

Event[📶] Text Messaging

delivering the right message ▶ to the right people ▶ in the right place ▶ at the right time

SMSnet.ca | SportsSMS.ca

Better Communication = Better Events

Deliver important information to attendees, volunteers, staff, exhibitors and more, fast and efficiently using SMSnet text messaging. This means NO new Mobile App to try and download, no need for the newest smart phone, wifi or using your own data.

Text messaging works on every phone everywhere, in the Conference room, at the far end of the parking lot, across town or in another city. SMS is easier to use, easier to prepare and far less expensive than any mobile App, but like an App can still be 'sponsored'.

You can send and schedule to send event updates, session reminders, links to agendas and maps, live links to speakers Bios, social media links and hashtags. Use the service to direct visitors to a specific booth at a specific time, invite attendees to sign up for email, complete a survey and even conduct surveys using Text2Vote!

SMSnet provides a 100% private platform that enables attendees to subscribe through your own registration process, online through a hosted and branded subscription page as well as directly via their own mobile device and we provide information feeds for every category of subscriber at your Event.

Text messages are delivered within seconds of being sent regardless of the phone location or wireless carrier and all texts are free to receive if you have text messaging as an option on your phone service.

It's easy and we'll guide you through the process. We can have your EventSMS up and running in a week!
