# Canada-Wide Declarations of Emergency

## Were the Criteria Met for Declaring these Emergencies? ALL CANADIAN PROVINCES & TERRITORIES

Published: September 3, 2020

Updated: December 15, 2021

*The following article is for general information only, and should not be construed as legal or medical advice.*

### CRITICAL Information for All Canadians – Emergency Declarations are Illegal

Everyone in Canada needs to understand that all of the emergency declarations in each and every province and territory are illegal. This isn't as complicated as you may think to understanding this. Our purpose is to expose this information so that you will do something about it. To help with that, we've created a PDF DOWNLOAD of this page so that you can share it with your friends and family, your MPP's / MLA's and your Premier's.

Let's begin.

Have you ever wondered what it actually takes to make such a declaration, if only out of curiosity?

We did. And we were quite surprised by what we found. These are our findings from a purely analytical and evidence-based approach.

Did you know that in order to make a Declaration of Emergency in any province or territory in Canada, that **certain "conditions" must be met first**? This would make sense, otherwise you could have mass pandemonium for nothing. Conditions are like the "safety" feature on a firearm. 100% necessary or else you could kill someone by accident.

However, this did not happen when each province and territory in Canada made their Declarations of Emergency back in March 2020 (and continually ever since), predicated on the *existence of a lethal virus*.

- go to end of page to read the #1 major inconsistency: Virus has never been isolated and to watch the VIDEO testimony by Christine Massey, Canadian researcher and bio-statistician
- go to end of page to read major inconsistency #2: COVID-19 Deaths Combined into one Grand Total

When we examined the criteria, it was clear that **NONE of the Canadian provinces and territories met any of the “conditions” to make a Declaration of Emergency** back in March 2020. Did you know that they based their initial declarations on a “**predictive**” model from the UK that was outrageously over predicting the number of deaths in Canada? UK predictive model stated that 326,000 Canadians would die from COVID-19 virus in 2020.

In mid March 2020, each Canadian province and territory declared their respective Declarations of Emergency one right after another. Beginning on March 14 until March 27, 2020. Within 14 days, the entire country was locked down. Never before seen in our history.

- March 14 – Québec
- March 16 – Prince Edward Island
- March 17 – Ontario & Alberta
- March 18 – Newfoundland, Saskatchewan, British Columbia & Nunavut
- March 19 – New Brunswick
- March 20 – Manitoba
- March 22 – Nova Scotia
- March 24 – North West Territories
- March 27 – Yukon

## Here is what happened in Ontario

Did you know that there have been three declared emergencies in Ontario?

- 1<sup>st</sup> March 17, 2020
- 2<sup>nd</sup> January 12, 2021
- 3<sup>rd</sup> April 7, 2021

We need to take this back to the beginning - the original declaration of emergency back in 2020.

On March 17, 2020 when the province of Ontario made its declaration of emergency, there was only 1 COVID-19 related death in Ontario, and 2 in all of Canada. In fact, the first COVID-19 related death was reported in British Columbia on March 9, 2020, a man in his 80’s with reported underlying [health conditions](#) (CBC). Ontario’s first COVID-19 related death occurred on March 11, 2020, a [77 year old man](#) (Global News).

Why are we and the government referring to COVID-19 deaths as “**related**”? Because of the way the governments are classifying deaths. By their method and admission, there is no way to know for certain how many people have died “from” this virus. Detailed information can be found under the heading “**Unethical Classification of COVID-19 Deaths**” on our “[COVID-19 Inconsistencies](#)” page. As such, COVID-19 “**related**” deaths mean that there are X number of people who may have had COVID when they died.

With Canada’s population of nearly 38,000,000 and only 2 COVID-19 related deaths at that time, all provincial and territorial emergency declarations were excessive, unreasonable, and unjustified.

## Why are we reporting on this?

Because there are a lot of inconsistencies that don't support the Covid-19 narrative. Because more and more people are questioning if the measures are causing more harm than good. Because all Canadians and all business owners are now subject to the **SECOND, THIRD and continuous** waves of unreasonable and unjustified lockdown measures. *Many small business owners simply will not survive this ~~first, second, third~~ lockdown.*

Arm yourselves with this critical information so you can stand up and take your power back.

We will demonstrate to you, by using Ontario as a detailed example, how the Declaration of Emergency did not meet the "emergency" definition, including specific criteria required to make this declaration. Identifying that NO such emergency ever existed - *then or now.*

We will include a macro-level analysis for all other provinces and territories in Canada so that you can see for yourselves how the very same unjustified emergency declarations occurred.

We will end this report with a list of **19 MAJOR INCONSISTENCIES** of further evidence that does not support the Covid-19 narrative. All of these inconsistencies fall on the heels of all of these illegal emergency declarations. However, on this page we will focus on the first 2 major inconsistencies noted at the end - the **virus** and the **number of deaths**, because the emergencies were declared *predicated* on these 2 factors.

## ONTARIO – FIRST EMERGENCY DECLARATION

### Declaration Requirements & Analysis

March 17, 2020 – Premier Ford made a "Declaration of Emergency" under section 7.0.1 of the Emergency Management and Civil Protection Act ([EMCPA](#)).

#### Our Analysis

In order to make this "declaration" though, the following two criteria needed to have been met under sub-section 7.0.1 (3).

