A&B Excavating, LLC
Excavating Contractor

Statement of Qualifications & Experience

Established in 2013, **A&B Excavating** is an excavating contractor, currently serving Utah and Idaho. **A&B's** services include building roads, foundation excavations, pad prep, mass excavation, soil stabilization, rock removal, retaining walls, installing water, sewer, and storm drain systems, as well as demolition and tree removal.

Here at **A&B Excavating** we work hard to meet or exceed expectations for all your excavation needs. **A&B** uses state-of-the-art equipment like Trimble GPS and CAD layout, enabling the best competitive edge on production, efficiency, and cost.

Seeking to maintain an exceptional level of detail, **A&B** strives to meet or exceed today's fast paced work process. Our clients have been happy with our work, and we are confident that we are capable of completing your project.

Putting projects together in the most time and cost-effective manner is what can be expected. We look forward to making your job a success for all.

For a free quote on your excavation project, give us a call at (208) 751-6494 or email budj@abxdirt.com.

Excavating Contractor

Key Personnel Experience

Our team totals 50+ years of excavating experience, including work on projects ranging from small residential and commercial projects to multi-million-dollar civil projects.

Bud Johnson – Manager / Partner

Bud - *Currently oversees operations, preconstruction, and management.* Bud has 28+ years of experience in the construction industry, 23 years of which has been specifically earthwork, utilities and concrete. Earthwork is in Bud's blood as he began excavating with his father in his teens.

Kevin Johnson – Estimator / Project Manager

Kevin – *Estimating and project management.* Kevin has spent 20+ years in the construction industry. He has a rounded understanding of dirt work, soil preparation, compaction, and grading. He coordinates well with other trades, and is always looking for more efficient ways to keep ahead of today's increasing pace and technology.

He has had experience in most building trades including: Concrete, framing, steel erection, welding, electrical, plumbing, drywall, plaster etc.
