existing legislation, “cannot be relied upon” without the risk of serious delay

Our analysis:

There are 2 meanings here:

#1 meaning – that the existing “emergency plans” were “not reliable”

- did you know that every Municipality in Ontario and the Government of Ontario itself must formulate an [emergency plan](#) under sections 3, 6, 8 or 8.1 of the EMCPA?
- and that they conduct training exercises each year in order to be fully prepared for any emergency
- and that this emergency plan is reviewed and revised each year
- **therefore, this “circumstance” under subparagraph (i) does not exist**

#2 meaning – that the “current medical system” could “not be relied on” to handle any crisis

- but wait, if the hospitals had not cancelled all surgeries and remained open for business as usual, then this “circumstance” would have existed
- but this did not happen
- in an effort to meet the “danger of major proportions” with this medical crisis, the hospitals cancelled all surgeries, and cleared beds waiting for a tsunami of COVID-19 patients that never came
- **therefore, this “circumstance” under subparagraph (i) also does not exist**

Criteria 2 – circumstance (ii):

The “resources” referred to in subparagraph (i) may be “insufficiently effective” to address the emergency

Our analysis:

- again, if the hospitals had remained open for business as usual, this “circumstance” would exist
- however, the hospitals cancelled all surgeries to ensure they would be “sufficiently effective” to address the emergency, of which never came
- **therefore, this “circumstance” under subparagraph (ii) also does not exist**

Criteria 2 – circumstance (iii):

It is not possible without the risk of serious delay, to “ascertain” whether the “resources” referred to in subparagraph (i) can be “relied upon”

Our analysis:

- our emphatic first response is, **REALLY?!**
- considering that the “resources” under subparagraph (i) are the [444 Municipalities](#), the Government of Ontario itself and the [384 hospitals](#) in Ontario
- considering the yearly review and training exercises of all emergency plans by municipal and provincial staff
- considering the cancellation of all surgeries by Ontario hospitals in their effort to meet this medical crisis (which never came)
- considering all of these extraordinary things the Government of Ontario was doing to keep Ontarians safe
- in light of all of the considerations that all parties went to in order to be “reliable” and ready for emergencies, **therefore, this “circumstance” under subparagraph (iii) also does not exist**
- **therefore, the declaration of emergency is also in VIOLATION of sub-section (3) which is the criteria for declaration.**

SUMMARY and CONCLUSION

THEN:

Total COVID-19 “related” deaths in Ontario on March 17, 2020 when declaration was first made = 1

1 death did not constitute a “danger of major proportions” out of a population of 14,745,040

NOW:

Current Ontario [COVID-19 "related" deaths](#) as of our reporting on December 31, 2021 = 4,530

Ontario population as of 2020 = 14,745,040

4,530 deaths do not constitute a “danger of major proportions”, especially when 84% of those deaths occurred in long-term-care homes, out of a population of nearly 15 MILLION people, and especially when the recovery rate is 99.9%!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR ONTARIO - THEN OR NOW

Further Analysis / Consideration

Fast forward to our update on December 31, 2021, there are 15,605 COVID-19 “related” deaths in [Canada](#) and considering our unchanged population of nearly 38,000,000, this represents **0.041%** of the population who have died [(15,605 / 38,000,000)*100].

Were you aware of how COVID-19 deaths have been classified? Anyone who died from a primary cause of death, like heart attacks, Alzheimer's, suicide, cancer – their death record was changed to COVID-19 if they had tested positive or showed symptoms. Does that seem ethical to you?

The latest data on Statistics Canada is only for [2018](#) which reported that 8,511 people died from influenza and pneumonia (respiratory disease/the flu). This number goes up on average about 1,200 deaths/year based on their previous years' records. Based on this average, 10,911 souls would be estimated to pass away from influenza in 2020. The data does not lie. We are in a typical flu season. And with the unethical classification of COVID-19 deaths, the actual death toll number is much lower.

We cannot shut an entire country down, cripple our economy, force mask-wearing on every citizen, poison them with [banned hand sanitizers](#), all in the name of a typical seasonal death toll. Our Canadian brothers and sisters are now afraid of human contact! They have been conditioned to fear everyone, even their own family members. This is just so wrong. We are social creatures - we need social interaction, human touch in order to survive and thrive. The mass propaganda that anyone and everyone could be “asymptomatic” is criminal.