#### Criteria for declaration

7.0.1 (3) *An order declaring that an emergency exists throughout Ontario or any part of it may be made under this section if, in the opinion of the Lieutenant Governor in Council or the Premier, as the case may be, **the following criteria are satisfied:***

7.0.1 (3) 1. *There is an emergency that requires **immediate** action to prevent, reduce or mitigate a **danger of major proportions** that could result in serious harm to persons or substantial damage to property.*

#### Our Analysis

##### THEN

- on March 17, 2020, there was only 1 COVID-19 related death in Ontario when the Premier declared the first provincial emergency

- “**immediate**” constitutes the “present time”, not a future anticipated event; 1 death at that date in time did not constitute “immediate” action which needed to have been taken
- 1 death did not constitute any “**danger of major proportions**” in consideration of Ontario’s population of just over 14,745,000
- **therefore, the criteria under 7.0.1 (3) 1. That there is an emergency that requires “immediate” action to prevent, reduce or mitigate a “danger of major proportions”, was not met thereby making the Premier’s declaration unjustified**

#### NOW

- on December 15, 2021, the government is claiming there were 11,682 COVID-19 related deaths but they are combining two years which is misleading; they must be split by year
- (\***Imperative note:** see the **over-inflated and unethical** reporting of deaths for Ontario under the section “[Unethical Reporting of Covid-19 Deaths](#)”)
  - 2020 – as at December 31, 2020, there were **4,576** COVID-19 related deaths
  - 2021 – as at December 15, 2021, there were **5,517** COVID-19 related deaths
- “**immediate**” constitutes the “present time”, not a future anticipated event; **5,517** deaths for 2021 or even **11,682** deaths for 2020 and 2021, at this present date in time, does not constitute any “**immediate**” action which needs to be taken, especially when majority of those 2020 deaths occurred in long-term-care homes, AND out of a population of nearly 15 MILLION people, including when the recovery rate is 99.9%
- **legal precedence** has been established in Ecuador on January 2, 2021 in this respect:
  - *“The Court found that the president based the state of emergency on a possible **future risk and not a current one**, without sufficient, clear and specific information. Since states of exception operate in the face of current and certain circumstances, the actual occurrence of the events was not justified.*
  - *The court ruled to declare Decree No. 1217 **unconstitutional**”*
- the only “**immediate**” action the Ontario government should have taken was to protect our most vulnerable citizens, namely the elderly in long-term care homes, by implementing their annual emergency plans which should have had this plan of action already established (to protect the vulnerable in an emergency)
- **5,517** deaths for 2021 or even **11,682** deaths for 2020 and 2021 does not constitute a “**danger of major proportions**”, especially when majority of those 2020 deaths occurred in long-term-care homes, AND out of a population of nearly 15 MILLION people, including when the recovery rate is 99.9%
- **therefore, the criteria under 7.0.1 (3) 1. That there is an emergency that requires “immediate” action to prevent, reduce or mitigate a “danger of major proportions”, was not met (again) thereby making the Premier’s declaration unjustified**

#### 7.0.1(3) 2. **One of the following circumstances exists.**

##### **Our Analysis**

Starts to get a little complicated now; only ONE of three circumstances involving their “resources” must exist under this second Criteria – let’s examine these to see if any actually exist.

7.0.1 (3) 2.i. The **resources** normally available to a ministry of the Government of Ontario or an agency, board or commission or other branch of the government, including existing legislation, **cannot be relied upon** without the risk of serious delay.

### Our Analysis

There are several possible meanings – here are two of ours:

1st – that the existing “**emergency plans**” were “**not reliable**”

- did you know that every Municipality in Ontario and the Government of Ontario itself must formulate an emergency plan under sections 3, 6, 8 or 8.1 of the EMCPA?
- and that they conduct training exercises each year in order to be fully prepared for any emergency
- and that this emergency plan is reviewed and revised each year
- **therefore, circumstance under 7.0.1 (3) 2.i. does not exist because they had emergency plans in place that they would have been deemed reliable (otherwise, what is the point in having an emergency plan if you don’t think its reliable), which would have meant that no declaration of emergency would have been needed**

2nd – that the “**current medical system**” could “**not be relied on**” to handle any crisis

- but wait, if the hospitals had not cancelled all surgeries and remained open for business as usual, then this “circumstance” would have existed
- but this did not happen
- in an effort to meet the “**danger of major proportions**” with the “future anticipated” medical crisis, the hospitals cancelled all surgeries, and cleared beds waiting for a tsunami of COVID-19 patients that never came (due to inaccurate modelling – UK and Command Table; all projected “future anticipated” deaths)
- Ontario Hospitals Occupancy (Daily Average %) – Decline Since 2017
  - Dec 2017 – 94.5%
  - Dec 2018 – 94.8%
  - Dec 2019 – 95.0%
  - Dec 2020 – 84.4%
  - Jan 6 2021 – 87.6%
- Ontario ICU Occupancy (Daily Average%) – Decline Since 2017
  - Dec 1-16 2017 – 86.66%
  - Dec 1-16 2018 – 91.21%
  - Dec 1-16 2019 – 83.51%
  - Dec 1-16 2020 – 80.84%
  - Jan 1-13 2021 – 81.60%
- **therefore, circumstance 7.0.1 (3) 2.i. does not exist because the medical system took evasive action to deal with possible overwhelm, and hospitals and ICU occupancies are already below average as compared to previous years, thereby making the health care system reliable to handle any emergency**

7.0.1 (3) 2.ii. The “**resources**” referred to in subparagraph (i) may be “**insufficiently effective**” to address the emergency.

### Our Analysis

- again, if the hospitals had remained open for business as usual, this “circumstance” would exist
- however, the hospitals cancelled all surgeries to ensure they would be “sufficiently effective” to address the emergency, of which never came
- hospital and ICU capacity are below average since 2017
- **therefore, circumstance 7.0.1 (3) 2.ii. also does not exist because they took strategic actions to ensure the health care system would not be overwhelmed; their medical system for capacity has been below average since 2017, thereby making them sufficiently effective to handle this emergency**

7.0.1 (3) 2.iii *It is not possible without the risk of serious delay, to **ascertain** whether the **resources** referred to in subparagraph (i) can be **relied upon**.*

### Our Analysis

- our emphatic first response is, **REALLY?!**
- considering that the “resources” under subparagraph (i) are the 444 Municipalities, the Government of Ontario itself and the 384 hospitals in Ontario – with all of their elected officials, public servants and hospital staff
- considering the yearly review and training exercises of all emergency plans by municipal and provincial staff
- considering the cancellation of all surgeries by Ontario hospitals in their effort to meet this medical crisis (which never came)
- considering the decline of Ontario Hospital and ICU capacities since at least 2017
- **therefore, in light of all of the considerations that all parties went to in order to be “reliable” and ready for emergencies, this circumstance 7.0.1 (3) 2.iii. also does not exist**

## Summary and Conclusion

Based on the above analysis, the criteria for declaration of emergency under section 7.0.1 (3) of the EMCPA was not met in March 2020 and not met again in January 2021 or again in April 2021. Therefore, the Premier’s declarations were and still are unjustified, thereby making them illegal.

