Perspective: improving vitamin D status in the management of COVID-19 <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7216123/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7216123/</a>

Vitamin D can help reduce coronavirus risk by 54%: Boston University doctor <a href="https://www.msn.com/en-us/health/medical/vitamin-d-can-help-reduce-coronavirus-risk-by-54-boston-university-doctor/ar-BB199vhH">https://www.msn.com/en-us/health/medical/vitamin-d-can-help-reduce-coronavirus-risk-by-54-boston-university-doctor/ar-BB199vhH</a>

The role of vitamin D in the prevention of coronavirus disease 2019 infection and mortality https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7202265/

Autumn COVID-19 surge dates in Europe correlated to latitudes, not to temperature-humidity, pointing to vitamin D as contributing factor <a href="https://www.nature.com/articles/s41598-021-81419-w">https://www.nature.com/articles/s41598-021-81419-w</a>

#### (11:11) The real virus is fear

Stress! Don't Let It Make You Sick

https://www.aarp.org/health/healthy-living/info-2014/stress-and-disease.html

"The immune system's ability to regulate inflammation predicts who will develop a cold, but more importantly it provides an explanation of how stress can promote disease," Cohen says. "When under continuous stress, cells of the immune system are unable to respond properly, and consequently produce levels of inflammation that lead to disease."

#### Life Event, Stress and Illness

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3341916/

Not all stress has negative effect. Studies have shown that short-term stress boosted the immune system, but chronic stress has a significant effect on the immune system that ultimately manifest an illness. It raises catecholamine and suppressor T cells levels, which suppress the immune system. This suppression, in turn raises the risk of viral infection.

Fear, Loss, Social Isolation, and Incomplete Grief Due to COVID-19: A Recipe for a Psychiatric Pandemic <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7368098/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7368098/</a>

Science Reveals the Impact of Fear on the Human Brain

https://www.learning-mind.com/impact-of-fear-on-the-human-brain/

The impact of fear on the human brain is very powerful: it completely changes the way we process information. "When people are frightened, the parts of the brain that are responsible for rational thinking cease to dominate", Dr. Bruce Perry explains, quoted in an article published on the Time magazine website.

#### (11:18) Turn off your TV

Sitting time and mortality from all causes, cardiovascular disease, and cancer