Declarations of Emergencies called on Predictive Basis

We now know that all the provinces and territories made their respective Declarations of Emergency based on an [international predictive model](#) from Professor Neil Ferguson of Imperial College London UK on March 16, 2020. His report warned that **tens of millions would die** in a pandemic that was compared to the Spanish flu, the deadliest epidemic in modern times. Two days later, the US-Canada border closed to ‘non-essential’ travel, and one week after that, Prime Minister Trudeau announced an \$82 BILLION aid package to address the massive job losses expected from the lockdowns.

Predictive vs Reality

Ferguson projected that, unmitigated, **COVID-19 would kill 326,000 people in Canada** this year. That would be **0.861% of Canada's population** [(326,000 / 37,855,621)*100]. As of December 31, 2021 there have been **15,605 COVID-19 "related" deaths in Canada** or **0.041%**, and **4,530** in Ontario or **0.030%**. We don't know about you, but that is a VAST difference and one that can no longer be ignored. Stats Canada only has data up until 2018 - 8,511 influenza deaths (the flu). Given that 2019 is not published for whatever reason, it would appear that the COVID-19 "related" deaths for 2020 are in par with reported Canadian government statistics.

- Predictive = **326,000** COVID-19 deaths or **0.861%** of Canada's populations would occur
- *Reality = **15,605** COVID-19 "related" deaths or **0.041%** of **Canada's** population / **4,530** COVID-19 "related" deaths or **0.030%** in **Ontario** did happen
 - *As of December 31, 2021, there are 15,605 COVID-19 "related" deaths for 2020 in Canada; this is still in par with latest reported Canadian government statistics on annual deaths for influenza which was 8,511 deaths in **2018**

Counting the Continual Declarations of Emergency in ONTARIO

So, let's say that we would call the FIRST Declaration of Emergency as an act of "good faith". That our provincial governments were acting in the best interest of Canadians with the information they had at hand during that time. Heck, we could even go so far as to say they were still acting in good faith for the SECOND and *maybe* even the THIRD Declaration of Emergency. But what about the FOURTH, FIFTH and SIXTH and now with continual lockdown for one year at a time now?

- | | | |
|-------------------------------------|---|------------------|
| • 1 st s. 7.0.7(1) EMCPA | 14 days only | Mar 17-30/20 |
| • 2 nd s. 7.0.7(2) EMCPA | 1 further extension 14 days only | Mar 31-Apr 13/20 |
| • 3 rd s. 7.0.7(3) EMCPA | additional periods no more than 28 days | Apr 14-May 11/20 |
| • 4 th s. 7.0.7(3) EMCPA | additional periods no more than 28 days | May 12-Jun 8/20 |
| • 5 th s. 7.0.7(3) EMCPA | additional periods no more than 28 days | Jun 9-Jul 6/20 |
| • 6 th s. 7.0.7(3) EMCPA | 14 days this time | Jul 7-20/20 |

When it is all going to end?

Good question. Are you wondering like us, how long this can go on for? Seems like the powers shifted from the Premier to the Lieutenant Governor in Council (LGC) (*and you wonder why most Canadians are confused with this stuff!!!*) under section 7.0.7 Termination of Emergency.

Turns out that under this section that the LGC holds all the cards now. The LGC under section 7.0.7(1) "an emergency declared under section 7.0.1 (by the Premier of Ontario), is terminated at the end of the 14th day following its declaration UNLESS the LGC by order declares it to be terminated at an earlier date.

According to s.7.0.7(4) "If there is a resolution before the Assembly to extend the period of the emergency, the declaration of emergency shall continue until the resolution is voted on." Huh? Who is the "Assembly"? They are the MPP's who you elect and who sit in the Ontario House of Commons.

Seems that the Assembly may have powers to END the declaration of emergency because according to section 7.0.9(1) "Despite section 7.0.7, the Assembly may by resolution disallow the declaration of emergency under section 7.0.1 (made by the Premier) or the extension of emergency." Maybe give your

MPP a phone call if you want the declaration of emergency to end. Seems they DO have more power than they may have been telling their constituents.