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR ONTARIO - THEN OR NOW**

What is the significance of this?

All of the measures - **stay-at-home orders; business closures; church and school closures; mandatory masks; mandatory vaccination; booster shots and now mandatory vaccine passport** - all stem from these ILLEGAL emergency orders.

**All of these measures will END once these ILLEGAL declarations of emergency are terminated - and ONLY THEN can we get our lives back!!**

Make no mistake about it. All of these measures WILL NOT END unless WE the people do something about it. They will not end, no matter how many vaccines or booster shots public health is forcing onto citizens. *It is time we opened our eyes to what is happening.* And then get busy doing something about it!

## CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Ontario](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

We did not protect our most vulnerable, instead, **we are overwhelming the PUBLIC**, *not the public health care system* with these measures. All of these measures are causing far more harm than good. We cannot sit idly by and do nothing about this! Please TAKE ACTION!

## PROVINCIAL / TERRITORIAL DECLARATIONS OF EMERGENCY

### Remaining Provincial and Territorial Declarations of Emergency

Below are the remaining Canadian provinces and territories who also declared a state of emergency. **Please take note of the number of deaths, THEN and NOW per province.** *It will shock you.* Also, please read the definitions for “emergency” or the requirements to take such action and decide for yourself if any emergency existed at all. We update this entire document on a monthly basis. We analyzed the provincial/territorial legislation and data on a macro-level.

### CALL TO ACTION – Challenge Emergency Orders

We would highly recommend that each province conduct an in-depth analysis, similar to Ontario. Each province needs to challenge their emergency order.

We understand that Alberta has begun litigation on December 4, 2020, to challenge their emergency order by civil rights group [Freedom4Canada](#). *Way to go!!!*

*Which province or territory will be next?*

## ALBERTA

March 17, 2020 – Alberta declared a public health emergency under [section 52.1 of Alberta’s Public Health Act](#). State of Public Health Emergency 52.1(1) Where, on the advice of the Chief Medical Officer the Lieutenant Governor in Council is satisfied that (a) a “**public health emergency exists**” or “**may exist**”

### SUMMARY and CONCLUSION

#### THEN

- on March 17, 2020, there were **0** COVID-19 related deaths
- population: 4,428,247
- **therefore, 0 deaths did NOT constitute a “public health emergency exists” or “may exist”, out of a population of 4,428,247**

#### NOW

- on December 15, 2021, the government is [claiming there are 3,286 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **1,046** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **2,240** COVID-19 related deaths
- population: 4,428,247
- **therefore, 1,046 deaths in 2020 and 2,240 deaths in 2021 out of a population of almost 4.5 MILLION people definitely does NOT constitute that a “public health emergency exists” or even “may exist” and especially when the recovery rate is 99.9%!**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR ALBERTA - THEN OR NOW**

### CALL TO ACTION:

1. If you agree with our analysis and want to take action, [contact the Premier of Alberta](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.
  - [contact the Premier of Alberta](#)
  - [contact your MLA](#) - find by postal code
2. Alberta commenced litigation on December 4, 2020, to challenge their emergency order by civil rights group [Freedom4Canada](#). Please support this important litigation!

## BRITISH COLUMBIA (BC)

March 18, 2020 – The declaration of a provincial state of emergency in B.C. pursuant to [subsection 9.\(1\) of the Emergency Program Act](#).

DEFINITION: “**emergency**” means a “**present**” or “**imminent**” event or circumstance that  
(a) is caused by accident, fire, explosion, technical failure or the forces of nature, and  
(b) requires prompt coordination of action or special regulation of persons or property to protect the health, safety or welfare of a person or to limit damage to property

### SUMMARY and CONCLUSION

#### THEN

- on March 18, 2020, there was **1** COVID-19 related death
- population: 5,100,000
- **therefore, 1 COVID-19 related death did NOT constitute a “present or imminent” event or circumstance, out of a population of 5,100,000**

#### NOW

- on December 15, 2021, the government is [claiming there are 2,393 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **901** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **1,492** COVID-19 related deaths
- population: 5,100,000
- **therefore, 901 deaths in 2020 and 1,492 deaths in 2021 out of a population of 5.1 MILLION people definitely does NOT constitute that there is any “present” or “imminent” event or circumstance and especially when the recovery rate is 99.9%!**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR BRITISH COLUMBIA - THEN OR NOW**

#### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of British Columbia](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of British Columbia](#)
- [contact your MLA](#) - find by constituency, community or postal code

STAND UP  DEBOUT  
CANADA CANADA

## MANITOBA

March 20, 2020 – The Manitoba government declared a province-wide state of emergency under The [Emergency Measures Act](#) under section 10 which states: the government may declare a state of emergency in respect to allow any part of the province in the event of a major emergency or disaster.

DEFINITION: “**emergency**” means a “**present**” or “**imminent**” situation or condition that requires prompt action to prevent or limit.

