Why AG Home Health Care?

WHY HOME HEALTH CARE?

Often, people who receive services at home are more likely to have better health outcomes and lower costs compared to institutional care.

Studies show these services lead to decreased hospital re-admissions, higher patient satisfaction, and greater quality of life.

WHO WE SERVE:

We proudly serve individuals with disabilities, seniors, and those who are recovering from surgery or medically fragile.

With a team of experienced Registered Nurses and Caregivers, we are here to ensure that you and your loved one receive the best possible care while promoting optimal health and well-being. Our compassionate caregivers assist with daily activities such as bathing, dressing, grooming, verbal or visual reminders to take regularly scheduled medication or specialized meal preparation; and much more.

Our team of registered nurses provide a variety of services. They ensure that our clients receive the care they need and are taking their prescriptions and other drug treatments correctly. We work with clients that are using wheelchairs, walkers and gait belts to safely move about their home environment to reduce the risk of falls.