Emergency Powers Shifts from EMCPA to Reopening Ontario Act

The extensions of emergency now pass from the EMCPA to the NEW **Reopening Ontario Act** (or Bill 195) that came into force on July 21, 2020. In case you didn't know the significance of this, it gives the provincial government extraordinary powers to **keep Ontarians in a state of emergency for one year at a time** under section 8.(2) of the Reopening Ontario Act (rather than approving every 28 days under the EMCPA). How can we possibly REOPEN Ontario if we are continually in a state of emergency for one year at a time now? Was anyone paying attention to this when it was being voted on? Did your MPP fully disclose these extraordinary powers under this new Bill to you? At some point the declaration of emergency must end. The expressed understanding of an emergency is that it is temporary. These continual extensions of emergency give NO sight in end to the "temporary" emergency.

What was the Point of all this Information?

To bring you up to speed on what date the provincial governments had real-time Canadian data, that the "predictive" model was outrageously overstated and no longer valid. Since we know that the majority of those COVID-19 "related" deaths occurred between April-May 2020, almost 6 months later, the government can no longer keep us in a state of emergency based on their original predictive model.

The real-time Canadian data proves this. As of December 31, 2021, there have only been 15,605 COVID-19 "related" deaths in Canada, NOT the whopping 326,000 predicted deaths. And of that total, 4,530 COVID-19 "related" deaths occurred in Ontario of which 84% happened in long-term care homes.

Therefore, the Ontario provincial government can no longer justify the continued state of emergency because they have had data since April/May which confirms that the predictive model for making the original declaration of emergency is NO LONGER VALID. Their actions, beyond any "good faith" period of the 1st 28 days of lockdown, are now in fact done in "bad faith".

World Health Organization (WHO) declare ASYMPTOMATIC people

Did you know that the World Health Organization (WHO) retracted their position on asymptomatic people? They now declare they are NOT contagious! But the damage has already been done. Many people around the world, including Canadians, do not know this information.

Why the government never talks about our natural immune system, our [immune response to COVID-19](#) is completely irresponsible and reckless. Our bodies (our immune system) are designed to fight off viruses! And finally... why the government never talks about the 99.9% recovery rate is now becoming criminal negligence.

But WAIT! What about ALL of the people who are testing positive?

This is totally irrelevant. Why? Because we have a 99.9% recovery rate. The only people who will die with virus related complications, like the flu, are people with very compromised immune systems. Their immune system is already very weak and another hit to it is too much for the body to take. Thus, they die "with" the virus, not from it. The mass number of people testing positive is ONLY another fear tactic! The provincial and territorial governments are using testing as justification for the continuation of the states of emergencies.

Introducing “All-Cause Mortality”

All you ever need to be concerned about is the “all-cause mortality” number. This means the total number of deaths, for all causes. This number has not changed as compared from this year to last! Why is this significant? Because if the “all-cause mortality” number has NOT gone up, it means that there are NO new diseases killing anyone. The data does not lie. Here is a [video presentation](#) of all-cause mortality by Denis Rancourt, researcher of the Ontario Civil Liberties Association, displaying graphs of this data.

And in consideration of the fact that [10 Canadian experts](#) confirm that there is **NO evidence of viral isolation** [Health Canada, National Research Council of Canada, Vaccine and Infectious Disease Organization-International Vaccine Centre, McGill University, Region of Peel (Ontario), University of Toronto, Sunnybrook Health Sciences Centre, McMaster University and Mount Sinai Hospital (Toronto Ontario)]. These facts were brought to light, thanks to the amazing research done by Canadian Christine Massey, who filed 7 Freedom of Information (FOI) requests. Additionally, 2 world experts also confirm NO evidence of viral isolation - Australia and UK.

The probability of dying with this virus is 0.00041. Compare this to heart disease which is a 1 to 4 ratio. Your odds of dying from heart disease is MUCH greater than dying with this virus.

Fear is being used as the #1 motivator to have people and businesses follow along with all of the unlawful orders the Government and Public Health Officer's are making.

The **extended** state of emergency under the Ontario EMCPA is not justified. It was never justified. The lack of deaths proves that this state of emergency is non-existent.

It is very important to understand the information we have shared with you about how the state of emergency was declared. Because all of the provincial and territorial governments will resume lock-down measures with the “second wave” they are predicting this autumn / winter. They will use the same “state of emergency” justification. Except this time, they will justify it with “cases” and not deaths.