### SUMMARY and CONCLUSION

#### THEN

- on March 20, 2020, there were **0** COVID-19 related deaths
- population: 1,369,000
- **therefore, 0 deaths did NOT constitute a “present or imminent” situation or condition that required prompt action to prevent or limit, out of a population of 1,369,000**

#### NOW

- on December 15, 2021, the government is [claiming there are 1,357 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **667** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **690** COVID-19 related deaths
- population: 1,369,000
- **therefore, 667 deaths in 2020 and 690 deaths in 2021 do NOT constitute a “present or imminent” situation or condition that required prompt action to prevent or limit, especially when the population is 1,369,000 and especially when the recovery rate is 99.9%!**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR MANITOBA - THEN OR NOW**

#### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Manitoba](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Manitoba](#)
- [contact your MLA](#) – find by electoral division, street address or township

## NEW BRUNSWICK

March 19, 2020 – Premier Blaine Higgs declared a state of emergency under [section 10 \(1\) of the Emergency Measures Act](#).

**DEFINITION:** “**emergency**” means a “**present**” or “**imminent**” event in respect of which the Minister or municipality, as the case may be, believes prompt coordination of action or regulation of persons or property must be undertaken to protect property, the environment or the health, safety or welfare of the civil population.

### STATES OF EMERGENCY

Declaration:

10(1) When the Minister is satisfied that an emergency exists or may exist, the Minister may declare a state of emergency at any time with respect to all or any area of the Province.

10(2) When a municipality is satisfied that an emergency exists or may exist in all or any area of the municipality, it may declare a state of local emergency in respect of the municipality or the area of the municipality.

10(3) A declaration under this section shall identify the nature of the emergency and the area in which it exists.

### **SUMMARY and CONCLUSION**

#### **THEN**

- on March 19, 2020, there were **0** COVID-19 related deaths
- population: 776,827
- **therefore, 0 deaths did NOT constitute a “present or imminent event” out of a population of 776,827**

#### **NOW**

- on December 15, 2021, the government is [claiming there are 144 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **9** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **135** COVID-19 related deaths
- population: 776,827
- **therefore, 9 deaths in 2020 and 135 deaths in 2021 do NOT constitute a “present or imminent event” out of a population of 776,827**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NEW BRUNSWICK - THEN OR NOW**

### **CALL TO ACTION:**

1. If you agree with our analysis and want to take action, [contact the Premier of New Brunswick](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of New Brunswick](#)
- [contact your MLA](#) – find by electoral district

2. **SIGN THE PETITION:** Retract the New Brunswick Declaration of Emergency

<http://chnng.it/mgYdGffj>

March 18, 2020 – the Newfoundland and Labrador Minister of Health, John Haggie, signed a Declaration of a Public Emergency (“Declaration”) under section 27 of the [Public Health Protection and Promotion Act](#) (“the Act”), on the advice of the Newfoundland and Labrador Chief Medical Officer of Health.

27. (1) The minister, on the advice of the Chief Medical Officer of Health, may declare a public health emergency in all or a part of the province where the minister is satisfied that

(a) a “**public health emergency exists**”; and

(b) the public health emergency cannot be sufficiently mitigated or remedied without the implementation of the special measures available under section 28.

## SUMMARY and CONCLUSION

### THEN

- on March 18, 2020, there were **0** COVID-19 related deaths
- population: 521,542
- **therefore, 0 deaths did NOT constitute a “public health emergency exists” out of a population of 521,542**

### NOW

- on December 15, 2021, the government is [claiming there are 18 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **4** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **14** COVID-19 related deaths
- population: 521,542
- **therefore, 4 deaths in 2020 and 14 deaths in 2021 do NOT mean a “public health emergency exists” out of a population of 521,542**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NEWFOUNDLAND AND LABRADOR - THEN OR NOW**

## CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Newfoundland and Labrador](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request. PDF copy of this document to support your demand. Enough is enough!

- [contact the Premier of Newfoundland and Labrador](#)
- [contact your MNA](#) – find by district
- [if you don't know your district](#)

## NORTHWEST TERRITORIES (NWT)

March 24, 2020 – The Northwest Territories’ Minister of Municipal and Community Affairs declared a territory-wide state of emergency pursuant to 14 of its [Emergency Management Act](#).

DEFINITION: “**emergency**” means a “**current**” or “**imminent**” event that requires prompt coordination of action or special regulation of persons or property in order to protect the safety, health or welfare of people or to limit or prevent damage to property or the environment; (situation d’urgence)

### SUMMARY and CONCLUSION

#### THEN

- on March 24, 2020, there were **0** COVID-19 related deaths
- population: 44,982
- **therefore, 0 deaths did NOT constitute a “current or imminent” event, out of a population of 44,982**

#### NOW

- on December 15, 2021, the government is [claiming there are 12 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **0** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **12** COVID-19 related deaths
- population: 44,982
- **therefore, 0 deaths in 2020 and 12 deaths in 2021 do NOT constitute a “current or imminent” event, out of a population of 44,982**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NORTHWEST TERRITORIES - THEN OR NOW**

### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Northwest Territories](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Northwest Territories](#)
- [contact your MLA](#) – find by district

STAND UP  DEBOUT  
CANADA CANADA

## NOVA SCOTIA

March 22, 2020 – Nova Scotia Premier Stephen McNeil declared a state of emergency under [section 12\(1\) of the Emergency Management Act](#).

**DEFINITION:** (b) “**emergency**” means a “**present**” or “**imminent**” event in respect of which the Minister or a municipality, as the case may be, believes prompt co-ordination of action or regulation of persons or property must be undertaken to protect property or the health, safety or welfare of people in the Province.

