

**STAND UP  
CANADA**

**DEBOUT  
CANADA**

## **Our Latest News – April 7, 2021**

*Hello everyone!*

As promised, here's what we've been up to...and what we're promoting.

### **Let's start with some GOOD NEWS!**

#### **Toyota Employees Win Right to Decline Medical Treatment – Weekly Antigen Testing No Longer Mandatory**

7,000 employees in Toyota plants in Cambridge and Woodstock Ontario have PUSHED BACK on their employer, who wanted to begin mandatory weekly Antigen testing of all employees effective April 5, 2021.

Here's what a select group of Toyota employees did - they:

- reached out to **Vaccine Choice Canada** for a risk assessment for PPE mask wearing with **risks vs benefits** assessment
- reached out to **Stand Up Canada** for legal information on their **rights to refuse medical treatment** (VCC pointed them our way)
- compiled their own **legal package** and shared it with fellow employees to give them the confidence to refuse this medical treatment
- showed their HR department a video from the provincial government, **exposing their test as being useless** as per the government's own health minister (July 2020, Public Health Physician Dr. Yaffe explains the "no-test order for Ontario teachers". She admits to a 50% false-positive rate for covid tests. Here is the short video clip [HERE](#))
- posed **a lot of questions** to their HR department about **exposure rate of ethylene oxide** (substance found on the nasal swab used for testing); in particular what kind of exposure could an employee expect to receive on a weekly basis?; what would happen if a nurse punctures an employee's nose or the employee doesn't know they have an allergy to this substance?; what if this employee gets a sinus infection from trapped contaminants in their mask around the shop from touching their mask 40 times every 15 minutes?; and what would happen if an employee were to get **bacterial pneumonia**?
- indicated that the **masks aren't designed for this specific environment** and that **NO risk assessment** had been done on contaminants trapped in these masks
- indicated that if **employees wear masks all day**, that they **can't expel this**

**toxic substance** out of the nose

- pointed out that under the **Occupational Health and Safety Act**, the employer is responsible for the amount of exposure to ethylene oxide that is airborne – not shoved deep into the nose of employees on a weekly basis
- suggested that they **test only the sick**, to limit the exposure to ethylene oxide
- advised that their **physicians wanted to know the rate of exposure** of this toxic substance
- stated that the employer would be **deteriorating the trust relationship between employer and employee** for a test that has a 55% false positive result
- indicated that the threat of **sending employees home without pay** (Infectious Disease Leave) if they refuse to be tested, would be a drastic measure only to be assured of eroding the trust of employees
- pointed out that they would be **putting healthy people with no symptoms at risk** of being unhealthy
- pointed out the glaring fact that this measure **could cost the employer billions of dollars in legal fees** if words gets out about health risk associated with these tests
- and ended with a single question, “I want to know who is going to be **liable?**”

Interested to know how main-stream media covered this story? It was disappointing with NO mention whatsoever of employee push back like this and issue of liability. Here is the story covered by **Toronto CityNews** on April 2, 2021.

Please SHARE this invaluable information with any other employees or parents of school children who may also be facing a similar situation with mandatory testing.

This is a remarkable example of how you STAND UP for your rights and PUSH BACK.

Congratulations to the employee group leader(s) at Toyota who made this happen. We are honoured to have been of service to you as you asserted your rights, along with the unity of help and information from Vaccine Choice Canada – a most treasured and trusted source in Canada for many years. *Well done everyone!!*

## **Ontario April 1, 2021 - PROVINCE-WIDE “Shut down”**

Ontario declares another four-week, province-wide shutdown on Saturday as the government pulls its “emergency brake” in an effort to curb the spread of COVID-19 variants.

Have you had **ENOUGH ALREADY??** What’s your line in the sand? This will not end any time soon in Ontario or any other province/territory. What can you

do? **Protest - Get Involved - Take Action.**

## PROTESTS - Churches

Here's a run-down on a major Canada-wide Church protest which happened over the Eastern weekend, organized by **Liberty Coalition Canada**:

*Liberty Coalition Canada  
- please join!!*

- In total, 79 churches across Canada signed their names to a list, posted to Liberty Coalition's website, announcing intentions to keep their doors open for Easter. Churches were represented from every province, except Newfoundland and Labrador and the Territories. *"Through the initiative, faith communities who believe they are essential were able to push back against government overreach"*, said Independent MP Derek Sloan, a member of Liberty's End the Lockdowns National Caucus. Opening on Easter, he said, *"also served as a reminder that churches are active in their communities and offer a host of services, including active outreach, addictions programs and counselling."*
- Liberty Coalition was pleased with the turnout, said campaign manager Michael Thiessen, who's also the pastor of Grace Baptist Church in Alliston, Ont. *"It was a great time of celebration of Jesus' death and resurrection,"* he said, *"and that is what we want to be freely able to do."*

This must be the first of many protests by the Churches. Church and State must remain separate! The biggest fear the government has, is having people of Faith. Governments cannot control those individuals who have faith and trust in a Higher power.