Do you think you can survive another second wave of forced business closures? Again, you need to ask yourself if any of these overwhelming abuses of authority, violations to our Canadian Charter of Rights and Freedoms, coupled with the BILLIONS of Canadian tax-payer dollars spent on “COVID-19 measures” – is this really justified with only 15,605 COVID-19 “related” deaths out of a population of early 38,000,000? **This is completely illogical.**

PROVINCIAL / TERRITORIAL DECLARATIONS

Below are the remaining Canadian provinces and territories who also declared a state of emergency. **Please take note of the number of deaths, THEN and NOW per province.** *It will shock you.* Also, please read the definitions for “emergency” or the requirements to take such action and decide for yourself if any emergency existed at all. As we update this document when we can, you can always find out the actual daily total of COVID-19 “related” deaths from the Canadian government by clicking [HERE](#).

NEWFOUNDLAND AND LABRADOR

March 18, 2020 – the Newfoundland and Labrador Minister of Health, John Haggie, signed a Declaration of a Public Emergency (“Declaration”) under section 27 of the [Public Health Protection and Promotion Act](#) (“the Act”), on the advice of the Newfoundland and Labrador Chief Medical Officer of Health.

27. (1) The minister, on the advice of the Chief Medical Officer of Health, may declare a public health emergency in all or a part of the province where the minister is satisfied that
(a) a **“public health emergency exists”**; and
(b) the public health emergency cannot be sufficiently mitigated or remedied without the implementation of the special measures available under section 28.

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in NFLD and Labrador on March 18, 2020 when declaration was first made
= **0**

0 deaths did not constitute a “public health emergency exists” out of a population of 521,542

NOW

Current NFLD and Labrador COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **4**

NFLD and Labrador’s population as of 2020 = 521,542

4 deaths do NOT mean a “public health emergency exists”!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NEWFOUNDLAND AND LABRADOR - THEN OR NOW

**STAND UP
CANADA**

**DEBOUT
CANADA**

PRINCE EDWARD ISLAND (PEI)

March 16, 2020 – Premier Dennis King declared a public health emergency under [section 9 of the Emergency Measures Act](#).

STATES OF EMERGENCY

9 – Declaration, state of emergency

(1) The Minister may at any time, when he is satisfied that an emergency exists or may exist, declare a state of emergency in respect to all or any area of the province. Definition (c) “[emergency](#)” means a “**present**” or “**imminent**” event in respect of which the Minister or municipality believes prompt co-ordination of action or special regulation of persons or property must be undertaken to protect the health, safety or welfare of people or to limit damage to property

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in PEI on March 16, 2020 when declaration was first made = **0**

0 deaths did not constitute a “present or imminent event” out of a population of 156,947

NOW

Current PEI COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **0**

PEI population as of 2020 = 156,947

0 deaths do NOT mean there is any “present” or “imminent” emergency event!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR PRINCE EDWARD ISLAND - THEN OR NOW

STAND UP  **DEBOUT**
CANADA **CANADA**

NOVA SCOTIA

March 22, 2020 – Nova Scotia Premier Stephen McNeil declared a state of emergency under [section 12\(1\) of the Emergency Management Act](#).

DEFINITION: (b) “**emergency**” means a “**present**” or “**imminent**” event in respect of which the Minister or a municipality, as the case may be, believes prompt co-ordination of action or regulation of persons or property must be undertaken to protect property or the health, safety or welfare of people in the Province.

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in Nova Scotia on March 22, 2020 when declaration was first made = **0**

0 deaths did not constitute a “present or imminent event” out of a population of 971,395

NOW

Current Nova Scotia COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **65**

Nova Scotia population as of 2020 = 971,395

65 deaths do NOT mean there is a “present” or “imminent” emergency, particularly when 53 of those deaths occurred in the same long-term care home (Northwood) in Halifax!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NOVA SCOTIA - THEN OR NOW

STAND UP  **DEBOUT**

NEW BRUNSWICK

March 19, 2020 – Premier Blaine Higgs declared a state of emergency under [section 10 \(1\) of the Emergency Measures Act](#).

DEFINITION: “**emergency**” means a “**present**” or “**imminent**” event in respect of which the Minister or municipality, as the case may be, believes prompt coordination of action or regulation of persons or property must be undertaken to protect property, the environment or the health, safety or welfare of the civil population.