### SUMMARY and CONCLUSION

#### THEN

- on March 22, 2020, there were **0** COVID-19 related deaths
- population: 971,395
- **therefore, 0 deaths did NOT constitute a “present or imminent event” out of a population of 971,395**

#### NOW

- on December 15, 2021, the government is [claiming there are 110 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **65** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **45** COVID-19 related deaths
- population: 971,395
- **therefore, 65 deaths in 2020 and 45 deaths in 2021 do NOT mean there is a “present” or “imminent” emergency, particularly when 53 of those deaths occurred in the same long-term care home (Northwood) in Halifax!**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NOVA SCOTIA - THEN OR NOW**

### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Nova Scotia](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Nova Scotia](#)
- [contact your MLA](#) – find by your address

CANADA CANADA

## NUNAVUT

March 18, 2020 – Nunavut issued a declaration of a public health emergency under its [Public Health Act](#), Part 5, section 40 (available only as a downloadable PDF).

### DEFINITION:

“**health hazard**” means

(a) a condition, a substance, a thing or an activity that

(i) “**threatens**” or may “**reasonably**” be expected to threaten public health, or

(ii) interferes or may reasonably be expected to interfere with the suppression of diseases, injuries, contaminants or other risks to public health

### SUMMARY and CONCLUSION

#### THEN

- on March 18, 2020, there was **0** COVID-19 related deaths
- population: 38,782
- **therefore, 0 deaths did NOT constitute a “threat” or even “reasonably” be expected to threaten public health, out of a population of 38,780**

#### NOW

- on December 15, 2021, the government is [claiming there is 4 COVID-19 related death](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there was **1** COVID-19 related death
  - 2021: January 1 – December 15, 2021, there were **3** COVID-19 related deaths
- population: 38,782
- **therefore, 1 death in 2020 and 3 deaths in 2021 does NOT constitute a “threat” or even “reasonably” be expected to threaten public health, out of a population of 38,780**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR NUNAVUT – THEN OR NOW**

### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Nunavut](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Nunavut](#)
- [contact your MLA](#) – find by district

## PRINCE EDWARD ISLAND (PEI)

March 16, 2020 – Premier Dennis King declared a public health emergency under [section 9 of the Emergency Measures Act](#).

### STATES OF EMERGENCY

9 – Declaration, state of emergency

(1) The Minister may at any time, when he is satisfied that an emergency exists or may exist, declare a state of emergency in respect to all or any area of the province. Definition (c) "[emergency](#)" means a "**present**" or "**imminent**" event in respect of which the Minister or municipality believes prompt co-ordination of action or special regulation of persons or property must be undertaken to protect the health, safety or welfare of people or to limit damage to property

### SUMMARY and CONCLUSION

#### THEN

- on March 16, 2020, there were **0** COVID-19 related deaths
- population: 156,947
- **therefore, 0 deaths did NOT constitute a "present or imminent event" out of a population of 156,947**

#### NOW

- on December 15, 2021, the government is [claiming there are 0 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **0** COVID-19 related deaths
  - 2021: January 1 – December, 2021, there were **0** COVID-19 related deaths
- population: 156,947
- **therefore, 0 deaths in 2020 and 0 deaths in 2021 do NOT constitute a "present or imminent event" out of a population of 156,947**

**THEREFORE, NO SUCH "EMERGENCY" EVER EXISTED FOR PRINCE EDWARD ISLAND - THEN OR NOW**

### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Prince Edward Island](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Prince Edward Island](#)
- [contact your MLA](#) – find by Party or Constituency

## QUÉBEC

March 14, 2020 – Québec Premier Francois Legault declared a public health emergency under [s. 118 of the Public Health Act](#). Certain measures in this Act are intended to enable public health authorities to engage in public health monitoring activities and to give public health authorities the power to take action in cases where the health of the population is threatened. In this Act, a “**threat**” to the **health of the population** means the presence within the population of a biological, chemical or physical agent that may cause an “**epidemic**” if it is not controlled.

### SUMMARY and CONCLUSION

#### THEN

- on March 14, 2020, there were **0** COVID-19 related deaths
- population: 8,485,000
- **therefore, 0 deaths did NOT constitute a “threat” to the health of the population by the presence within the population of a biological, chemical or physical agent that may cause an “epidemic” out of a population of 8,485,000**

#### NOW

- on December 15, 2021, the government is [claiming there are 11,622 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **8,226** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **3,396** COVID-19 related deaths
- population: 8,485,000
- **therefore, 8,226 deaths in 2020 and 3,396 deaths in 2021 or even 11,491 deaths for both combined years, do NOT constitute any “threat” to the health of the population that may cause an “epidemic”, especially when more than 80% of those 2020 deaths occurred in long-term-care homes, out of a population of nearly 8.5 MILLION people, and especially when the recovery rate is 99.9%!**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR QUÉBEC - THEN OR NOW**

#### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Québec](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Québec](#)
- [contact your MNA](#) – find by electoral district

## SASKATCHEWAN

March 18, 2020 – the Government of Saskatchewan declared a state of emergency pursuant to section 17 of The [Emergency Planning Act](#) (available only as a downloadable PDF).

DEFINITION: “**emergency**” means:

(i) a “**calamity**” caused by:

- (A) accident;
- (B) act of war or insurrection;
- (C) terrorist activity as defined in the Criminal Code;
- (D) forces of nature; or

(ii) a “**present**” or “**imminent**” situation or condition, including a threat of terrorist activity as defined in the Criminal Code, that requires prompt action to prevent or limit:

- (A) the loss of life;
- (B) harm or damage to the safety, health or welfare of people; or
- (C) damage to property or the environment;

### SUMMARY and CONCLUSION

#### THEN

- on March 18, 2020, there were **0** COVID-19 related deaths
- population: 1,181,897
- **therefore, 0 deaths did NOT constitute a “calamity” or “present or imminent” situation, out of a population of 1,181,897**

#### NOW

- on December 15, 2021, the government is [claiming there are 941 COVID-19 related deaths](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there were **155** COVID-19 related deaths
  - 2021: January 1 – December 15, 2021, there were **786** COVID-19 related deaths
- population: 1,181,987
- **therefore, 155 deaths in 2020 and 786 deaths in 2021 do NOT constitute a “calamity” or “present or imminent” situation, out of a population of 1,181,897 and especially when the recovery rate is 99.9%!**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR SASKATCHEWAN - THEN OR NOW**

#### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Saskatchewan](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact the Premier of Saskatchewan](#)
- [contact your MLA](#) - find by non-filtered list of Members name, Party or Constituency
- [contact your MLA if you don't know your Constituency](#) – find by your full street address

## YUKON

March 27, 2020 – The Government of Yukon declared a state of emergency under the [Civil Emergency Measures Act](#) under Section 6 (1). Declaration and term of state of emergency

6(1) The Commissioner in Executive Council may declare that a state of emergency exists in the Yukon or in any part there of “if” informed that “a **war emergency exists**” or if the Commissioner in Executive Council is of the opinion that a “**peace time disaster**” exists.