If you feel called by **"The Church Must Gather"** initiative by Liberty Coalition Canada, please sign up to that and get involved.

## PROTESTS – Small Towns

Do you remember how we promoted the "End the Lockdown" protest in Parry Sound, Ontario on our March 3rd newsletter? Well guess what? That small-town protest inspired others to take similar actions! This really is a "Start Where You Live" movement now. Here is the next small-town protest.

### End the Lockdowns - Embrun/Russell Ontario:

- Saturday April 10, 2021
- 10:00 a.m. Embrun Arena - 6 Blais Street, Embrun, ON; then
- 1:00 p.m. Russell Arena - 1084, Concession St., Russell, ON

You can connect with this group through their FB Private Group called **"End the Lockdown / Mettre fin au mesures de confinement (Embrun-Russell)"**

If you know of other small-town protests you'd like us to promote, email us at [info@standupcanada.solutions](mailto:info@standupcanada.solutions).

## PROTESTS – Nurses

Our brave front line nurses who formed **Canadian Front Line Nurses**, will be holding a rally in front of the College of Nurses of Ontario.

*Canadian Front Line Nurses*

They will be ANNOUNCING an **important legal action** and would like us all to witness the event. If you are moved by their bravery for speaking out, please attend to show your support.

- Wednesday April 14, 2021 – 11:00 a.m.
- College of Nurses of Ontario – 101 Davenport Road, Toronto, ON M5R 3P1

## Druthers Newspaper – April edition hot off the press!

Their April online edition is available **HERE**.

**Eastern Ontario Area** – Stand Up Canada has received 25,000 copies to deliver in the Ottawa and surrounding areas

- We need distributors – there are 65 bundles that still need distributing
- Contact [info@centaurridingschool.com](mailto:info@centaurridingschool.com) directly and indicate how many copies you can distribute (1 bundle = 100 copies)

### Elsewhere in Ontario and other Provinces

- Contact – reach out to Druthers directly to arrange for a delivery/shipment for **your area** for NEXT MONTH <https://druthers.net/contact/>
- Organize – get a group of people in your area to pick up copies for distribution in different parts of your city/town
- Deliver – be strategic on who you give these to; deliver to same people each month

## Closing Thoughts...

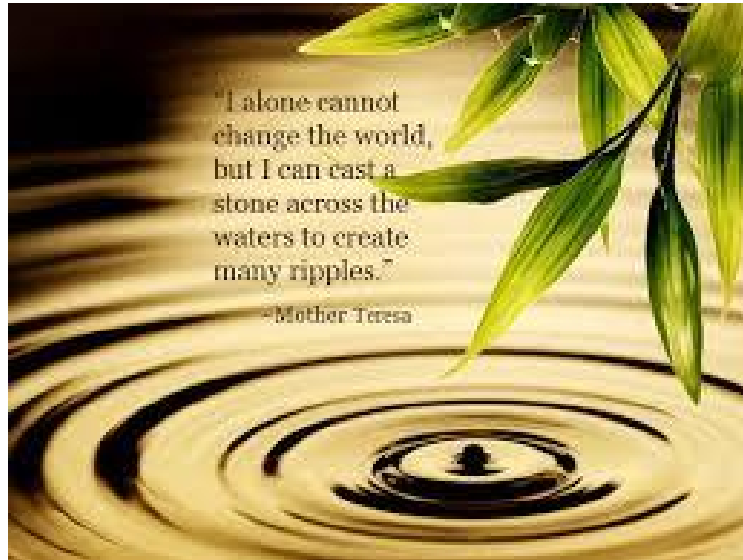

...as we begin YEAR TWO of this lockdown, it is imperative to  
STAND UP and TAKE ACTION

We cannot wait for someone else to do this for us

***We are ALL capable of extraordinary acts***

We are making important gains – one success at a time  
We are naturally building on one another's ideas, information and actions  
This IS the power of the ripple effect  
Momentum – it cannot be stopped

*Cast your stone and watch what happens...*

*Never underestimate the power of a higher force connecting us all together at this moment in our history...*

We are standing with you!!