STATES OF EMERGENCY

Declaration:

10(1) When the Minister is satisfied that an emergency exists or may exist, the Minister may declare a state of emergency at any time with respect to all or any area of the Province.

10(2) When a municipality is satisfied that an emergency exists or may exist in all or any area of the municipality, it may declare a state of local emergency in respect of the municipality or the area of the municipality.

10(3) A declaration under this section shall identify the nature of the emergency and the area in which it exists.

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in New Brunswick on March 19, 2020 when declaration was first made = **0**

0 deaths did not constitute a “present or imminent event” out of a population of 776,827

NOW

Current New Brunswick covid-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **9**

New Brunswick population as of 2020 = 776,827

9 deaths do NOT mean there is a “present” or “imminent” emergency!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NEW BRUNSWICK - THEN OR NOW

**STAND UP

QUEBEC

March 14, 2020 – Québec Premier Francois Legault declared a public health emergency under [s. 118 of the Public Health Act](#). Certain measures in this Act are intended to enable public health authorities to engage in public health monitoring activities and to give public health authorities the power to take action in cases where the health of the population is threatened. In this Act, a “**threat**” to the **health of the population** means the presence within the population of a biological, chemical or physical agent that may cause an “**epidemic**” if it is not controlled.

SUMMARY and CONCLUSION

THEN

Total COVID-18 “related” deaths in Québec on March 14, 2020 when declaration was first made = **0**

0 deaths did not constitute a “threat” to the health of the population by the presence within the population of a biological, chemical or physical agent that may cause an “epidemic” out of a population of 8,485,000

NOW

Current Québec COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **8,226**

Québec population as of 2020 = 8,485,000

8,226 deaths do not constitute any “threat” to the health of the population that may cause an “epidemic”, especially when more than 80% of those deaths occurred in long-term-care homes, out of a population of nearly 8.5 MILLION people, and especially when the recovery rate is 99.9%!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR QUEBEC - THEN OR NOW

STAND UP  DEBOUT
CANADA CANADA

MANITOBA

March 20, 2020 – The Manitoba government declared a province-wide state of emergency under The [Emergency Measures Act](#) under section 10 which states: the government may declare a state of emergency in respect to all or any part of the province in the event of a major emergency or disaster.

DEFINITION: “**emergency**” means a “**present**” or “**imminent**” situation or condition that requires prompt action to prevent or limit.

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in Manitoba on March 20, 2020 when declaration was first made = **0**

0 deaths did not constitute a “present or imminent” situation or condition that required prompt action to prevent or limit, out of a population of 1,369,000

NOW

Current Manitoba COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **667**

Manitoba population as of 2020 = 1,369,000

667 deaths do NOT mean there is a “present” or “imminent” emergency, especially when the recovery rate is 99.9%!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR MANITOBA - THEN OR NOW

SASKATCHEWAN

March 18, 2020 – the Government of Saskatchewan declared a state of emergency pursuant to section 17 of The [Emergency Planning Act](#) (available only as a downloadable PDF).

DEFINITION: “**emergency**” means:

(i) a “**calamity**” caused by:

- (A) accident;
- (B) act of war or insurrection;
- (C) terrorist activity as defined in the Criminal Code;
- (D) forces of nature; or

(ii) a “**present**” or “**imminent**” situation or condition, including a threat of terrorist activity as defined in the Criminal Code, that requires prompt action to prevent or limit:

- (A) the loss of life;
- (B) harm or damage to the safety, health or welfare of people; or
- (C) damage to property or the environment;

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in Saskatchewan on March 18, 2020 when declaration was first made = **0**

0 deaths did not constitute a “calamity” or “present or imminent” situation, out of a population of 1,181,897

NOW

Current Saskatchewan COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **155**

Saskatchewan population as of 2020 = 1,181,987

155 deaths do NOT mean there is any “calamity” and “present” or “imminent” emergency, especially when the recovery rate is 99.9%!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR SASKATCHEWAN - THEN OR NOW

BRITISH COLUMBIA (BC)

March 18, 2020 – The declaration of a provincial state of emergency in B.C. pursuant to [subsection 9.\(1\) of the Emergency Program Act](#).