DEFINITION: “**war emergency**” means the state existing as a result of a proclamation issued by Her Majesty or under authority of the Governor in Council that war, invasion or insurrection, real or apprehended, exists “**peacetime disaster**” means a disaster, real or apprehended, resulting from fire, explosion, flood, earthquake, landslide, weather, epidemic, shipping accident, mine accident, transportation accident, electrical power failure, nuclear accident or any other disaster not attributable to enemy attack, sabotage or other hostile action whereby injury or loss is or may be caused to persons or property in the Yukon

### SUMMARY and CONCLUSION

#### THEN

- on March 27, 2020, there were **0** COVID-19 related deaths
- population: 35,875
- **therefore, 0 deaths did NOT constitute a “war emergency exists” or that a “peacetime” disaster exists, out of a population of 35,874**

#### NOW

- on December 15, 2021, the government is [claiming there are 14 COVID-19 related death](#), but they are combining two years which is misleading; they must be split by year
  - 2020: January 1 - December 31, 2020, there was **1** COVID-19 related death
  - 2021: January 1 – December 15, 2021, there were **13** COVID-19 related deaths
- population: 35,874
- **therefore, 1 death in 2020 and 13 deaths in 2021 does NOT constitute a “war emergency exists” or that a “peacetime” disaster exists, out of a population of 35,874**

**THEREFORE, NO SUCH “EMERGENCY” EVER EXISTED FOR YUKON - THEN OR NOW**

#### CALL TO ACTION:

If you agree with our analysis and want to take action, [contact the Premier of Yukon](#) and demand that the emergency be declared terminated immediately. Send the PDF copy of this document to support your request.

- [contact your MLA](#) – find by party
- [contact your MLA if you don't know your electoral district](#) – find by search of maps

## PROVINCIAL / TERRITORIAL SUMMARY

Most people are visual, so we are including a summary list of all the COVID-19 related deaths by province and territory. ***This should shock and enrage you!*** Please note that we have left the population numbers the same, as reported for 2020 in general.

Important to note that the government is [claiming there were 29,994 COVI-19 related deaths in Canada](#) on **December 15, 2021**, but **they are combining two years which is misleading**; they must be split by year. As such, we have reported COVID-19 related deaths by year. **We will be watching to see if the government keeps the tab rolling in 2022.**

Province/Territory	2020 COVID-19 Related Deaths Jan 1 - Dec 31, 2020	2021 COVID-19 Related Deaths Jan 1 – Dec 15, 2021	Population
ALBERTA	1,046	2,240	4,428,247
BRITISH COLUMBIA	901	1,492	5,100,000
MANITOBA	667	690	1,369,000
NEW BRUNSWICK	9	135	776,827
NEWFOUNDLAND & LABRADOR	4	14	521,542
NORTHWEST TERRITORIES	0	12	44,982
NOVA SCOTIA	65	45	971,395
NUNAVUT	1	3	38,780
ONTARIO	4,576	5,517	14,745,040
PRINCE EDWARD ISLAND	0	0	156,947
QUÉBEC	8,226	3,396	8,485,000
SASKATCHEWAN	155	786	1,181,987
YUKON	1	13	35,874
<b>Totals</b>	<b>15,651</b>	<b>14,343</b>	<b>37,855,621</b>

### Overwhelming Conclusion

***The Emperor has no clothes!***

NONE of the Canadian provinces or territories were ever in a state of “emergency” back in March 2020 when they each declared one and Ontario certainly is not in another declared state of emergency now in January 2021.

**NO PROVINCE OR TERRITORY HAS EVER BEEN IN A STATE OF EMERGENCY – THEN OR NOW!**

The original and continual extensions to the provincial and territories states of emergencies are unlawful, unreasonable, and unjustified. The continual extensions are a gross **ABUSE OF POWER, FORCE AND AUTHORITY!** *Are you not shocked and outraged with the evidence you see here?*

This bears repeating from above:

**STAND UP**  **DEBOUT**  
**CANADA** **CANADA**

What is the significance of this?

*All of the measures - **stay-at-home orders; business closures; church and school closures; mandatory masks; mandatory vaccination; booster shots and now mandatory vaccine passport** - all stem from these **ILLEGAL** emergency orders.*

***All of these measures will END once these **ILLEGAL** declarations of emergency are terminated - and **ONLY THEN** we can get our lives back!!***

Make no mistake about it. All of these measures WILL NOT END unless WE the people do something about it. They will not end, no matter how many vaccines or booster shots public health is forcing onto citizens. Please don't fool yourself into believing that if we just did this, or if we just did that - whatever the government or public health is telling us to do, that we would get our lives back. It isn't happening. Why are we saying this? Because it has NOT happened yet. The goal post keeps moving. What happened to "two weeks to flatten the curve?"

*It is time we opened our eyes to what is happening. And then get busy doing something about it!*

The wording is very clear – “**present**” which means “**existing or occurring now**”; “**imminent**” which means “**about to happen**”. None of it occurred in the present moment and **none of it occurred in the future**. You cannot declare a state of emergency for an anticipated future event, especially for a virus with a 99.9% recovery rate.

