I understand that my physical fitness program is individually tailored to meet the goals and objectives agreed upon by my personal trainer and myself. I understand, however, that my personal trainer cannot guarantee that I will accomplish the goals that I establish. My program goals include (please initial all that apply):

Description of the Exercise Program

I understand that my exercise program will involve participation in a number of types of fitness activities. These activities will vary depending upon my established objectives, but will probably include:

- 1) Aerobic activities including, but not limited to, the use of treadmills, stationary bicycles, step machines, rowing machines, and running track;
- 2) Muscular endurance and strength building exercises including, but not limited to, the use of free weights, weight machines, calisthenics, and other exercise apparatus;
- 3) Other activities selected by my personal trainer and agreed upon by me; and
- 4) Selected physical fitness and body composition tests.

Description of Potential Risks

My personal trainer has explained that no exercise program is without inherent risks and that, regardless of the care taken by my personal trainer, he (or she) cannot guarantee my personal safety.

For example, when one induces cardiovascular stress through activity, injuries can range from occasional minor injury (e.g., pulled muscles, muscle soreness) to infrequent serious injury (e.g., heart attack, stroke, or other cardiovascular accidents) to the very rare catastrophic incident (e.g., death, paralysis). Likewise, I know that engaging in muscular endurance, strength building, and other fitness activities occasionally results in minor injuries (e.g., bruises, musculoskeletal strains and sprains), infrequently, more serious injuries (e.g., muscle tears, herniated disks, torn rotator cuffs), and very rarely, catastrophic injury (e.g., death, paralysis).

I realize that when participating in any exercises or conditioning activity, there is always a possibility that minor injuries, major injuries, or catastrophic injury/death may occur.

Description of Potential Benefits

I understand that a regular exercise program has been shown to have definite benefits to general health and well-being. I know that some of the physiological benefits of a regular exercise program can include loss of weight, reduction of body fat, improvement of blood lipids, lowering of blood pressure, improvement in cardiovascular function, reduction in risk of heart disease, improved strength and muscular endurance, improved posture, and improved flexibility. I further understand that regular exercise can have psychological benefits, often improving one's outlook and feeling of well-being, as well as relieving tension and stress.

Client Responsibilities

I understand that it is my responsibility to:

- 1) Fully disclose any health issues (including diabetes, heart problems, seizures, and asthma) or medications that are relevant to participation in a strenuous exercise program;
- 2) Inform the trainer if there are activities with which I do not feel comfortable;
- 3) Cease exercise and report promptly any unusual feelings (e.g., chest discomfort, nausea, difficulty breathing, apparent injury) during the exercise program; and
- 4) Clear my participation with my physician.

Client Acknowledgements

In agreeing to this exercise program, I, the client:

- acknowledge that my participation is completely voluntary.
- understand the potential physical risks involved in the exercise program and believe that the potential benefits outweigh those risks.