DEFINITION: “**emergency**” means a “**present**” or “**imminent**” event or circumstance that
(a) is caused by accident, fire, explosion, technical failure or the forces of nature, and
(b) requires prompt coordination of action or special regulation of persons or property to protect the health, safety or welfare of a person or to limit damage to property

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in BC on March 18, 2020 when declaration was first made = 1

1 death did not constitute a “present or imminent” event or circumstance, out of a population of 5,100,000

NOW

Current BC COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **901**

BC population as of 2020 = 5,100,000

901 deaths out of a population of 5.1 MILLION people definitely does NOT mean there is any “present” or “imminent” emergency, especially when the recovery rate is 99.9%!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR BRITISH COLUMBIA - THEN OR NOW

**STAND UP
CANADA**

**DEBOUT
CANADA**

NORTHWEST TERRITORIES (NWT)

March 24, 2020 – The Northwest Territories' Minister of Municipal and Community Affairs declared a territory-wide state of emergency pursuant to 14 of its [Emergency Management Act](#).

DEFINITION: “**emergency**” means a “**current**” or “**imminent**” event that requires prompt coordination of action or special regulation of persons or property in order to protect the safety, health or welfare of people or to limit or prevent damage to property or the environment; (situation d’urgence)

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in NWT on March 24, 2020 when declaration was first made = **0**

0 deaths did not constitute a “current or imminent” event, out of a population of 44,982

NOW

Current NWT COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **0**

NWT population as of 2020 = 44,982

0 deaths do NOT mean there is any “current” or “imminent” emergency!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NORTHWEST TERRITORIES - THEN OR NOW

STAND UP  **DEBOUT**
CANADA **CANADA**

NUNAVUT

March 18, 2020 – Nunavut issued a declaration of a public health emergency under its [Public Health Act](#), Part 5, section 40 (available only as a downloadable PDF).

DEFINITION:

“health hazard” means

(a) a condition, a substance, a thing or an activity that

(i) **“threatens”** or may **“reasonably”** be expected to threaten public health, or

(ii) interferes or may reasonably be expected to interfere with the suppression of diseases, injuries, contaminants or other risks to public health

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in Nunavut on March 18, 2020 when declaration was first made = **0**

0 deaths did not constitute a “threat” or even “reasonably” be expected to threaten public health, out of a population of 38,780

NOW

Current Nunavut covid-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **1**

1 death does NOT mean there is any “threat” or even any “reasonable threat” to the public!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NUNAVUT

**STAND UP
CANADA**

**DEBOUT
CANADA**

YUKON

March 27, 2020 – The Government of Yukon declared a state of emergency under the [Civil Emergency Measures Act](#) under Section 6 (1). Declaration and term of state of emergency

6(1) The Commissioner in Executive Council may declare that a state of emergency exists in the Yukon or in any part thereof “if” informed that “**a war emergency exists**” or if the Commissioner in Executive Council is of the opinion that a “**peace time disaster**” exists.

DEFINITION: “**war emergency**” means the state existing as a result of a proclamation issued by Her Majesty or under authority of the Governor in Council that war, invasion or insurrection, real or apprehended, exists
“**peacetime disaster**” means a disaster, real or apprehended, resulting from fire, explosion, flood, earthquake, landslide, weather, epidemic, shipping accident, mine accident, transportation accident, electrical power failure, nuclear accident or any other disaster not attributable to enemy attack, sabotage or other hostile action whereby injury or loss is or may be caused to persons or property in the Yukon

SUMMARY and CONCLUSION

THEN

Total COVID-19 “related” deaths in the Yukon on March 27, 2020 when declaration was first made = **0**

0 deaths did not constitute a “war emergency exists” or that a “peacetime” disaster exists, out of a population of 35,874

NOW

Current Yukon COVID-19 “related” [deaths](#) as of our reporting on December 31, 2021 = **1**

Yukon population as of 2020 = 35,874

1 death does NOT mean there is any “war emergency exists” or that a “peacetime” disaster even exists! We’re sorry, but this last one really made us laugh. Is anyone even paying attention to this in the Yukon, let alone the rest of Canada? You can’t make this stuff up!

THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR YUKON - THEN OR NOW

STAND UP  **DEBOUT**
CANADA **CANADA**

PROVINCIAL / TERRITORIAL SUMMARY

Most people are visual, so we are including a summary list of all the COVID-19 “related” deaths by province and territory. ***This should shock and enrage you!*** We will keep this list updated. Here are the updated COVID-19 “related” deaths as we report on December 31, 2021. Please note that we have left the population numbers the same, as reported for 2020 in general. Since our reporting may be slightly behind the actual daily totals, you can find out this information by clicking [HERE](#).