## **Final Evidence - Lawsuit – Ecuador’s State of Emergency – Unconstitutional**

### **January 2, 2021: Ecuador (South America)**

Constitutional Court ruled that Decree 1217 for a State of Emergency declared by President Lenín Moreno on December 21, 2020 is unconstitutional. **The Court found that the president based the state of emergency on a possible future risk and not a current one, without sufficient, clear and specific information.** Since states of exception operate in the face of current and certain circumstances, the actual occurrence of the events was not justified. The President responded that his government will abide by the ruling of the Court because it is "respectful of the rule of law". He further stated that in large cities, the Intensive Care Units (ICU) are "on the brink" and that there may be an upturn in infections in January, for which they have a "contingency plan."

*“Due to the foregoing, the Court decided:*

- 1. To declare Decree No. 1217 unconstitutional.*
- 2. Remind the President of the Republic and the competent authorities that the measures referred to in Decree No. 1217, aimed at avoiding crowds and mass meetings as well as preventing the possible risks of the new variant of COVID-19 identified in the United Kingdom, they can be adopted based on the attributions of the ordinary constitutional regime, even by the COE, as in fact has happened, without it being necessary to resort to the extraordinary powers authorized in a state of emergency.*
- 3. Faced with the possible risks of the new variant of COVID-19, the Court reiterated its call to the national government to reinforce, in a coordinated manner, the prevention mechanisms available under the ordinary regime.”*

## What are Your Thoughts...?

Shouldn't we be asking ourselves, what exactly happened to those elderly people in the Long-Term Care homes in Ontario and Québec? Does anything you've read here make you stop and question if these emergency orders are legitimate? Have you read anything that makes you want to stand up and say NO to what's going on?

If you feel compelled to say something, but are afraid to speak up, you are now part of the problem. We know firsthand how difficult it is to speak up and stand out. It is uncomfortable and can be downright unpleasant. But...if you don't take that individual action to speak up, nothing will change. We all need to stop waiting for the other person or group to save us in this situation. *We are always that which we seek.*

Don't think you have it in you to speak up? Think again. You are stronger than you've been led to believe. The revolution you seek is never external. *It is always internal.* The revolution then becomes the revelation of your innate powers.

## 19 MAJOR INCONSISTENCIES WITH COVID-19 NARRATIVE

In addition to the fact that **every single Emergency Declaration in Canada is fraudulent**, we found **19 major inconsistencies that do not support the COVID-19 narrative**. It is essential that you understand these evidence-based factors. They all fall on the heels of these illegal declarations of emergency, which is why the first two major inconsistencies belong on this page because we are talking about the **virus (#1)** and the **number of deaths (#2)**.

**Reminder:** the emergencies were only declared based on the predication (assumption to be true) of the *existence of a virus (#1)* and the *predicted number of deaths (#2)*.

All 19 major inconsistencies can be found on the next page called [COVID-19 Inconsistencies](#).

### **#1 – COVID-19 Virus has NOT been Isolated!**

Christine Massey, Canadian researcher and bio-statistician, has been filing Freedom of Information requests to public health institutions around the world, asking one simple question "*has the virus been isolated?*"

To date she has confirmed evidence from [141 health/science institutions globally](#) who all failed to cite even 1 record of "SARS-COV-2" purification, by anyone, anywhere, ever. Of that that list, [41 Canadian Institutions](#) also confirm that there is NO evidence of viral isolation.

*This is alarming because the entire planet has been locked-down because of this non-existent virus.*

Please watch this latest informative video of Christine as she discusses this important subject - [Brighteon](#)

Additionally, Dr. Derek Knauss, a clinical scientist and immunologist-virologist at a southern California laboratory, says he and colleagues from 7 universities are **suing the CDC for massive fraud**. The reason: **not one** of the 1,500 samples of people who tested “positive”, could find Covid-19. All people were simply found to have Influenza A, and to a lesser extent, Influenza B.

- Watch his brief video talking about this: <https://www.bitchute.com/video/AnckYhOZMgU7/>, and
- Read April 18, 2021 articles about this: <https://greatreject.org/laboratories-cant-find-covid-19-in-positive-tests/>

If the virus has not been isolated, then what exactly are they finding in those PCR “tests” for which people are testing positive? More importantly, how can they create a vaccine if they have not isolated the virus?

## **#2 – COVID-19 Deaths Combined into one Grand Total**

Fast forward to our monthly update on December 15, 2021, the government is [claiming there were \\*29,994 COVID-19 related deaths in Canada](#) and considering our unchanged population of nearly 38,000,000, this would represent **0.07%** of the population who have died [(29,994 / 38,000,000)\*100]. Wait a second! **There is a fundamental problem with the death toll. Do you see where?**

**\*All COVID-19 deaths are being lumped into one Grand Total \***

**\*Important distinction** - the provincial and [federal government are continually counting COVID-19 related deaths](#) by **combining two flu seasons and combining two years**; it is unethical to present the number of deaths this way for the following reasons:

- **the government’s tally on COVID-19 related deaths should have reset at zero on January 1, 2021 and again on January 1, 2022**
- **by not resetting their counter to zero each year is not only misleading**, but this gives the false perception there are more deaths than are truly being accounted for by year
  - why is this important to know?
  - because you need to compare apples to apples in order to make a determination of significance
  - you simply cannot keep the death toll running; there needs to be a fundamental cut off date so that you can measure its affects; to not have one is misleading and unethical reporting
- Statistics Canada has confirmed that they record their statistics on an annual basis, from January 1 to December 31
- As Statistics Canada is the sole source of approved statistical reporting in Canada, Stand Up Canada will provide same statistical reporting by year; to do so otherwise, would be misleading and unethical
- **For the year 2020: January 1, 2020 to December 31, 2020**, there were
  - **15,651** COVID-19 related deaths in **Canada**, equivalent to **0.04%** of Canada’s population; and
- **For the year 2021: January 1, 2021 to December 15, 2021**, there were
  - **14,343** COVID-19 related deaths in **Canada**, equivalent to **0.04%** of Canada’s population; and

There are just so many inconsistencies with this covid-19 narrative, that we decided to list the remainder on a separate page called "[COVID-19 Inconsistencies](#)". Some times too much information on one page can dilute the absolute significance that these **emergency orders were not valid**.