<u>Provinces/Territories</u>	<u>Covid "Related" Deaths</u>	<u>Populations</u>
ONTARIO	4,530	14,745,040
NEWFOUNDLAND	4	521,542
PRINCE EDWARD ISLAND	0	156,947
NOVA SCOTIA	65	971,395
NEW BRUNSWICK	9	776,827
QUEBEC	8,226	8,485,000
MANITOBA	667	1,369,000
SASKATCHEWAN	155	1,181,987
ALBERTA	1,046	4,428,247
BRITISH COLUMBIA	901	5,100,000
NORTHWEST TERRITORIES	0	44,982
NUNAVUT	1	38,780
YUKON	1	35,874
TOTALS	15,605	37,855,621

Overwhelming Conclusion

The Emperor has no clothes!

NONE of the Canadian provinces or territories were ever in a state of “emergency” back in March 2020 when they each declared one.

NO PROVINCE OR TERRITORY HAS EVER BEEN IN A STATE OF EMERGENCY – THEN OR NOW!

The original and continual extensions to the provincial and territories states of emergencies are unlawful, unreasonable, and unjustified. The continual extensions are a gross **ABUSE OF POWER, FORCE AND AUTHORITY!** Are you not shocked and outraged with the evidence you see here?

The wording is very clear – “**present**” which means “**existing or occurring now**”; “**imminent**” which means “**about to happen**”. None of it occurred in the present moment and none of it occurred in the future. You simply cannot call a state of emergency for a virus with a 99.9% recovery rate.

We ought to be asking ourselves, what exactly happened to those elderly people in the Long-Term Care homes? Do you realize that by being SILENT against this tyranny, makes you complicit? This means that you are now PART OF THE PROBLEM. Please, if you love your children, your grandchildren, your grandparents, your family, your friends and neighbours, your community, your Country – STOP BEING SILENT!

People or governments ONLY hold power over you for as long as YOU LET THEM. So, when are you going to take your power back? At what point will you stand up and say NO? We believe that all Canadians in each Province and Territory should UNITE and DECLARE that these declarations are illegitimate.

Remember - all COVID-19 measures START and END with these declarations of emergency!

Do you understand the significance of the above? ALL of the COVID-19 measures (closures of “non-essential businesses”) for which there is NO definition to be found on any gov’t website); reduced number of people in stores, venues, homes; self-quarantine; mandatory masks; temperature taking; asking for you ID; mandatory vaccines; social distancing; testing!) – **ALL THESE MEASURES will be OVER when these declarations of emergencies have been terminated.** Perhaps because it has been over **9 MONTHS** now that we have lived this way, that you may now believe this is the “new normal” that has been shoved down our throats since this all began. But this is not living. **There is NOTHING NORMAL about any of this.** Not even close. And all for a virus with a 99.9% recovery rate.

ALL covid measures BEGIN with these declarations! AND they will ALL END with the termination of these declarations! But it will only happen if WE say its over!

Given that there are nearly 38,000,000 Canadian souls in this glorious and free country we proudly call home, and that there are only a handful of people who are abusing their authority – the power is with the PEOPLE. That’s the way Canada’s democratic society is supposed to work. Not tyranny. Not blatant abuse of power. **THE PEOPLE OF CANADA HAVE THE POWER – NOT THE GOVERNMENT.**

Freedom is our birth right. We don’t need to ask anyone for it – its already ours. If you are waiting for someone to give you your freedom back, that is never going to happen. You are already free. You just need to BELIEVE this in order to take your power, your freedom back. No one can give that to you, except you.

Your BELIEFS are THE most powerful force on the planet. And the government knows this. All institutions who seek to dominate and control you know this. They would lose 100% control of society if people BELIEVED they were free.

The revolution you seek is never external. *It is always internal.* The revolution then becomes the revelation of your innate powers. We believe that knowledge is *potential power.* But **knowledge has no power without action.** And so, our purpose has been fulfilled by giving you this knowledge... the rest is up to you.

So now that you have this knowledge, what are you going to do with it?