In summary, because we are reporting on the emergency declarations and basing it on deaths, it is absolutely essential to draw your attention to the #1 and #2 major inconsistencies that do not justify these emergency orders.

## DECLARATIONS OF EMERGENCIES – 19 MAJOR INCONSISTENCIES

In addition to the fact that **every single Emergency Declaration in Canada is fraudulent**, and that the following major inconsistencies do not support the COVID-19 narrative. It is essential that you understand these evidence-based factors. They all fall on the heels of these illegal declarations of emergency, which is why the first two major inconsistencies belong on this page because we are talking about the virus (#1) and the number of deaths (#2).

All 19 major inconsistencies can be found on the next page called [COVID-19 Inconsistencies](#).

- **#19 3<sup>rd</sup> Ontario provincial Declaration of Emergency in 2021 – Full Rolling Boil!**

Summary of Questioning the Major Inconsistencies

# WE NEED TO SEE THE WRITING ON THE WALL!

## Not a Question of Intelligence, but of Awareness

Do you think you can survive another second, third or fourth wave of forced business closures? Again, you need to ask yourself if any of these overwhelming abuses of authority, violations to our *Canadian Charter of Rights and Freedoms*, coupled with the BILLIONS of Canadian tax-payer dollars spent on “COVID-19 measures” – is this really justified with only 15,651 COVID-19 related deaths in Canada for 2020 and **14,343** COVID-19 related deaths in 2021, out of a population of nearly 38,000,000?

**This is completely illogical.**

## How Do You Boil a Frog?

With the latest revisions made under Stage 3 of the Reopening Ontario Act, in respect of mandatory vaccination and now mandatory proof of vaccination... *which are extremely dire with serious implications*, are you starting to see the whole “*how do you boil a frog*” analogy?

- Put a frog in a pot of cold water and slowly turn up the heat... [**stay at home orders**]
- The frog will not notice that the water is getting warmer as he is getting used to it... [**masks**]
- By the time he notices it is too hot, it is too late... [**mandatory vaccination / mandatory vaccination passports = 24 hr digital surveillance**]

## The Slow Erosion of Our Rights and Freedoms

The slow removal of our rights and freedoms since March 2020 has left many people like the unsuspecting frog.

- We complied when the government said it would take two weeks to flatten the curve.
- We complied when they were told that masks were mandatory.
- We complied to incessant testing – even paying for it!!
- We complied to not leaving our home, our provinces and our beautiful country.
- We have even complied with mandatory vaccination and some people don't have a problem “showing their papers” like Nazi Germany, to prove they have been vaccinated.

But at what point will *enough be enough*? What is your line in the sand?

## Pop Quiz on History

Q. Do you know how many people Hitler killed during his reign over Nazi Germany?

A. Zero. He never killed one single person. Everyone else did it for him. They were *just following orders*.

## Do You Know Your Rights are being Violated?

This is not a question of intelligence, but of awareness.

Many Canadians do not know they have rights, let alone how the COVID-19 measures are violating these rights. That's where Stand Up Canada comes in.

# MOST CANADIANS DO NOT KNOW...

-  their own **medical information is private** and that **no one has the right to ask** them about that - *except their licensed medical doctor*
-  there are federal and provincial **laws that protect their privacy**
-  **they are violating someone else's privacy rights** by asking about their private medical information
-  **they are discriminating against another human being** if they refuse to serve them because of that person's medical information - *which is supposed to be private and confidential to them*
-  hand sanitizers, masks, testing and **vaccines for COVID-19** are all medical treatments / procedures that **require their "informed consent"**
-  **what "informed consent" means** - and that they are **allowed to say no**
-  there are Canadian and International **laws that protect their "informed consent"** - and that these laws derived from the Nuremberg Code / Nuremberg Trials which held those responsible for *Crimes Against Humanity* during Nazi rule
-  **no one has the right to ask them for their ID** - *except a Police Officer, and that there are exceptions to that*
-  **they own their body** - and that **no one has the right to tell them what to put on it or in it**

Did you know you have these rights? How do you feel now, knowing that they are violated?

# OUR MORAL DUTY ...

## Not just as Canadians, but as Human Beings

Now that you have been presented with this information, what will you do about it?

Keeping your eyes closed, deliberately keeping yourself in a state of denial can only last for so long. We get that - denial is a *vital survival technique*. But if kept in that state forever, it will cause harm to you and others.

There is an expression that needs to be heard “Evil happens when good people do nothing”.

Canadians, without a doubt, are the most beloved people on the planet! Hands down. But, if we turn a blind eye to what is happening to our fellow citizens, our family, friends and neighbours – we become complicit and are now part of the problem.

Kind of like the good [Samaritan law](#) that some US States have – if you do nothing, you’re just as guilty as the perpetrator because you did nothing and let it happen.

In closing, in case you were not aware, to say that “[I was only following orders](#)” is no longer a defence in the court. This actually originated from the Nuremberg Trials coming out of World War II. Society held those responsible for their part in the unspeakable *Crimes Against Humanity* committed upon millions of Jewish people - even those who said they were *just following orders*.

***Please don't be afraid to stand up for yourself and others. You are STRONGER than you've been taught to believe!***

We believe that knowledge is *potential power*. But **knowledge has no power without action**. And so, our purpose has been fulfilled by giving you this knowledge... the rest is up to you.

***So now that you have this knowledge, what are you going to do with it?***
